# INVESTMENT TAX CREDIT – CORPORATIONS (2005 and later taxation years)

## **General information**

- 1. For use by a corporation that during a taxation year:
  - earned an investment tax credit (ITC);
  - is claiming a deduction against its Part I tax payable;
  - · is claiming a refund of credit earned during the current taxation year;
  - is claiming a carryforward of credit from preceding taxation years;
  - is transferring a credit following an amalgamation or wind-up of a subsidiary, as described under subsections 87(1) and 88(1) of the federal *Income Tax Act*;
  - is requesting a credit carryback; or
  - · is subject to a recapture of ITC.
- 2. References to parts, sections, and subsections on this schedule are from the federal *Income Tax Act* and the federal *Income Tax Regulations*. References to interpretation bulletins and information circulars are to the latest versions.
- 3. The ITC is eligible for a three-year carryback (if not deductible in the year earned) and a ten-year carryforward.
- 4. Investments or expenditures, as defined in subsection 127(9) and Part XLVI of the federal *Income Tax Regulations*, that earn the ITC are:
  - · qualified property;
  - · certified property;
  - qualified expenditures that are part of the SR&ED qualified expenditure pool. Complete and file Form T661, Claim for Scientific Research and Experimental Development Expenditures Carried out in Canada; and
  - pre-production mining expenditures.
- 5. Attach a completed copy of this schedule with the T2 Corporation Income Tax Return.
- 6. For more information on ITCs, see the section called "Investment Tax Credit" in the *T2 Corporation Income Tax Guide*, Information Circular IC 78-4, *Investment Tax Credit Rates*, and its related Special Release. Also, see Interpretation Bulletin IT-151, *Scientific Research and Experimental Development Expenditures*.
- 7. For information on SR&ED, see Interpretation Bulletin IT-151, Scientific Research and Experimental Development Expenditures, Information Circular 86-4, Scientific Research and Experimental Development, Guide T4052, An Introduction to the Scientific Research and Experimental Development Program, and Guide T4088, Claiming Scientific Research and Experimental Development (guide to Form T661).

### **Detailed information**

- 1. For the purpose of this schedule, "investment" means:
  - The capital cost of the property (excluding amounts added by an election under section 21), determined without reference to subsections 13(7.1) and 13(7.4), minus the amount of any government assistance or non-government assistance that the corporation has received, is entitled to receive, or can reasonably be expected to receive for that property when it files the income tax return for the year in which the property was acquired.
- 2. An ITC deducted or refunded in a taxation year for a depreciable property, other than a depreciable property deductible under paragraph 37(1)(b), reduces the capital cost of that property in the next taxation year. It also reduces the undepreciated capital cost of that class in the next taxation year. An ITC for SR&ED deducted or refunded in a taxation year will reduce the balance in the pool of deductible SR&ED expenditures and the adjusted cost base (ACB) of an interest in a partnership in the next taxation year. An ITC from pre-production mining expenditures deducted in a taxation year reduces the balance in the pool of deductible cumulative Canadian exploration expenses in the next taxation year.
- 3. Property acquired has to be "available for use" before a claim can be made for an ITC.
- 4. Qualified expenditures for SR&ED and capital costs for a property qualifying for an ITC must be identified by the claimant on Form T661 and Schedule 31 no later than 12 months after the claimant's income tax return is due for the taxation year in which the expenditures or capital costs were incurred.
- 5. Partnership allocations Subsection 127(8) provides for the allocation of the amount that may reasonably be considered to be a partner's share of the ITCs of the partnership at the end of the fiscal period of the partnership. An allocation of ITCs is generally considered to be the partner's reasonable share of the ITCs if it is made in the same proportion in which the partners have agreed to share any income or loss and if section 103 of the Act is not applicable for the agreement to share any income or loss. For more information, see Interpretation Bulletin IT-151.
- 6. For SR&ED expenditures made after February 22, 2005, the expression "in Canada" includes the "exclusive economic zone" (as defined in the Oceans Act to generally consist of an area that is within 200 nautical miles from the Canadian coastline), including the airspace, seabed and subsoil in respect of that zone. For SR&ED expenditures made prior to February 23, 2005, the expression "in Canada" generally includes the 12 nautical mile territorial sea.

## Part 20 - Calculating the recapture of ITC for corporations and corporate partnerships - SR&ED -

You will have a recapture of ITC in a year when all of the following conditions are met:

- you acquired a particular property in the current year or in any of the 10 preceding taxation years;
- you claimed the cost of the property as a qualified expenditure for SR&ED on Form T661;
- the cost of the property was included in computing your ITC or was the subject of an agreement made under subsection 127(13) to transfer qualified expenditures; and
- you disposed of the property or converted it to commercial use after February 23, 1998. This condition is also met if you disposed of or converted to commercial use a property which incorporates the particular property previously referred to.

#### Note

3

The recapture **does not apply** if you disposed of the property to a non-arm's-length purchaser who intended to use it all or substantially all for SR&ED. When the non-arm's-length purchaser later sells or converts the property to commercial use, the recapture rules will apply to the purchaser based on the historical ITC rate of the original user.

You will report a recapture on the T2 return for the year in which you disposed of the property or converted it to commercial use. In the following taxation year, add the amount of the ITC recapture to the SR&ED expenditure pool.

If you have more than one disposition for calculations 1 and 2, complete the columns for each disposition for which a recapture applies, using the calculation formats below.

Calculation 1 - If you meet all of the above conditions Amount of ITC you originally calculated for Amount from column 700 or 710. Amount calculated using ITC rate the property you acquired, or the original at the date of acquisition whichever is less user's ITC where you acquired the property (or the original user's date of acquisition) from a non-arm's length party, as described on either the proceeds of disposition in the note above (if sold in an arm's length transaction) or the fair market value of the property (in any other case) 700 710

Subtotal (enter this amount on line MMM in Part 21)

Calculation 2 – Only if you acquired all or a part of the qualified expenditure from another person under an agreement described in subsection 127(13); otherwise, enter nil at line KKK in Part 20 on page 10.

_		(-,,	
	A	В	С
	The rate percentage that the transferee used in determining its ITC for qualified expenditures under a subsection 127(13) agreement	The proceeds of disposition of the property if you dispose of it to an arm's length person; or, in any other case, enter the fair market value of the property at conversion or disposition	The amount, if any, already provided for in Calculation 1 (This allows for the situation where only part of the cost of a property is transferred under a subsection 127(13) agreement.)
