ACKNOWLEDGEMENTS

The principal author of this version of *Basic Departmental Data* is Christiane Gour. This publication was prepared under the direction of Pierre Gauvin, Manager, First Nations and Northern Statistics Section, Corporate Information Management Directorate. Technical and editorial support were provided by colleagues in the Corporate Information Management Directorate and by organizations both inside and outside the Department of Indian Affairs and Northern Development.

NOTE TO USERS

Most of the data found in this publication are based on departmental administrative databases. Population counts are taken from the Indian Register and reflect a reporting date of December 31 of any given year.

Readers are advised that all socio-economic data pertaining to the Registered Indians will be available in Census Publications soon to be released by Indian Affairs and Northern Development.

<u>Finally, the user is cautioned that data may be different from previously reported editions, as a result of edit reviews of historical data.</u> Also, numbers may differ slightly from previous releases due to the availability of more current program data or departmental revisions. "Revised" will be indicated at the top of all pages where tables contain revisions to an historical series. Data in the chapter entitled *The North* pertain to the total population (Aboriginal and non-Aboriginal) unless otherwise indicated. Statistics for this report are derived primarily from departmental administrative data sources.

INTRODUCTION

Basic Departmental Data (BDD) provides a comprehensive portrait of the demographic, social and economic conditions of all Registered Indians and Canadians living north of 60^N. Essentially descriptive, BDD has tried to maintain continuity with past events while providing an accurate portrait of the changing circumstances of First Nations and Northerners.

Subjects covered in BDD include population, health, education, social conditions, and housing. For each subject area, information is presented in textual, graphic and tabular formats. Each page contains highlights pertaining to the tabular and graphical information, and notes and sources are indicated at the bottom of each table. The Glossary includes definitions of basic terms used throughout the publication.

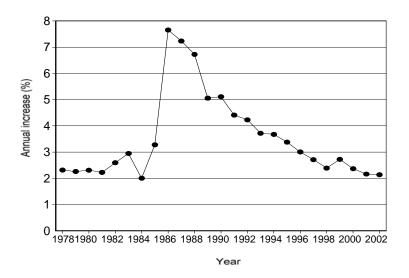

It is important to note in this publication, the word "Indian" means a Registered Indian. A person with status within the meaning of the *Indian Act*, whose name appears on the Indian Register as maintained by INAC, is a Registered Indian. In June 1985, amendments to the *Indian Act* were passed by Parliament. These changes, known as the Bill C-31 amendments, restore Indian status and membership rights to individuals and their children who had been enfranchised because of certain clauses contained in the *Indian Act*.

In 2002, Registered Indians were affiliated with one of the 614 bands located across Canada. Please note that Nunavut, Canada's newest territory, was established in April 1, 1999. As such, the availability of data for Nunavut is limited in this issue of BDD.

SECTION 1 DEMOGRAPHICS

1.1 Registered Indian Population

Figure 1.1 Percentage Change in Registered Indian Population, Canada, 1978 to 2002

Highlights

- Since 1978, fluctuation of the Registered Indian population has been considerable, largely due to the 1985 amendment to the Indian Act.
- The 1985 amendment to the *Indian Act*, (Bill C-31), is reflected in the graph, with the percentage change nearly quadrupling in size.

1.2 Population Projections

Figure 1.2 On and Off-Reserve Registered Indian Population by Residence, Canada, 2001, 2006, 2011, 2016, and 2021

Highlights

- & Over the next 20 years, the total Registered Indian population could increase by 34%, from approximately 703,800 in 2001 to slightly less than 940,000 in 2021.
- & Over the same period, the on-reserve population could grow quite substantially if the migration assumption (net inflow to reserves) proves correct over time. The proportion of Registered Indians living on reserve could increase from an estimated 60% in 2001 to 75% in 2021. Conversely, the offreserve proportion and corresponding five-year annual growth rates could decline during the period.

Notes:

- 1. Numbers rounded to nearest 100. Average annual growth rate (AAGR) and percentage distributions calculated on unrounded data.
- 2. Projections based on the December 31, 2000 Indian Register population adjusted for the late and under reporting of life events.

1.3 Bill C-31 Population

Figure 1.3 Percentage Change in Registered Indian and Bill C-31 Population, Canada, 1990 to 2002

Highlights

- & As of December 31, 2002 a total of 113,254 Registered Indians were registered based upon Bill C-31 amendments to the *Indian Act*.
- & Bill C-31 registrants made up 16% of the Indian Register in 2002.
- & Year over year growth of the Bill C-31 population has fallen from 48% in 1988 to less than 1% in 2002.

Note: The slow growth rate of the Bill C-31 population between 1997 and 1998 is partly due to a backlog of files which were cleaned-up in 1999.

1.5 Registered Indian Population by Region

Figure 1.5 Registered Indian Population by Region, 1982, 1987, 1992, 1997 and 2002

Highlights

- & The total Registered Indian population has doubled in nearly all regions over the last 20 years.
- & In 2002, 23% of the Registered Indian population was in Ontario.

1.6 On-Reserve Population by Region

Figure 1.6 On-Reserve Registered Indian Population by Region, 1982, 1987, 1992, 1997 and 2002

Highlights

- & By region, the number of Registered Indians living on a reserve in 2002 ranged from a low of 3,911 in the Yukon to a high of 80,216 in Ontario.
- & The largest on-reserve regional gains between 1992 and 2002 were in Alberta, and Manitoba respectively.

Notes: 1. On-reserve population includes Crown lands and settlements.

2. All percentages are based on regional totals shown in Table 1.5.

Notes: 1. On-reserve population includes Crown lands and settlements.

2. All percentages are based on regional totals shown in Table 1.5.

1.7 Off-Reserve Population By Region

Figure 1.7 Off-Reserve Registered Indian Population by Region, 1982, 1987, 1992, 1997 and 2002

Highlights

- & The off-reserve population increased steadily between 1982 and 2002 from 96,538 to 301,514.
- & The number of
 Registered Indians who
 live off reserve has
 increased in all regions.
 The largest off-reserve
 regional gain south of 60°
 between 1992 and 2002
 was Manitoba.
 Conversely, the
 off-reserve population of
 Quebec exhibited the
 lowest rate of increase
 over the same period.

Note: All percentages are based on regional totals shown in Table 1.5.

1.8 On-Reserve Population by Geographic Zones

Figure 1.8 On-Reserve^{1,2} Registered Indian Population by **Highlights** Geographic Zones³, 1982 and 2002

- & The proportion of onreserve Registered Indians living in rural areas has increased between 1982 and 2002, from 39% to 45%.
- & In 2002, 35% of Registered Indian on reserve lived in INACdefined urban zones while nearly 17%, lived in special access zones. Special access zones have no year-round road access to a service centre.

Notes: 1. On-reserve population includes Crown lands and settlements.

2. The Canada total excludes Cree and Naskapi bands in Quebec, as these groups are covered under terms established in the James Bay Agreement for 1982 to 2002. As well, totals exclude the national population from the general list.

3. See Glossary for definition of geographic zone.

^{2.} The Canada total excludes Cree and Naskapi bands in Quebec, as these groups are covered under terms established in the James Bay Agreement for 1982 to 2002. As well, totals exclude the national population from the general list.

1.9 On-Reserve Population by Geographic Zones and by Region

Figure 1.9 On-Reserve^{1,2} Registered Indian Population by Geographic Zones³ and by Region, 2002

Highlights

- & In 2002, Saskatchewan, Manitoba and Atlantic regions had the highest proportion of on-reserve Registered Indians living in rural areas.
- & Alberta, Quebec and Ontario had the highest proportion of Registered Indians on-reserve living in urban areas.

19

Notes: 1. On-reserve population includes Crown lands and settlements.

The Canada total excludes Cree and Naskapi bands in Quebec, as these groups are covered under terms established in the James Bay Agreement for 1982 to 2002. As well, totals exclude the national population from the general list.

1.10 Population Distribution by Age and Gender

Figure 1.10 Population Distribution by Age and Gender, Indian Register^{1,3} 2002 and Post-censal Estimates² 2002

Highlights

- & The Registered Indian population has a higher proportion of youth (under age 24 years) than the population of Canada as a whole.
- & The proportion of population over age 40 years is markedly lower among Registered Indians than across Canada.

Notes:

- 1. The Indian Register Population is as of December 31, 2002. Data have not been adjusted for late reporting of births. Therefore, the younger age groups (specifically 0-4) are under represented, and would be larger than it appears.
- 2. The "Total Canadian" population includes the Registered Indian population. Figures are Updated Post-censal Estimates as of July 1, 2002.
- 3. The Registered Indian Population does not add up to the total of 704,851 due to 2 cases where the age is unknown.

