Crocodylus novaeguineae

↳ Spp. CR-1, 2, **1**, **8** or **9** if necessary/ au besoin/ si es necesario

Crocodylus novaeguineae novaeguineae is found in the island of New Guinea, while *Crocodylus novaeguineae mindorensis* is restricted to the Philippines and is often considered as a separate species.

Crocodylus novaeguineae novaeguineae est retrouvé sur l'île de Nouvelle Guinée alors que *Crocodylus novaeguineae mindorensis*, souvent considéré comme une espèce à part, ne se retrouve qu'aux Philippines.

Crocodylus novaeguineae novaeguineae se encontrar en la isla de Nueva Guinea, mientras que *Crocodylus novaeguineae mindorensis* encuentra en las Filipinas y por lo general se lo considera como una especie aparte.

Crocodylus n. novaeguineae 6 to/à/a 9, (8)
Crocodylus n. mindorensis 8 to/à/a 10, (10)

D separated from Nu
 D séparées des Nu
 D separadas de las Nu

2 ridges on snout
 2 crêtes sur le museau
 2 aristas sobre el hocico

18 to/à/a 20 D.C.W.

snout 1.6 to 2.3
 museau 1.6 à 2.3
 hocico 1.6 a 2.3

no osteoderms on V and no surface pitting
 pas d'ostéodermes sur les V et pas de dépressions en surface
 no osteodermos sobre los V y no huequitos sobre las escamas

C. n. novaeguineae has only scattered scales between P.O. and Nu, while *C. n. mindorensis* has 2 rows of additional scales between P.O. and Nu.

C. n. novaeguineae n'a que des écailles éparées entre les P.O. et les Nu, alors que *C. n. mindorensis* a 2 rangées d'écailles additionnelles entre les P.O. et les Nu.

C. n. novaeguineae sólo tiene escamas esparcidas entre los P.O. y los Nu, mientras que *C. n. mindorensis* tiene dos filas de escamas adicionales entre los P.O. y los Nu

4 Nu with 2 small scales laterally
 4 Nu avec 2 petites écailles latérales
 4 Nu con 2 pequeñas escamas laterales

P.O. 4 to 6, on top of the head only
 P.O. 4 à 6, uniquement sur le dessus de la tête
 P.O. 4 a 6, en lo alto de la cabeza solamente

wrinkled eyelid
 paupière plissée
 párpado con pliegues

iris greenish
 iris verdâtre
 iris verdoso
