Note: Evidence shows that most people infected with WN virus have mild symptoms or no symptoms at all.

Nota : Des preuves montrent que la plupart des personnes infectées par le virus du Nil occidental ont très peu de symptômes, ou aucun symptôme.

¹Some provinces/territories provide case totals without further breakdown into WNNS or WN Non-NS. Total clinical cases is the sum of WNNS + WN Non-NS + Unclassified/Unspecified.

¹Certaines provinces ou certains territoires ne fournissent qu'un total des cas sans décomposition plus poussée en SNVNO ou SNNVNO. Le total des cas cliniques est la somme des SNVNO, des SNNVNO et des cas non classifiés/non précisés.

²Further information on clinical signs and symptoms is required to classify these laboratory positive cases.

²Il faudra un complément d'information sur les signes cliniques et les symptômes afin de classer les cas désignés positifs en laboratoire.

³Likely related to travel outside the Province or Territory

³Probablement relié aux voyages à l'extérieur de la province ou du territoire.