Total		704,849			31	,413,99	90					

Notes:

Sources : 2002 Indian Register, INAC. Statistics Canada and <u>Annual Demographic Statistics 2002</u>, March 2003 Cat. 91-213-XPB.

^{1.} The Indian Register Population is as of December 31, 2002. Data have not been adjusted for late reporting of births. Therefore, the younger age groups (specifically 0-4) are under represented, and would be larger than it appears.

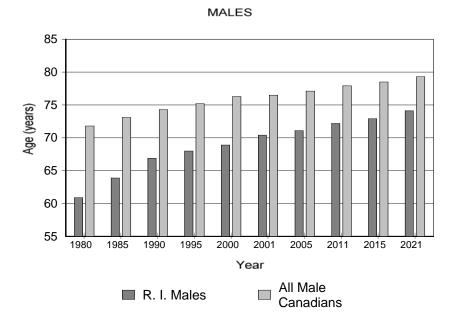

^{2.} The "Total Canadian" population includes the Registered Indian population. Figures are Updated Post-censal Estimates as of July 1, 2002.

^{3.} The Registered Indian Population does not add up to the total of 704,851 due to 2 cases where the age is unknown.

SECTION 2 HEALTH

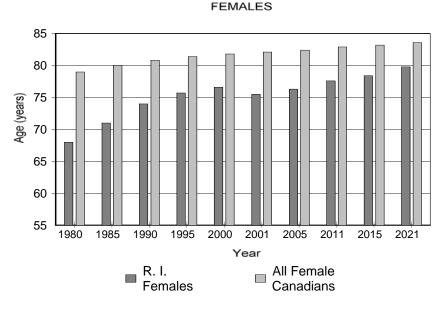

2.1 Life Expectancy

Figure 2.1 Projected Life Expectancy at Birth by Gender, Registered Indian Population and Canadian Population, Canada, 1980-2021

Highlights

- & Life expectancy for Registered Indians at birth continues to approach parity with the general Canadian population.
- & Despite the gains in life expectancy, a gap of approximately 6.4 years remains between the Registered Indian and Canadian populations in 2001.
- The life expectancy gap between the male and female Registered Indians in 1980 was 7.1 years in favour of females, and in 2001 the gap declines to 5.1 years.

Note:

Some numbers have been interpolated.

Sources:

Population Projections of Registered Indians, 2000-2021, INAC, 2003.

Population Projections for Canada, Provinces and Territories, 2000-2026, Statistics Canada 2001. Medium Assumption, pages 25-26.

2.1 Life Expectancy (continued)

Highlights

- Between 1980 and 2021, life expectancy for male Registered Indians is expected to increase from 60.9 to 74.1 years and for female Registered Indians from 68.0 to 79.8 years.
- & In 1980 the gap between female Registered Indians and all female Canadians was 11.0 years and is projected to decrease to 3.8 years in 2021.
- The gap between male Registered Indians and all male Canadians was 10.9 years in 1980 and is projected to decrease to 5.2 years in 2021.

Table 2.1 Projected Life Expectancy at Birth by Gender, Registered Indian Population and Canadian Population, Canada, 1980-2021

	Male			Female		
Year	Registered Indians	All Canadians	Gap	Registered Indians	All Canadians	Gap
1980	60.9	71.8	10.9	68.0	79.0	11.0
1985	63.9	73.1	9.2	71.0	80.0	9.0
1990	66.9	74.3	7.4	74.0	80.8	6.8
1995	68.0	75.2	7.2	75.7	81.4	5.7
2000	68.9	76.3	7.4	76.6	81.8	5.2
2001	70.4	76.5	6.1	75.5	82.1	6.6

2.2 Potential Years of Life Lost (PYLL)

Figure 2.2 Potential Years of Life Lost by Cause of Death, First Nations, 2000 and Canada^{1,2}, 1999

Highlights

- & In 2000, the PYLL for injury was almost 3.5 times higher for First Nations than for Canada.
- & Total PYLL due to cancer, congenital disease, genitourinary disease and blood diseases for all Canadians exceeds that of First Nations.

Table 2.2 Potential Years of Life Lost by Cause of Death, First Nations, 2000 and Canada^{1,2}, 1999

Disease Classification	First Nations	Canada	
Injury	4,304	1,260	
Circulatory	978	907	
Cancer	828	1,555	
III defined	469	128

1995	Not avail.	6.1		
1996	Not avail.	5.6		
1997	Not avail.	5.5		
1998	Not avail.	5.3		
1999	6.4	5.3		
2000	6.4	5.5		

Highlights

- & Since 1980, there has been a steady decline in Infant Mortality rates for First Nations on-reserve as well as Canada.
- & Between 1980 and 2000, there was a 73% decline in Infant Mortality rates for First Nations On-reserve compared to a decline of 47% in Canada.

Notes:

- 1. Rates include births <500g.
- 2. Deaths per 1,000 live births.
- Data were unavailable for the First Nations population for the years 1994-1998. Current data may not be directly comparable to previous years due to different data collection methods.

2002, Real Property Services for INAC, HQ, Public Works and Government Services Canada.

SECTION 3 EDUCATION

3.1 Enrolment by School Type

Figure 3.1 Percentage of On-Reserve Population Enrolled in Kindergarten, Elementary and Secondary Schools by School Type, Canada,1994-1995 to 2002-2003

Highlight

& In 2002-2003, the percentage of students enrolled in First Nation managed and federal schools was five percentage-points higher than eight years before.

Notes:

- 1. On-reserve population includes recognized Indian settlements on Crown land.
- 2. Total enrolment includes Registered Indians, Non-Registered Indians living on a reserve and/or Inuit living in a community and attending Kindergarten 4 to 13 (where applicable).
- 3. Excludes Yukon, N.W.T. and Nunavut as Elementary and Secondary Education are funded by the territorial governments, and all other self-governing First Nations.
- 4. Starting in 1992-1993 an estimate of students enrolled in First Nation schools for the Nuu-Chah-Nulth Tribal Council in B.C. has been included. Only a summary count of students enrolled were provided for the following in Quebec: Cree starting in 1996-1997; Inuit in 1997-1998; and Naskapi starting in 1998-1999.
- 5. Several reasons explain the stabilization of the number of students enrolled in elementary/secondary schools over the past four years. Reasons include increased Multi-Year Agreements and Self Government agreements (data are no longer reported or updated annually on the Nominal Roll), strengthened regional compliance processes, and improved data processing procedures on the Nominal Roll System.

Source: 1994-2002 Nominal Roll, Information Management Branch, INAC.

3.1 Enrolment by School Type (continued)

Table 3.1 On-Reserve Population, Enrolled in Kindergarten, Elementary and Secondary Schools by School Type, Canada, 1994-1995 to 2002-2003

School Types

	FEDER	RAL	PROVIN	ICIAL	FIRST N		PRIVA	TE	TOTAL ^{1,2}	2,3,4,5
Year	No. of students	%	No. of students	%	No. of students	%	No. of students	%	No. of students	%

2000-01	1,642	1.4	42,717	35.6	73,425	61.3	2,016	1.7	119,800	100
2001-02	1,656	1.4	43,420	36.3	72,457	60.6	2,041	1.7	119,574	100
2002-03	1,680	1.4	44,625	37.2	71,576	59.7	1,978	1.7	119,859	100

Highlights

- & From 1994-1995 to 2002-2003, the proportion of students enrolled in First Nation managed schools has increased while enrolment in federal, provincial, and private schools declined.
- & Over the past five years, there has been little annual change in the proportions of enrolments in the various types of schools.

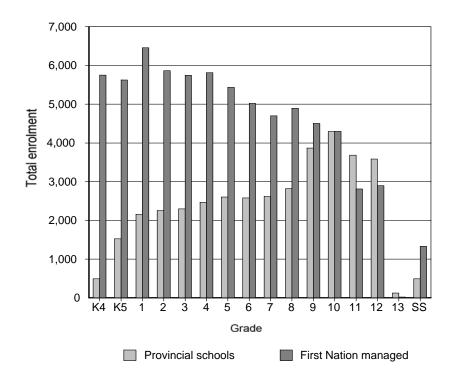

Notes:

- 1. On-reserve population includes recognized Indian settlements on Crown land.
- 2. Total enrolment includes Registered Indians, Non-Registered Indians living on a reserve and/or Inuit living in a community and attending Kindergarten 4 to 13 (where applicable).
- 3. Excludes Yukon, N.W.T. and Nunavut as Elementary and Secondary Education are funded by the territorial governments, and all other self-governing First Nations.
- 4. Starting in 1992-1993 an estimate of students enrolled in First Nation schools for the Nuu-Chah-Nulth Tribal Council in B.C. has been included. Only a summary count of students enrolled were provided for the following in Quebec: Cree starting in 1996-1997; Inuit in 1997-1998; and Naskapi starting in 1998-1999.
- 5. Several reasons explain the stabilization of the number of students enrolled in elementary/secondary schools over the past four years. Reasons include increased Multi-Year Agreements and Self Government agreements (data are no longer reported or updated annually on the Nominal Roll), strengthened regional compliance processes, and improved data processing procedures on the Nominal Roll System.

