*UNF-UNEP-WHO*

*Ford Foundation*

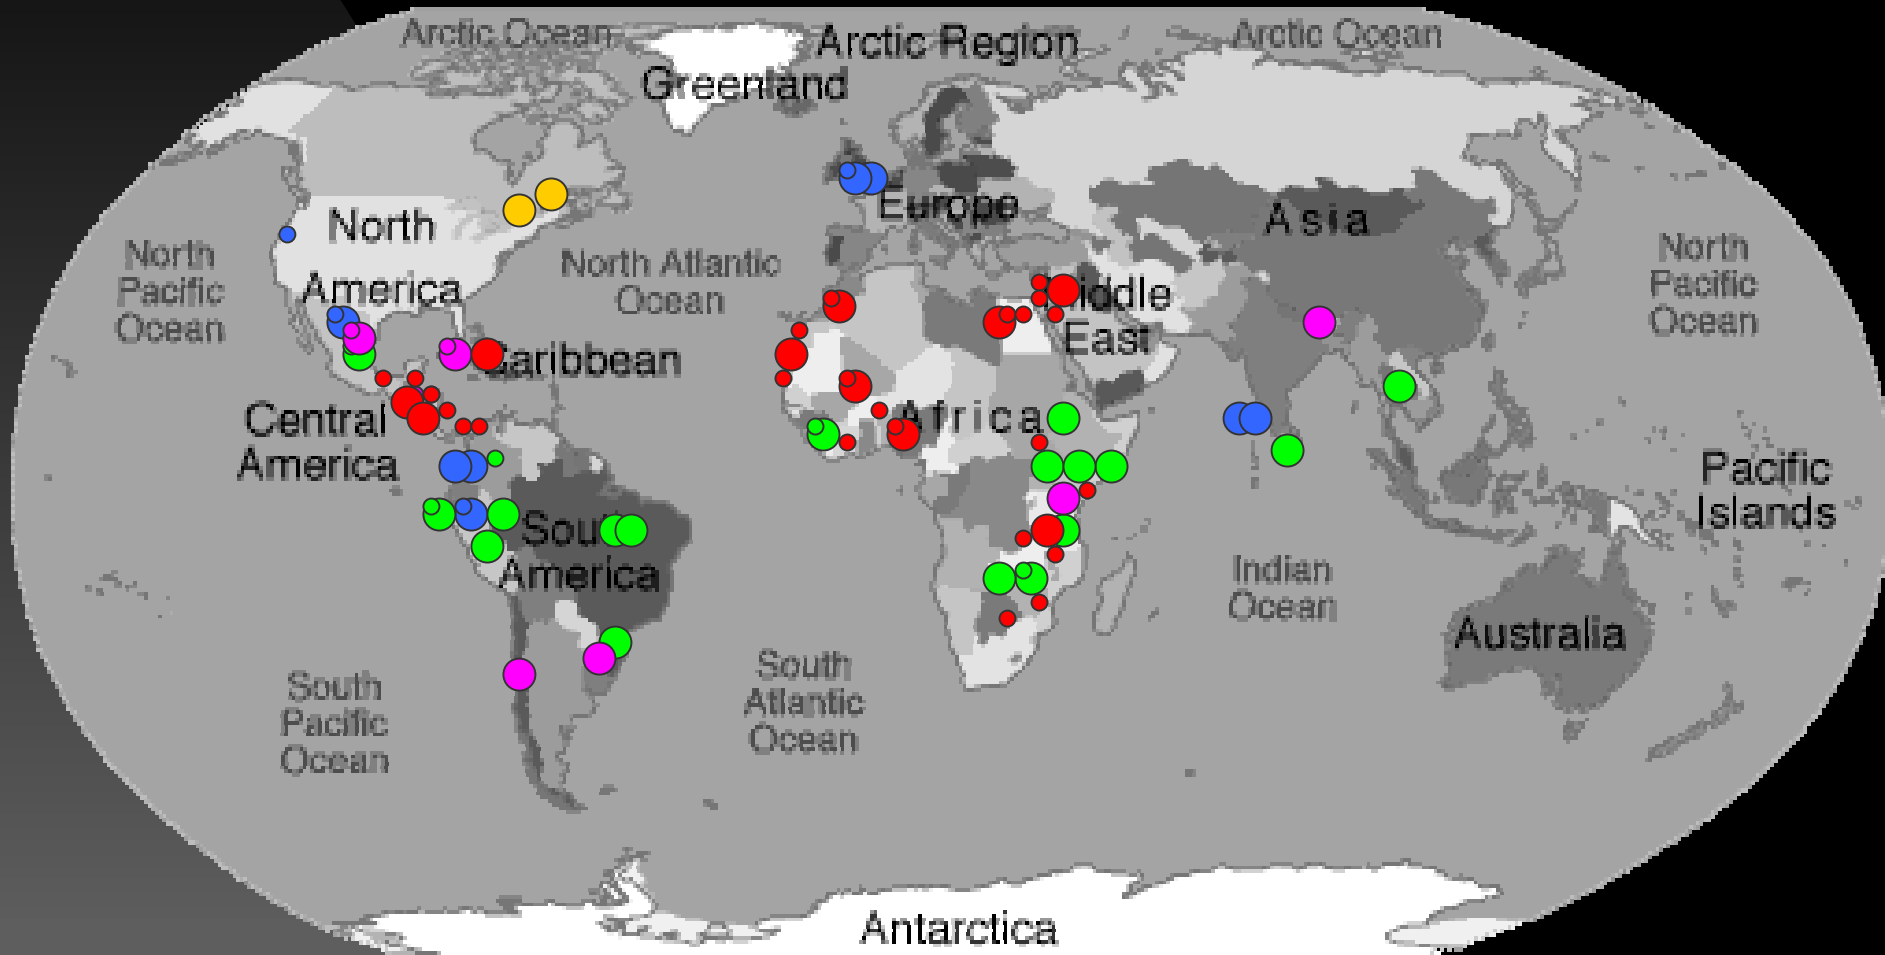

*CSRS*

*SIMA-CGIAR*

- To stimulate and institutionalise the use of ecosystem approaches to human health research in order to improve human health and well being
- To build local research capacity and generate local knowledge
- To provide channels for the national and global application of the knowledge generated.

International Forum III

Ecosystem Approaches  
to Human Health

Montréal, Québec, May 13 - 22, 2003

The goal of the Forum is to provide a platform for discussion on ecosystem approaches to human health, the evidence from the field, and the relevance of these approaches to improving health and well-being. The Forum offers the opportunity for researchers, policy makers, practitioners, and civil society representatives from around the world to share knowledge, and for institutions to consider strategies for a way forward.

#### Forum Themes:

- Definition and conceptualization;
- Successes and challenges through case-studies;
- Links between research results and policy development; and
- Institutionalization of Ecosystem Approaches to Human Health research and practices.
