## YOUR LINK TO THE HOUSING MARKET

Canada Mortgage and Housing Corporation

### Another strong construction year

#### New Home Construction: *Condominiums in demand*

Jobs, affordable mortgage rates and tight resale markets kept demand for new homes strong. Despite the severe winter, which hampered construction activity, home starts in the first quarter were slightly higher than in the first quarter of last year. A jump in multiple starts by 15 per cent offset a 11.7 per cent drop in single-detached home starts. Condominium construction skyrocketed 40 per cent over the first

three months of last year. Multiple family home starts this year will be stronger than in 2002. Condominium apartments remain popular in the current environment of rising home prices. Inventories of newly completed and unoccupied condominiums are low, so that demand for condominiums implies new starts. Multiple family rental construction will get a boost from government assistance to affordable rental projects.

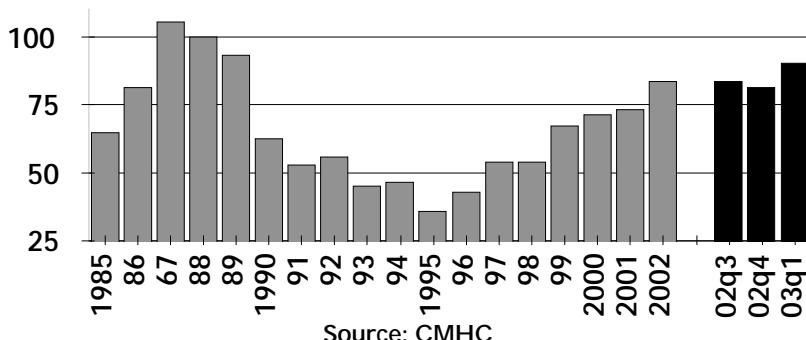

FIRST QUARTER 2003

HOME TO CANADIANS  
Canada

Single home starts are high and will edge down over the next couple of years. The demand for new detached homes is supported by jobs and income growth, and will be slightly offset by rising mortgage rates and home prices and a growing supply of homes listing on the resale market.

### Resale Home Markets: *tight*

Resale home markets are tight. Historical data shows that Ontario's average home price rises rapidly whenever the sales-to-new-listings ratio exceeds 50 per cent. The province's sales-to-new listings ratio has been hovering above 60 per cent, which suggests housing demand is pressuring home prices to increase further. Sales-to-new listings ratios are tight across most of Ontario's major Real Estate Boards.

High home prices are encouraging rising numbers of listings. This rising supply of homes for sale should narrow the margin by which future home prices outpace the general rate of inflation.

### Ontario Outlook

	2002	2003 F	2004 F
<b>Starts, total</b>	<b>83,597</b>	<b>86,000</b>	<b>80,000</b>
<b>Starts, single</b>	<b>51,114</b>	<b>49,000</b>	<b>47,000</b>

Source: CREA; CMHC 2003q2 Outlook

A colder and snowier than average winter, compared to warmer than average and snow-less one the previous year, brought down the number of first quarter home shoppers. Sales through the Province's Real Estate Boards in the first two months of 2003 have been respectable, but dipped almost 14 per cent lower than during the same period last year. Rising mortgage rates will keep this year's home sales below last year's.

Home-ownership remains very affordable. Inflation adjusted "real" mortgage rates are very low. Rising home prices and mortgage rates have boosted the

### Bringing Homeownership within Reach

For most people, the hardest thing about buying a home, especially a first home, is saving the necessary down payment. As you know, with CMHC's Mortgage Loan Insurance, your clients can purchase a home with as little as 5% down. *Bringing Homeownership within Reach* is a brochure that presents guidelines for making the right decisions.

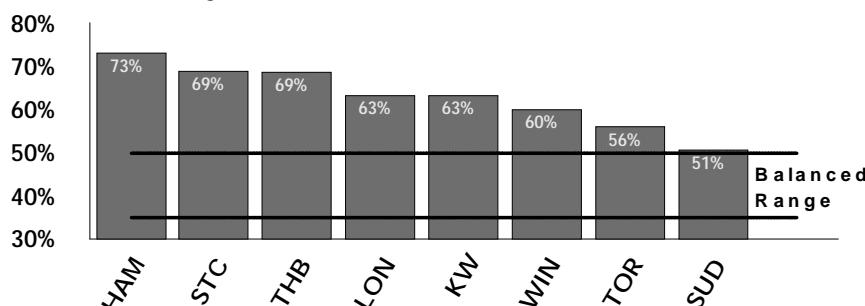

Help your clients in answering the following questions.... What is the maximum price they can afford, what will their monthly payments be and are there other options available to them?

To help them prepare themselves for this important decision process, give them a copy of *Bringing Homeownership within Reach*.

You can order copies of this valuable tool by calling 1-800-668-2642. Order number is NHA 2478.

### How hot are resale markets?

(Sales/New Listings) SA, Mar., 2003

monthly mortgage carrying cost on Ontario's average priced home from its low in late 1996, but not by much. At today's three year mortgage rate, the average home's monthly principal and interest carrying cost expressed in constant dollars (\$2002) is roughly half of its historical peak value of the early 1990s.

### Economy: jobs boost demand

Ontario's economy has set the stage for another good home construction year. Housing demand will be sustained by very reasonable, albeit somewhat higher, mortgage rates and full time job creation. Over a quarter million new jobs have been created in the province between the beginning of 2002 and March 2003 — mostly full time.

Economic indicators are mixed. On the positive side, retail sales

are up. Consumer confidence is strong. Sales of big ticket items are up. Business bankruptcies are down. On the negative side, Ontario's largest export market, the United States, is stuck in an economic lull. Canada's dollar is rising and that will act as a drag on exports. The economic impact of a Severe Acute Respiratory Syndrome (SARS) outbreak in Toronto has yet to be assessed.

On the demographic front high immigration levels since the mid 1980s bode well for housing demand. The majority of the Canada's immigrants are attracted to Ontario's established social and ethnic networks. Immigrant households initially rent and move into ownership after becoming established. Many immigrants who arrived over a decade ago are now purchasing homes.