Source: 1994-2002 Nominal Roll, Information Management Branch, INAC.

3.2 Enrolment by School Type and Grade

Figure 3.2 Total Enrolment in Provincial and First Nation Managed Schools, by Grade, Canada, 2002-2003 (New)

Highlight

& While 85% of INACfunded K4 and K5 students attend First Nation managed schools, this number decreases to 45% by grade 12 as many First Nation managed schools offer primary levels only. This trend has remained constant since 1993-1994.

Notes: 1. On-reserve population includes recognized Indian settlements on Crown land.

- 2. Total enrolment includes Registered Indians, Non-Registered Indians living on a reserve and/or Inuit living in a community and attending Kindergarten 4 to 13 (where applicable).
- Excludes individuals from the Nuu-Chah-Nulth Tribal Council, James Bay Cree, Inuit and Naskapi of Quebec, starting in 1996-1997.
- 4. Excludes Yukon, N.W.T. and Nunavut as Elementary and Secondary Education is funded by the territorial governments, and all other self-governing First Nations.
- 5. Includes students in K4, K5 and grades 1-8
- 6. Includes students in grades 9-13 (where applicable) and Special Students (SS) who are not graded.

Source: 2002-2003 Nominal Roll, Information Management Branch, INAC.

	First Nation	55,563	77.1	16,499	22.9	72,062	100
2002-03	Provincial	21,803	57.6	16,040	42.4	37,843	100
	First Nation	55,309	77.7	15,856	22.3	71,165	100

- Notes: 1. On-reserve population includes recognized Indian settlements on Crown land.
 - 2. Total enrolment includes Registered Indians, Non-Registered Indians living on a reserve and/or Inuit living in a community and attending Kindergarten 4 to 13 (where applicable).
 - Excludes individuals from the Nuu-Chah-Nulth Tribal Council, James Bay Cree, Inuit and Naskapi of Quebec, starting in 1996-1997.
 - Excludes Yukon, N.W.T. and Nunavut as Elementary and Secondary Education is funded by the territorial governments, and all other self-governing First Nations.
 - Includes students in K4, K5 and grades 1-8.
 - Includes students in grades 9-13 (where applicable) and Special Students (SS) who are not graded.

Source: 1993-2002 Nominal Roll, Information Management Branch, INAC.

3.3 On-reserve Population Enrolment, Age 6-16

Figure 3.3 On-reserve Registered Indian Enrolment Rate by Population Age 6-16 years, Canada, 1994-1995 to 2002-2003

Highlight

There continues to be only a slight fluctuation in the annual enrolment rate of the on-reserve registered Indian population.

Notes:

- 1. On-reserve includes recognized Indian settlements on Crown land.
- 2. Enrolment rates are calculated by dividing the on-reserve enrolment by the on-reserve population and multiplying by 100. Please note that a major limitation to determining the on-reserve enrolment rate is the use of the Indian Register to identify the on-reserve population aged 6-16 years. The Indian Register is recorded by event-driven occurrences and may be out of date (individuals included in the denominator from the Indian Register may actually be living off-reserve). The population aged 6-16 years, which is used as a denominator for calculating the enrolment rate, is likely lower than that being used and is likely deflating the enrolment rate.
- 3. Excludes Yukon, N.W.T. and Nunavut as kindergarten, elementary and secondary education is funded by the territorial governments, and all other self-governing First Nations.
- Excludes individuals from the Nuu-Chah-Nulth Tribal Council, Miawpukek, Sechelt and James Bay Cree, Inuit and Naskapi of Quebec.
- 5. The 6-16 age group has been used in order to be consistent with numbers reported for all Canadians. Previously the 4-18 age group was used.

Sources: 1994-2002 Indian Register, INAC.

1994-2002 Nominal Roll, Information Management Branch, INAC.

3.3 On-Reserve Population Enrolment, Age 6-16 (continued)

Table 3.3 On-Reserve Registered Population, Age 6-16, Enrolment Rate, Canada, 1994-1995 to 2002-2003

Year	On-Reserve Population 6-16 Years ^{1,3,4,5}	On-Reserve Enrolment 6-16 Years ^{1,3,4,5}	Enrolment Rate ²
1994-95	77,616	66,902	86.2
1995-96	80,764	70,224	86.9
1996-97	82,759	72,352	87.4
1997-98	86,280	74,617	86.5
1998-99	89,557	76,262	85.2
1999-00	92,213	78,178	84.8
2000-01	94,263	78,647	83.4
2001-02	95,358	82,515	86.5
2002-03	96,977	80,248	82.7

Notes:

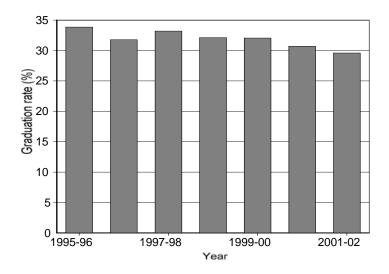

- 1. On-reserve includes recognized Indian settlements on Crown land.
- 2. Enrolment rates are calculated by dividing the on-reserve enrolment by the on-reserve population and multiplying by 100. Please note that a major limitation to determining the on-reserve enrolment rate is the use of the Indian Register to identify the on-reserve population aged 6-16 years. The Indian Register is recorded by event-driven occurrences and may be out of date (individuals included in the denominator from the Indian Register may actually be living off-reserve). The population aged 6-16 years, which is used as a denominator for calculating the enrolment rate, is likely lower than that being used and is likely deflating the enrolment rate.
- 3. Excludes Yukon, N.W.T. and Nunavut as kindergarten, elementary and secondary education is funded by the territorial governments, and all other self-governing First Nations.
- Excludes individuals from the Nuu-Chah-Nulth Tribal Council, Miawpukek, Sechelt and James Bay Cree, Inuit and Naskapi of Quebec.
- 5. The 6-16 age group has been used in order to be consistent with numbers reported for all Canadians. Previously the 4-18 age group was used.

3.4 High School Graduates

Figure 3.4 Percentage of Students Enrolled in Grade 12 or Highlight Grade 13 who Graduated, Canada, 1995-1996 to 2001-2002

& The percentage of students enrolled in Grade 12 or Grade 13 who graduated, fluctuated slightly between 1995-1996 and 2001-2002.

- Notes: 1. On-reserve population includes recognized Indian settlements on Crown land.
 - The Graduation Rate is calculated by dividing the "Graduates" by the "Enrolment in Graduating Year".
 - 3. Only includes students who were enrolled in a graduating year who graduated. Due to movement of students on and off reserve, graduation data are limited. These graduates only include those students who graduated while they are being funded by INAC. It is quite possible that students have graduated while they are living off-reserve and are therefore no longer on INAC's Nominal Roll. INAC is working on the development of a Student Tracing Methodology that will both 1) develop better performance measurements including graduation rates; and, 2) work with First Nations and provincial ministries of education in sharing information in order to understand the actual number of student that graduate that have been previously funded by INAC. For these reasons, currently INAC is not in a position to provide robust information on graduation rates.
 - 4. Total enrolment includes Registered Indians, Non-Registered Indians living on a reserve and/or and Inuit living in a community and attending Grades 12 or 13 (where applicable).
 - Excludes individuals from the Nuu-Chah-Nulth Tribal Council, and James Bay Cree, Inuit and Naskapi of Quebec.
 - Excludes Yukon, N.W.T. and Nunavut as Secondary Education is funded by the territorial governments, and all other self-governing First Nations.

