

Migratory Birds Hunting Regulations, 2005

Watch for this loon on blue signs marking National Wildlife Areas and Migratory Bird Sanctuaries.

Summary

The information presented here is a summary of the law. For complete information on fines, general prohibitions, permitted hunting methods and equipment, the need to retrieve birds, restrictions on using bait, description of hunting areas, and other restrictions on hunting, contact:

Wildlife Enforcement Coordinator
Environment Canada
5204 50th Avenue, Suite 301
Yellowknife, NT X1A 1E2

Check your permit and territorial regulations for additional restrictions.

Non-toxic shot must be used to hunt migratory birds in **all** areas of Canada. Within National Wildlife Areas, the possession of lead shot is prohibited for all hunting, including the hunting of migratory birds and upland game birds. Hunters should consult provincial or territorial regulations for additional restrictions.

For those birds still hunted with lead shot, remove the lead shot before cooking whenever possible in order to reduce your exposure to contaminants. As well, remove the skin and fat from fish-eating birds before cooking them.

Canadians may be exposed to the West Nile virus when bird-watching, hunting, or handling migratory birds and other wild game. Environment Canada recommends that you consult the following Web site, maintained by Health Canada, for information about minimizing the risk of exposure: www.hc-sc.gc.ca/english/westnile/animals.html.