3.4 High School Graduates (continued)

Table 3.4 Students Enrolled in Grade 12 or Grade 13 who Graduated, Canada, 1995-1996 to 2001-2002

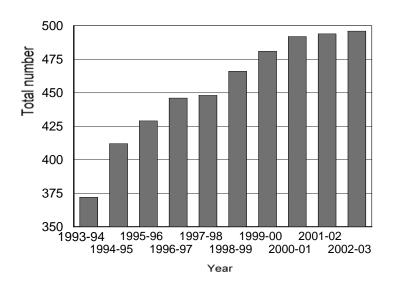

Enrolment in Graduating Year	Graduates ³	Graduation Rate
5,909	2,001	33.9
5,618	1,785	31.8
5,948	1,975	33.2
6,036	1,939	32.1
6,463	2,072	32.1
7,063	2,168	30.7
6,706	1,983	29.6
	Graduating Year 1,4,5,6 5,909 5,618 5,948 6,036 6,463 7,063	Graduating Year Graduates 3 5,909 2,001 5,618 1,785 5,948 1,975 6,036 1,939 6,463 2,072 7,063 2,168

- Notes: 1. On-reserve population includes recognized Indian settlements on Crown land.
 - The Graduation Rate is calculated by dividing the "Graduates" by the "Enrolment in Graduating Year".
 - 3. Only includes students who were enrolled in a graduating year who graduated. Due to movement of students on and off reserve, graduation data are limited. These graduates only include those students who graduated while they are being funded by INAC. It is quite possible that students have graduated while they are living off-reserve and are therefore no longer on INAC's Nominal Roll. INAC is working on the development of a Student Tracing Methodology that will both 1) develop better performance measurements including graduation rates; and, 2) work with First Nations and provincial ministries of education in sharing information in order to understand the actual number of student that graduate that have been previously funded by INAC. For these reasons, currently INAC is not in a position to provide robust information on graduation rates.
 - 4. Total enrolment includes Registered Indians, Non-Registered Indians living on a reserve and/or and Inuit living in a community and attending Grades 12 or 13 (where applicable).
 - Excludes individuals from the Nuu-Chah-Nulth Tribal Council, and James Bay Cree, Inuit and Naskapi of Quebec.
 - Excludes Yukon, N.W.T. and Nunavut as Secondary Education is funded by the territorial governments, and all other self-governing First Nations.

3.5 First Nation Managed Schools

Figure 3.5 Number of First Nation Managed Schools, Canada, 1993-1994 to 2002-2003

Highlight

& First Nation communities are assuming more control in the delivery of education to children living on reserves. Reflecting this fact, the number of First Nation managed schools increased by 33% from 372 in 1993-1994 to 496 in 2002-2003.

Table 3.5 Annual Increase in Total First Nation Managed Schools, Canada, 1993-1994 to 2002-2003

School Year	First Nation managed schools	Annual increase (%)
1993-94	372	-
1994-95	412	10.8
1995-96	429	4.1
1996-97	446	4.0
1997-98	448	0.4
1998-99	466	4.0
1999-00	481	3.2
2000-01	492	2.3
2001-02	494	0.4
2002-03	496	0.4

3.6 First Nation Managed School Classrooms

Highlight

& In 2002-2003, the majority of classrooms in First Nations managed Schools are at the elementary level (approximately 63%).

Figure 3.6 Number of First Nation Managed School Classrooms¹, Canada, 1994-1995 to 2002-2003 (New)

Notes: 1. Classroom numbers are a reflection of the physical number of classrooms and does not include special purpose rooms, i.e. gymnasiums, craft rooms, computer rooms etc.

3.7 Post-secondary Enrolment

Highlights

& In 1995-1996, the postsecondary enrolment increased to approximately 27,000 and remained constant through to 1998-1999.

Figure 3.7 Registered Indians and Inuit Enrolled in Post-Secondary Receiving INAC Funding, Canada, 1994-1995 to 2002-2003 (Revised)

Notes:

- Total number of Registered Indians and Inuit funded by INAC and enrolled in post-secondary education.
 Post-secondary enrolment is likely to be higher as some students may be accessing funds from different sources.
- 2. These data only include those students enrolled while they were being funded by their First Nation (or in a few cases, INAC). It is quite possible that students previously funded through INAC's PSE program are now financing studies differently and no longer appear on the PSE file. The decreasing enrolment may be partly due to the fact that the PSE program operates on a fixed budget while tuition and other incidental costs generally increase.
- 3. The enrolment includes reported students and estimates for non-reported students.
- 4. Excludes N.W.T and Nunavut as they are funded by the territorial government.

2004

3.8 Post-secondary Education Attainment

Highlights

- & Between 1996-2001, post-secondary education attainment rates have increased by 3 percentage points for both the Registered Indian population and the Canadian population.
- & The gap in postsecondary education attainment between the Registered Indian population and the Canadian population has remained constant at about 15 percentage points.

Figure 3.8 Post-Secondary Education Attainment Rate for the Registered Indian Population compared to the Canadian² Population, Census 1996 and 2001 (New)

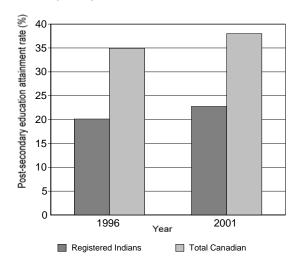

Table 3.8 Post-Secondary Education Attainment Rate for the Registered Indian Population compared to the Canadian² Population, Census 1996 and 2001 (New)

Notes:

- The post-secondary education attainment rate is calculated by dividing the Population 15+ with a Post-Secondary Certificate/Diploma/ Degree by the Total Population 15+.
- The Canadian Population excludes the Registered Indian Population.

3.9 Post-Secondary Education Graduates

Figure 3.9 Registered Indian and Inuit Post-Secondary Graduates² who Received INAC Funding, 1995-1996 to 2001-2002 (Revised)

Highlights

- & The number of post-secondary education graduates has fluctuated slightly between 1995-1996 and 2001-2002.
- & Of the 3,584 post-secondary graduates in 2001-2002, 60% obtained a non-university certificate or diploma while 39% received an undergraduate or graduate degree from a university.

Notes:

- Non University includes Colleges, Trades and other Institutions granting certificates or diplomas. , Undergraduate
 includes bachelor degrees, Professional degrees etc., Graduate includes Master's degrees, Ph.Ds etc., and Not
 Seeking a Qualification includes special students, auditing specializations and all others.
- 2. The figures do not include all bands.
- 3. Excludes N.W.T and Nunavut as they are funded by the Territorial Government.
- 4. Graduates may be higher than those reported here. These data only include those students that graduated while they are being funded by their First Nation (or in a few cases, INAC). It is quite possible that students previously funded through INAC's PSE program are now financing studies differently and no longer appear on the PSE graduate file.

SECTION 4 SOCIAL CONDITIONS

4.1 Children In Care

Figure 4.1 Percentage of On-Reserve Registered Indian Children in Care¹, Canada, 1996-1997 to 2002-2003

Highlight

& The proportion of children in care has been approximately 6% for three consecutive years from 2000-2001 to 2002-2003.

Notes:

- 1. See Glossary for definition of "Children in Care".
- 2. The total number of children in care represents all children under the care of Operational and Development First Nations Child and Family Services Agencies, Provincial care and CSS care (Quebec and Ontario only).
- 3. Children in care include foster, institutional and group home care.
- 4. Child care cases do not include preventive and alternate approaches to child and family services.
- 5. Registered Indian children in care were resident on a reserve, Crown Land or settlement prior to the provision of care.
- The total number of 0-18 population is as of December 31 from the Indian Register and represents only those First Nations which were administered under a Child and Family Services Agreement.
- 7. The above information may include estimated or incomplete data.
- 8. Excludes residents in the N.W.T. and Nunavut as they are funded by the territorial government.
- 9. Excludes Self-Government First Nations which are funded through other funding mechanisms.
- 10. Children in Care as of March 31.

Sources: 1996-2002 Social Development - Children in Care (Children aged 18 and under), Information Management Branch, INAC. 1996-2002 Indian Register (as of December 31), INAC.

4.2 Adults In Institutional Care

Figure 4.2 Number of On-Reserve Registered Indian Adults in Institutional Care¹, Canada, 1995-1996 to 2002-2003

Highlight

& Over the last eight years, the number of care years of on-reserve Registered Indian adults in institutional care averaged 3.3 per thousand.

53

Notes:

- 1. See Glossary for definition of "Adult in Institutional Care".
- 2. The total number of 19 years and over population is as of December 31 from the Indian Register and represents only those First Nations that were funded under this program.
- The ratio of Adults in Institutional Care is the number of adults in care divided by the number of On-Reserve Registered Indian Adults aged 19 years and over multiplied by 1000.
- 4. The total number of adults represents all adults under Types I and II Institutional care.
- 5. Adult care includes institutional care and excludes in-home and foster care.
- Registered Indian Adults in Institutional Care were resident on a reserve, Crown Land or settlement prior to the provision of care.
- 7. Excludes residents in the N.W.T. and Nunavut as they are funded by the territorial government.
- 8. Excludes Self-Government First Nations which are funded through other funding mechanisms.
- 9. Adult in Institutional Care as of March 31.

Sources: 1995-2002 Social Development - Adult in Care (Adult aged 19 and over), Information Management Branch, INAC. 1995-2002 Indian Register (as of December 31), INAC.

4.2 Adults In Institutional Care (continued)

Table 4.2 Number of On-Reserve Registered Indian Adults in Institutional Care¹, Canada, 1995-1996 to 2002-2003

Fiscal Year ⁹	Number of Adults in Insitutional Care	Number of on-reserve adults ages 19 and over ²	Adults in Institutional Care per 1,000 Population ³
1995-96	666	189,282	3.5

4.3 Social Assistance Recipients and Beneficiaries

Figure 4.3 Average Number of On-Reserve Social Assistance Recipients and Beneficiaries¹ per Month, Canada, 1994-1995 to 2002-2003

Highlights

- & In 2002-2003, the average number of social assistance recipients per month was 2.6% higher than in 1998-1999.
- & From 1998-1999 to 2002-2003, the average number of social assistance beneficiaries declined by 3.5%.

Notes:

- 1. See Glossary for definition of "Social Assistance"
- Social Assistance Recipients are defined as a combination of the number of families (heads of household) and single individuals who are eligible to receive social assistance funding.
- Social Assistance Beneficiaries are defined as a combination of the number of persons in a family and single individuals.
- The number of Social Assistance recipients is a combination of two data types: actuals and "fixed-volume" commitments.
- 5. Starting in 1988-1989, all information appears as submitted by regions.
- 6. The decrease in the 1995-1996 figures is due primarily to the exclusion of five (5) Yukon Self-Government First
- 7. The 1997-1998 Social Assistance data was revised, as a result of the February 1999 Data Review.
- 8. Excludes residents in the N.W.T. AND Nunavut as they are funded by the territorial government.
- 9. Excludes Self-Government First Nations which are funded through other funding mechanisms.

4.4 Social Assistance Program

Figure 4.4 Percentage Change of Bands Administering the Highlight Social Assistance Program¹, Canada

1994-1995 to 2002-2003

& In 2002-2003, Social Assistance was administered by 532 out of 564 eligible bands, with funding provided through a number of contribution arrangements.

Notes:

- 1. See Glossary for definition of "Social Assistance".
- 2. Number of bands is defined as the total number of bands which INAC is responsible for funding Social Assistance. The number of bands shown above does not reflect the total number of bands as identified in the Indian Register.
- 3. Number of administering bands is the total number of bands administering the Social Assistance Program, either directly or indirectly, through other bands, tribal councils, or under joint administration.
- 4. Data may be different from previous reports as regions may have adjusted data in the 1994-1995 submission.
- 5. The decrease in the 1995-1996 figures is due primarily to the exclusion of five (5) Yukon Self-Government First Nations.
- 6. In 1999-2000 and 2000-2001, there were eight self-government First Nations excluded from the count.

Source: 1994-2002 Social Assistance, Information Management Branch, INAC.

2001-02	2001-02 1,872 3,690			
2002-03	1,899	4,224		

Highlights

- & From 1993-1994 to 2002-2003, an average of 2,623 on-reserve dwelling units were built.
- & On average, 3,513 dwelling units were renovated each year from 1993-1994 to 2002-2003.
- & In 2002-2003, there were 27 more new dwelling units built, and 534 more renovations than during the previous year.

Notes:

- See Glossary for definition of "Dwellings"
- Excludes dwellings in the N.W.T., Nunavut and Inuit communities of Northern Quebec, as well as dwellings of bands under the James Bay and Northern Quebec Agreement since 1984, Self-Government bands in Yukon and the Sechelt Band since 1986.
- Data reported for 1997-1998 is as of August 31, 1998 and reflects adjustments made to the 1997-1998 Capital Management Database after publication of the 1997-1998 Performance Report.
- 4. Federal funding is provided by both INAC and CMHC.

5.2 On-Reserve Dwellings/Infrastructure

Highlight

& The proportion of adequate on-reserve housing declined from 56% in 2001-2002 to 53% in 2002-2003.

Figure 5.2 Percentage of Adequate On-Reserve Housing¹, Canada, 1994-1995 to 2002-2003

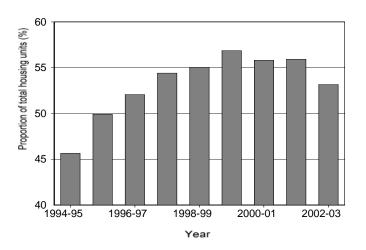

Table 5.2 Adequate On-Reserve Housing¹, Canada, 1

Notes:

1. Adequate is defined as the number of housing units that do not require any minor or major renovations or replacement. This number is determined using the following formula:

Adequate Housing Units = Total Units-(Replacement+Major Renovation+Minor Renovation)

2. B.C. data excludes updates of infrastructure assets since 1987 for some First Nations participating in Alternative Funding Arrangements.

British Columbia	42	123		
Yukon	4	4		
N.W.T.	5	24		
Canada Total	72	457		

Background

In 1995, the Government of Canada recognized the inherent right of self-government as an existing Aboriginal right under section 35 of the *Constitution Act, 1982* and announced a policy framework for the implementation and negotiation of Aboriginal self-government. The policy is based on the view that Aboriginal peoples of Canada have the right to govern themselves in relation to matters that are internal to their communities, integral to their unique cultures, identities, traditions, languages and institutions, and with respect to their special relationship to their land and their resources. The objective of the policy is the negotiation of practical and workable agreements on how self-government will be exercised.

Following on the recommendations of the Royal Commission on Aboriginal Peoples in 1996 and the launch of *Gathering Strength — Canada's Aboriginal Action Plan* in 1998, the approach to self-government evolved to include a focus on the more holistic challenge of setting a framework for new government-to government relationships, including the development of internal governance capacities, skills and structures as a basis for negotiating self-government agreements.

DIAND is currently engaged in self-government negotiations at some 72 tables. These include comprehensive self-government negotiations (i.e. a range of jurisdictions), sectoral negotiations (i.e. one jurisdiction such as education, child welfare) and self-government negotiations which are proceeding with a large number of communities in conjunction with their comprehensive land claims negotiations.

Note: 1. Aboriginal communities include First Nations, Inuit and Métis north of 60°.

Source: 2003 Self-Government Policy Directorate, INAC.

6.1 Self-Government Negotiations (continued)

Highlights of Progress Achieved in 2003

Progress achieved at tables over the last year includes the following:

- In the Yukon, final agreements were initialled with the Kwanlin Dun and Carcross/Tagish First Nations and signed with the Kluane First Nation;
- & in the Northwest Territories, the Tlicho (Dogrib) Final Agreement was signed and AIPs were signed with the Sahtu Dene and Métis of Déline and the Gwich'in and Inuvialuit;
- & in B.C., a final agreement was signed with the Westbank First Nation, AIPs were signed with the Lheidli T'enneh, Maa-nulth and Sliammon First Nations, and AIPs were initialled with the Snuneymuxw and Tsawwassen First Nations;
- & in Alberta, an AIP was signed with the Blood Tribe;
- & in Saskatchewan, an AIP was initialled with the Federation of Saskatchewan Indian Nations;
- & in Quebec, the Mamuitun AIP was initialled and a framework agreement was signed with the Inuit of Nunavik; and,
- & in the Atlantic, a final agreement was initialled with the Labrador Inuit Association.

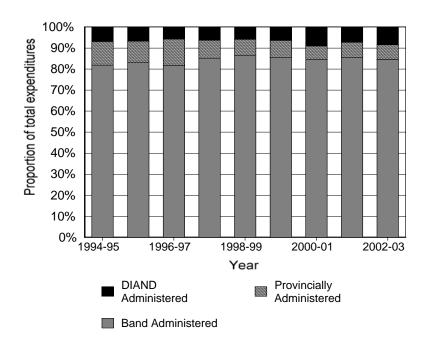

Completed Agreements

- & In 1984, self-government legislation was enacted on behalf of the Cree and Naskapi bands of Quebec and, in 1986, on behalf of the Sechelt Band of British Columbia.
- & In September 1998, the Mi'kmaq Education Act was enacted.
- & Self-government legislation has also been enacted on behalf of the following Yukon First Nations: Vuntut Gwitchin, Nacho Nyak Dun, Champagne and Aishihik, Teslin Tlingit, Little Salmon/Carmacks, Selkirk, Tr'on dëk Hwëch'in and Ta'an Kwach'an in conjunction with their comprehensive claims. Ancillary agreements for the transfer of certain programs and services have also been reached with several of these groups.
- & Canada gave Royal Assent to the *Nisga'a Final Agreement Act* in April 2000 and the Treaty came into effect on May 11, 2000. The Nisga'a Agreement represents the first modern-day treaty to explicitly extend section 35 (*Constitution Act, 1982*) protection to both land and self-government rights.
- & Canada also gave Royal Assent to the Kanesatake Interim Land Base Governance Act in June 2001.

Source: 2003 Self-Government Policy Directorate, INAC.

6.2 Devolution

Figure 6.2 Profile of Administrators of Expenditures, INAC, 1994-1995 to 2002-2003

Highlight

& In 2002-2003, Registered Indians and Inuit administered 85% of INAC's Indian and Inuit Affairs Program expenditures through band councils, tribal councils, or other First Nation organizations.

Note: Total IIAP Expenditures as reported above (\$4,972,271,317) does not include bad debt allowances of \$29,156,735 and \$641,638. These three amounts account for the total recorded in the Public Accounts of Canada (\$5,002,069,690).

SECTION 7 THE NORTH

7.1 Population in the North

Figure 7.1 Population^{1,2,3}, Yukon, Northwest Territories and Highlight Nunavut, 1998 to 2006

& According to these estimates, the population for Nunavut will continue to rise. Between 1998 and 2006, the Nunavut population is expected to increase by 16%. Meanwhile, the Yukon population is expected to decrease by 2% over the same period.

Notes:

- 1. Estimates and Projections are as of July 1st for each particular year.
- This is an update of one of the projection series published by the Population Projections Section, Demography Division, Statistics Canada.
- 3. Data for the Northwest Territories and Nunavut are based on the 1999 boundaries.

7.2 Aboriginal Ancestry Population in the North

Figure 7.2 Total population in the North (Northwest Territories and Yukon) showing percentage of Aboriginal and Non-Aboriginal people, 1971, 1981, 1986, 1991, and 1996

Highlights

- & As a percentage of the total population, the Aboriginal population of Yukon increased from 14% in 1971 to 21% in 1996
- The proportion of
 Aboriginal people in the
 Northwest Territories
 over the same period
 also increased
 substantially, rising from
 53% in 1971 to 62% in
 1996
- & In 1996, the Ethnic Composition in the North can be compared across three territories. The percentage of Yukon's population who are Aboriginal is 21%, compared to 48% in the Northwest Territories and 85% in Nunavut.
- & 75% of Nunavut's Aboriginal population is Inuit.

Notes: 1. These numbers represent a comparable count to previous census years and are based on Aboriginal Ancestry only, question #17 in the 1996 Census.

- 2. Data for Northwest Territories and Nunavut are based on the 1999 boundaries.
- 3. NAI refers to North American Indian.

Data for Northwest Territories and Nunavut are based on the 1999 boundaries.

7.5 INAC Expenditures in the North

Figure 7.5 Components of INAC Expenditures in the North, **Highlights** 1991-1992 to 1998-1999.

& For the period 1991-1992 to 1994-1995 inclusive, transfers to the territorial governments from INAC increased in every fiscal

year.

& The decline in INAC Total Expenditures observed in 1995-1996 is due to the transferred responsibility of the Formula Funding Grants to the Department of Finance.

Notes:

- 1. Total Transfers to Territorial Governments = Formula Transfers + Other Transfers
- Total INAC Expenditure (Current dollars) = Transfers to Yukon + Transfers to Northwest Territories + Direct Expenditures.
- Constant dollar series is obtained by deflating total INAC expenditures by Statistics Canada's Consumer Price Index
 for gross domestic product at market prices, 1992=100. The deflator for each fiscal year was calculated by taking the
 mean of the indices in the four quarters of April 1 to March 31.

North Generally	29,337	33,108	53,217	49,416	45,896	62,522	68,385	38,450	
TOTAL EXPENDITURES	124,221	140,176	297,750	257,692	284,940	329,578	403,443	413,879	
Total Transfers to Territorial	Government	ts ¹							
Yukon	239,501	265,018	277,300	297,940	2,767	1,020	-	-	
Northwest Territories	842,789	874,943	824,141	956,423	40,668	37,004	-	-	
Direct Expenditures	124,221	140,176	297,750	257,692	284,940	329,578	403,443	413,879	
Total Expenditures (Current dollars) ²	1,206,511	1,280,137	1,399,191	1,512,055	328,375	367,602	403,443	413,879	
Total Expenditures (Constant 1992 dollars) ³	1,219,314	1,275,672	1,378,513	1,468,726	315,139	347,122	374,947	381,104	

Highlight

& The INAC northern expenditures have increased significantly over the last decade. A major factor in this increase has been the implementation of the Tungavik Federation of Nunavut Land Claim beginning in 1993-1994. By 1997-1998 and 1998-99, the Tungavik Federation of Nunavut Land Claim accounted for approximately one quarter of all INAC's northern expenditures, \$103.3 million and \$104.8 million respectively.

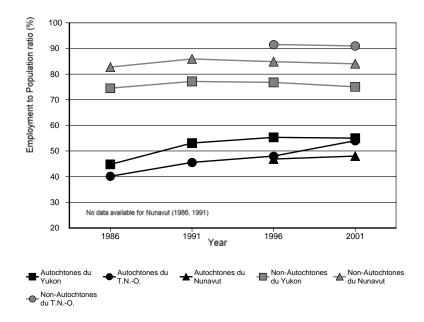

Notes:

- 1. Total Transfers to Territorial Governments = Formula Transfers + Other Transfers
- 2. Total INAC Expenditure (Current dollars) = Transfers to Yukon + Transfers to Northwest Territories + Direct Expenditures.
- Constant dollar series is obtained by deflating total INAC expenditures by Statistics Canada's Consumer Price Index
 for gross domestic product at market prices, 1992=100. The deflator for each fiscal year was calculated by taking the
 mean of the indices in the four quarters of April 1 to March 31.

7.6 Employment in the North

Figure 7.6 Employment/Population Ratios for Aboriginal¹ and Non-Aboriginal people 15 years of age and over, Yukon and Northwest Territories (including Nunavut), 1986,1991, 1996 and 2001

Highlights

- & Since 1986, the percentage of employed Aboriginals aged 15 and over has increased in NWT and Nunavut.
- Mowever, the Aboriginal employment/ population ratios across the North are lower than among the non-Aboriginal population.

Note: 1. The definition of Aboriginal has changed across census years affecting comparability over time. Please see the Census Aboriginal definitions in the glossary for an explanation of this.

Sources: 1986, 1991, 1996 and 2001 (Table 11) Census of Population, INAC Core Tabulations.

7.6 Employment in the North (continued)

Table 7.6 Selected Employment Characteristics for Aboriginal and Non-Aboriginal people, 15 years of age and over, Yukon and Northwest Territories, 1986, 1991, 1996 and 2001 and Nunavut and Northwest Territories, 1996 and 2001

	Aboriginal	Non- Aboriginal	Aboriginal	Non- Aboriginal	Aboriginal	Non- Aboriginal	Aboriginal	Non- Aboriginal
YUKON								
Population 15+	3,395	14,095	4,330	16,525	4,710	18,560	5,225	17,255
Employed	1,520	10,495	2,300	12,740	2,605	14,240	2,885	12,975
Employment/Population Ratio	44.8	74.5	53.1	77.1	55.3	76.7	55.0	75.0
NORTHWEST TERRITORIES								
Population 15+	18,675	16,255	21,390	17,165	24,435	18,710	-	
Employed	7,505	13,445	9,740	14,740	11,725	15,870	-	
Employment/Population Ratio	40.2	82.7	45.5	85.9	48.0	84.8	-	
NORTHWEST TERRITORIES (1	999 Bounda	aries)						
Population 15+	-	-	-	-	12,220	15,480	12,960	13,985
Employed	-	-	-	-	6,000	12,920	7,045	11,760
Employment/Population Ratio	-	-	-	-	49.1	83.5	54.0	84.0
NUNAVUT (1999 Boundaries)								
Population 15+	-	-	-	-	12,215	3,225	13,470	3,215
Employed	-	-	-	-	5,725	2,950	6,455	2,925
Employment/Population Ratio	-	-	-	-	46.9	91.5	48.0	91.0

Highlights

- & In the Northwest Territories, the employment-to-population ratio within the Aboriginal population has increased over each five-year period from 1986 to 2001, reaching 54% in 2001. This growth in employment surpasses that found within the non-Aboriginal population.
- & In Yukon, employment growth among Aboriginal persons has exceeded the growth in employment of non-Aboriginal persons.
- & Since its establishment, the difference in employment-to-population ratio between Aboriginal and non-Aboriginal persons has been wider in Nunavut than in either Yukon or Northwest Territories.

Note: 1. The definition of Aboriginal has changed across census years affecting comparability over time. Please see the Census Aboriginal definitions in the glossary for an explanation of this.

SECTION 8 ADDITIONAL TOPICS

8.1 Lands

Figure 8.1 Land Administered by INAC,1994-1995 to 2002-2003

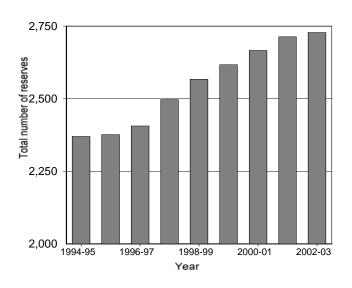

Table 8.1 Land Administered by INAC, 1993-1994 to 2002-2003

Fiscal Year	Number of Reserves	Amount of land (hectares)	Number of bands
1993-94	2,370	2,750,957.0	605
1994-95	2,370	2,750,957.0	607
1995-96	2,376	2,751,603.0	608
1996-97	2,406	2,751,342.0	608
1997-98	2,497	3,044,088.1	608
1998-99	2,567	2,945,110.2	609
1999-00	2,617	2,995,490.4	610
2000-01	2,666	3,035,870.6	612
2001-02	2,713	3,102,772.6	612
2002-03	2,728	3,109,148.8	614

Sources: Indian Lands Registry System, INAC. 2002 Indian Register, INAC.

Highlights

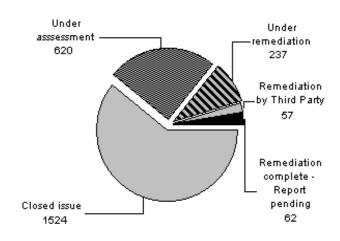

- & INAC-administered land transactions for 2,728 reserves in fiscal year 2002-2003, to a total of approximately 3.1-million hectares of land
- & The volume and complexity of land transactions are increasing as economic development is promoted by First Nations, corporations and individuals.

8.2 Environment

Highlights

Figure 8.2 National Contaminated Sites Status

- & INAC's Contaminated Sites Management Policy was approved in August 2002, and encompasses the identification, assessment, remediation and/or risk management and monitoring of such sites.
- & The New Contaminated Sites Management Program has been designed to enable INAC to implement this policy. The program will assist INAC in identifying and remediating contaminated sites to continue work identified to address legal liabilities.
- & Of the 2,500 contaminated issues currently listed as of January 8, 2004, 1,524 have been remediated and closed. The remaining 976 issues are continuing to be addressed through INAC's Contaminated Sites Management Plan through the Long Term Capital Plan.

Highlights

- & The Government of Canada and the courts understand treaties between the Crown and Aboriginal peoples to be solemn agreements that set out promises, obligations and benefits for both parties.
- & Under the Robinson Superior (1850) and Robinson-Huron (1850) Treaties, the Crown secured an area of about 84,000 square kilometres in what is today central and northern Ontario.
- & Other historic treaties include the Beaver Hunting Grounds Treaty (1701) and Treaty of Swegatchy (1760).

Note: See glossary for explanations of Peace and Friendship Treaties, Douglas Treaties, and Williams Treaties.

Sources: Treaty Research Reports, Treaties and Historical Research Centre, INAC. Treaty Files/Band Histories, Claims and Historical Research Centre, INAC.

8.4 Comprehensive Claims

Highlights

- & Comprehensive land claim agreements are modern treaties which resolve issues of Aboriginal rights and title, and provide certainty regarding ownership, use and management of lands and resources. Comprehensive Land Claim Agreement can also include Aboriginal self-government arrangements. Sixteen final agreements have been brought into effect since the Comprehensive Land Claims Policy of the Government of Canada was introduced in 1973.
- & The Comprehensive Claims Branch (CCB) is responsible for the negotiation of comprehensive land claims, including self-government arrangements, with Aboriginal groups in various regions of Canada. CCB currently manages 25 comprehensive land claims and related processes involving approximately 100 Aboriginal communities, in eight provinces and three territories. Seven tables are at the final agreement stage; 12 are in agreement-in-principle negotiations; and six remain in the early stages of discussion. During fiscal year 2003-2004 a number of Final Agreements were negotiated and are proceeding to ratification:
 - In Yukon, final comprehensive land claim agreements and separate self-government agreements were concluded with the Kluane, Carcross/Tagish and Kwanlin Dun First Nations. The Kluane agreements came into effect on February 2, 2004, while the Carcross/Tagish and Kwanlin Dun agreements are proceeding towards community ratification.
 - In the Northwest Territories (NWT), a final comprehensive claims and self-government agreement was ratified by the Tlicho in June 2003. It is the first treaty in the NWT to incorporate land claims and constitutionally protected self-government provisions. Federal ratification / legislation is currently being prepared.
 - In Newfoundland and Labrador, a final comprehensive claims and self-government agreement with the Labrador Inuit Association was initiated in August 2003. The communities are expected to proceed with a ratification vote in the summer of 2004.
- The Federal Treaty Negotiation Office (FTNO) in Vancouver is responsible for managing Canada's participation in the British Columbia treaty process. There are currently 53 accepted claims. Negotiations are proceeding at 42 tables involving 124 First Nation communities. During the 2003-2004 fiscal year, agreements-in-principle (AIPs) were signed with the Lheidli T'enneh, Maa-nulth, Sliammon and Tsawwassen First Nations. These tables have commenced final agreement negotiations. The Snuneymuxw First Nation also reached AIP agreement and is expected to hold its community ratification in the winter of 2004.

Source: 2003-2004, Comprehensive Claims, INAC.

8.5 Specific Claims

Highlights

- & During the fiscal year 2002-2003, the Specific Claims Branch settled 18 specific claims with a total settlement value of \$195 million. Since the inception of the program and up to March 2003, the Branch has settled 251 specific and treaty land entitlement claims.
- & As of March 31, 2003, 115 specific claims were under negotiation, with a further 535 under assessment, and 29 at the Indian Specific Claims Commission (ISCC).

Source: 2002-2003 Specific Claims, INAC.

8.6 Community Economic Development Organizations (CEDOs)

Highlight

& Community Economic Development Organizations (CEDOs) are managed by, and accountable to, First Nations communities. They assume responsibility for the delivery of programs and services previously provided by the department. INAC regional offices work in partnership with CEDOs to establish First Nation control over local program priorities. expenditures, design, delivery and advisory services.

Glossary

Aboriginal Census Definitions: The 1996 Census introduced several changes to the questions pertaining to the Aboriginal population asked in the 1991 Census. The changes have allowed for multiple definitions of the Aboriginal population, each with different population counts. Users of census data should understand the differences in definitions between census years, which in turn affect the comparability of the Total Aboriginal, Inuit, Métis, and North American Indian populations across censuses.

The difference in counts arises in 1996 with the inclusion of a new question concerning Aboriginal Identity (Q18), in addition to the Ethnic Origin (Q17), Band Membership (Q20) and Registered Indian (Q21) questions asked in 1991. 1996 Identity based data cannot be compared directly with the ancestry/origin based data from previous censuses.¹

Prior to 1996, counts of Aboriginal persons were derived primarily from a question that asked respondents about their ancestry. In 1986 and 1991, respondents were to indicate if they were either North American Indian (NAI), Métis or Inuit/Eskimo. In 1981, respondents with Aboriginal origins were to indicate the origins of status or registered Indian, non-status Indian, Métis or Inuit. In 1971, the respondent's paternal ancestry was to be reported, if multiple ethnic origins were reported only one origin was captured, resulting in one ethnic origin per respondent.¹

In both the 1991 and 1996 Censuses, respondents were asked: "To which ethnic or cultural group(s) did this person's ancestors belong?". In 1991, 15 of the most frequent origins were listed and respondents were asked to mark as many as were applicable. In addition, two blank spaces were provided for other responses, and several other origins were provided as examples. In 1996, the questionnaire did not provide a list of answer categories, and instead provided four blank spaces for respondents to write in their origins. Examples of origins were provided as illustrations, and for the first time, "Canadian" was included among the examples. These modifications, in particular the inclusion of "Canadian" resulted in a major change in the way ethnic origins were reported. The number of "Canadian" responses was high, suggesting that respondents who had previously considered themselves of alternative ancestry were choosing Canadian origin in 1996^{1.} This may have had an impact on the pattern of responses for Aboriginal origins.

As explained above, the 1996 Census includes a new lens to view the Aboriginal population. This lens is "identity", measured by responses to the question, "Is this person an Aboriginal person, that is, North American Indian, Métis or Inuit (Eskimo)?"(Q18). North American Indian (NAI), Métis, and Inuit were the printed choices given, with the instruction to mark the circle(s) that best apply. From this question population counts were obtained for NAI only, Métis only, and Inuit only, as well as those who claimed multiple Aboriginal identities.

Unless noted (1), this information was taken from the INAC Census publication entitled: *Aboriginal Labour Force Characteristics from the 1996 Census*, the other source consulted was (1) Statistics Canada, *The Daily, January 13, 1999*, Catalogue no. 11-001E.

Basic Departmental Data 2003 CIMD, IMB March 2004 QS-3625-030-EE-A1 109

Adults in Institutional Care: INAC provides funding for care in Type I and II institutions which may be located on a reserve or operated by the province. Individuals are assessed according to provincial standards to determine the level of care required. Residents of institutions are generally elderly and disabled persons in need of supervision and assistance. Type I: "...required by a person who is ambulant and/or independently mobile, who has decreased physical and/or mental faculties, who requires primarily supervision and/or assistance with activities of daily living and provision for meeting psycho-social needs through social and recreational services. The period of time during which care is required is indeterminate and related to the individual condition";

Type II:"...required by a person with a relatively stabilized (physical or mental) chronic disease or functional disability, who, having reached the apparent limit of his recovery, is not likely to change in the near future, who has relatively little need for the diagnostic and therapeutic services of a hospital but who requires availability of personal care on a continuing 24-hour basis, with medical and professional nursing supervision and provision for meeting psycho-social needs. The period of time during which care is required is unpredictable but usually consists of a matter of months or years".

(Source: Adult Long Term Institutional Care, Report of the Sub-Committee on Special Services in Hospitals, 1984).

Average Annual Growth Rate: The formula used to calculate average annual growth rates was: AAGR = (X1 / X0) 1/n - 1 where: X1 = data for the most recent year in period X0 = data for the earliest year in period n = length of period (years).

Bill C-31: "Passed by Parliament in June 1985, Bill C-31 contained important amendments to the *Indian Act*. It had three principal goals: to eliminate discrimination based on gender and marital status in the *Indian Act*, to restore Indian status to victims of past discrimination; and to enable Indian bands to assume control over their membership. As a result of Bill C-31, the *Indian Act* now essentially treats men and women equally when determining status, and prevents anyone from gaining or losing status through marriage" (Source: Lands, Revenues and Trust Review, Phase II Report INAC).

Children in Care: The number of children who were placed away from parental care to protect them from neglect and/or abuse, or to prevent neglect and/or abuse either in foster care, group homes or institutional care.

Devolution: Refers to the transfer of services and programs from INAC control to Indian bands, tribal councils and other Indian authorities.

Dwellings: Defined as self-contained living accommodations (with at least one separate bedroom), and considered to be a main residence, irrespective of occupancy, level of completeness, or need for renovation or replacement.

Geographic Zones:

Urban: A zone where a First Nation is located within 50 km from the nearest service centre having year-round road access.

Rural: A zone where a First Nation is located between 50 km and 350 km from the nearest service centre having year-round road access.

Remote: A zone where a First Nation is located over 350 km from the nearest service centre having year-round road access.

Special Access: A zone where a First Nation has no year-round road access to the nearest service centre and, as a result, experiences a higher cost of transportation.

Service Centre: A community where the following services are available:

- a) supplies, material and equipment (ie. for construction, office operations, etc.);
- b) a pool of skilled or semi-skilled labour;
- c) at least one financial institution, bank, trust company, credit union, etc.;
- d) provincial services (such as health services, community and health services, environment services); and
- e) Federal services (such as Canada Post, employment centre).

Indian Lands Registry System (ILRS): The Indian Lands Registry System (ILRS) is a web-based application consisting of a database of instruments registered in the Indian Lands Registry relating to Reserve Lands and Crown Lands. The ILRS is the authoritative source for reserve names.

The First Nation Land Management Act allows First Nations to opt out of the land tenure provisions of the Indian Act, and in its place, to substitute their own land management codes to manage reserve lands and resources. This Act states that a First Nation Land Register shall be established. A First Nation Land Register System will be available early in the year 2003.

Indian Register: "The Indian Register is a list of Registered Indians (as defined in the *Indian Act*) kept by INAC. Information on this list concerning the demographic characteristics of the Indian population is updated regularly by band officials and published for December 31 of each year".

Life Expectancy: "Is an estimation of the average number of years of life remaining to each member of a group of persons. It is calculated on the basis of observed age-specific mortality rates at any particular moment in time, assuming that the risks of dying remain constant from the moment of estimation until the death of all members of the group" (Source: Wilkins, Russell, Health Status in Canada, 1926-1976, Institute for Research on Public Policy, May 1980).

Reserves: As defined in the *Indian Act*, a tract of land, the legal title to which is vested in Her Majesty that has been set apart by Her Majesty for the use and benefit of a band.

Self-Government: Pursuant to Canada's Inherent Right Policy, the Self-Government Branch manages the negotiation of practical and workable self-government arrangements with Aboriginal groups and with relevant provinces or territories in areas affecting their jurisdiction and interests. The branch is also responsible for policy development and the coordination of activities that support negotiations, strengthen Aboriginal governance and develop new fiscal relationships with Aboriginal governments.

Sewage Disposal System: Includes the presence of lift stations, septic systems, force mains, sewage collection mains, manholes, service connections, treatment plants, lagoons and outfall sewers, and appurtenances, but excludes plumbing and fixtures.

Sewage Disposal System Adequacy: Refers to the presence of one of the following types of sewage disposal systems: Piped, Community Septic Field/Tank, Individual Septic Field/Tank, Septic Truck and Other. Adequate Sewage Disposal System includes the presence of lift stations, septic systems, force mains, sewage collection mains, manholes, service connections, treatment plants, lagoons and outfall sewers and appurtenances, but excludes plumbing and fixtures.

Social Assistance: The Department of Indian Affairs and Northern Development (INAC) Social Assistance Program is one component of the departmental Social Development Program.

INAC has engaged in on-reserve social assistance activities with the broad objective of providing individuals and families with the means to meet basic needs for food, clothing and shelter. INAC also funds special needs allowances for goods and services which

are essential to the physical or social well-being of an eligible recipient but are not included as items of basic need, such as basic items of furniture and cost of a physician recommended diet. The department's present involvement in social assistance activities is primarily to provide funding to First Nations who in turn deliver programs and services to community members.

INAC must adopt the terms and conditions of provincial and territorial general assistance programs. While INAC may directly deliver the social assistance program, the program has been largely devolved. In 2000-2001, 538 First Nations administered their own program (This figure does not include First Nations functioning under self-government arrangements).

Social Assistance Recipients: Are defined as a combination of the number of families (heads of household) and single individuals who are eligible to receive social assistance funding.

Social Assistance Beneficiaries: Are defined as a combination of the number of persons in a family and single individuals.

Specific Claim: The Specific Claims Branch is responsible for the assessment, negotiation and settlement, or other form of final disposition, of Indian claims against Canada, which are submitted to the government under this program.

Treaties: The Peace and Friendship Treaties of 1725-79 involve 34 Mi'kmaq and Maliseet First Nations in Nova Scotia, New Brunswick, Prince Edward Island and the Gaspé region of

Québec. The Peace and Friendship Treaties did not require the Mi'kmaq and Maliseet signatories to surrender any rights to land or resources.

From 1850-54, Governor James Douglas entered into treaties with 14 First Nations on Vancouver Island, creating the Douglas Treaties, sometimes called the Vancouver Island Treaties.

In 1923, the Government of Canada acquired about 5.2 million hectares of land in central and southern Ontario through two Williams Treaties. The first was made on October 31, 1923 with the Chippewa of Christian Island, Georgian Island, and Rama. The second on November 15, 1923 with the Mississauga of Rice Lake, Mud Lake, Scugog Lake, and Alderville.

Water Delivery System: Refers to the water delivery system (i.e., piped, well, trucked, other) received by a housing unit.

Water Delivery Service Adequacy: Refers to the presence of one of the following types of water delivery systems: Piped, Community Well, Individual Well, Truck A, Truck B and Other. Note: Although Adequate Water Delivery includes Truck B water delivery (truck to barrel), the houses have not been plumbed to accept the services (i.e., cistern and pressurized system) and can be considered inadequate.
