12 → 14

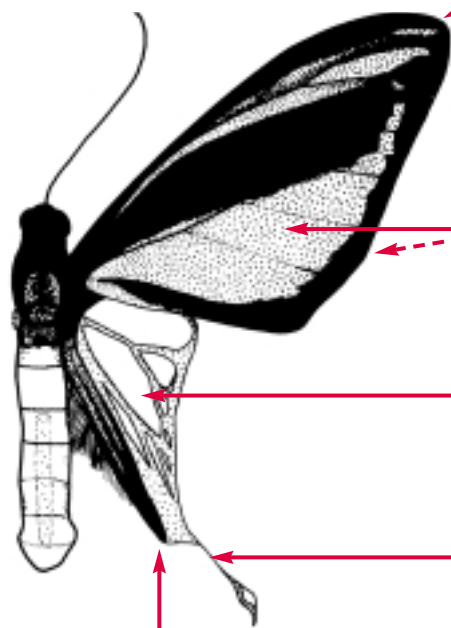

Ornithoptera meridionalis - male/mâle/macho

Spp. O-16, O-17 **3**

WS 8.0 - 11.6 cm
FWL 5.8 - 6.8 cm

iridescent green with golden yellow tinge
vert iridescent avec teinte dorée
verde iridiscente con un matiz dorado amarillento

4-8 golden yellow areas
4-8 zones dorées
4-8 zonas doradas amarillentas

thread-like tail with spatulate tip
queue filiforme à l'extrémité spatulée
cola filiforme con punta espatulada

anal notch absent
sans encoche anale
sin muesca anal

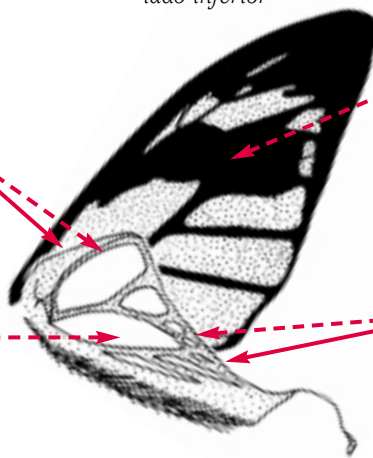

ORNITHOPTERA

underside
dessous
lado inferior

yellowish-green veins
nervures vert jaunâtre
nervios verdes amarillentos

wide, black band
large bande noire
franja negra ancha

4-8 golden yellow areas
4-8 zones dorées
4-8 zonas doradas amarillentos

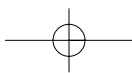

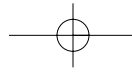

HW: wing margin greatly reduced, concave;
black Sd spots absent

HW : la marge de l'aile concave, de taille très réduite;
sans taches Sd noires

*HW: margen de la ala muy reducida y encorvada;
sin manchas Sd negras*

Similar species / Espèces semblables / Especies semejantes : *Ornithoptera paradisea* **15**

Ornithoptera paradisea - female/femelle/hembra

Spp. O-18 → O-24 **3**

WS 11.0 - 17.0 cm
FWL 7.7 - 11.0 cm

ORNITHOPTERA

white to greyish
blanc à grisâtre
blanca a grisácea

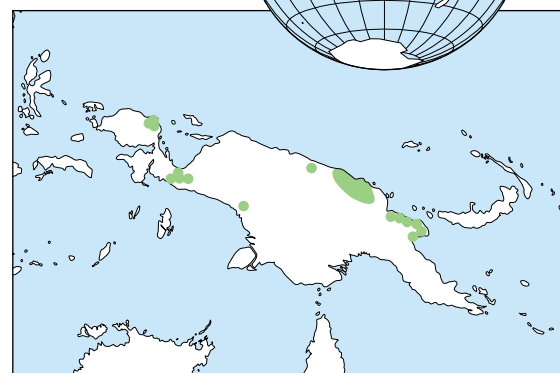

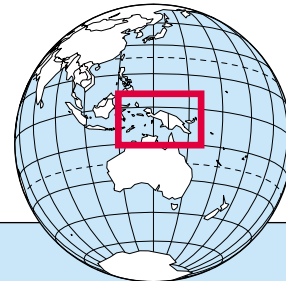

dark brown to black
brun foncé à noir
café oscura a negra

sometimes with white C spot
parfois avec une tache C blanche
a veces con una mancha C blanca

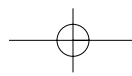

black spots: 0-1 Sc, 4-5 Sd, 1 A
taches noires : 0-1 Sc, 4-5 Sd, 1 A
manchas negras: 0-1 Sc, 4-5 Sd, 1 A

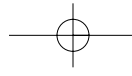

anal region distinctly elongated
la région anale distinctement allongée
la región anal distintamente alargada

greyish-yellow to yellow, with black scales
jaune grisâtre à jaune, avec écailles noires
amarilla grisácea a amarilla, con escamas negras

Similar species / Espèces semblables / Especies semejantes : *Ornithoptera chimaera* **6** , *O. meridionalis* **12** , *O. rothschildi* **18** , *O. tithonus* **20**

Ornithoptera paradisea - male/mâle/macho

Ssp. O-18 → O-24 **3**

WS 9.5 - 13.0 cm
FWL 6.0 - 8.3 cm

iridescent green
with golden yellow
vert iridescent avec teinte dorée
verde iridiscente con un matiz
dorado amarillento

4-7 golden yellow areas
4-7 zones dorées
4-7 zonas doradas amarillentas

simple to complex dorsal
black pattern
 dessin dorsal noir plus
ou moins élaboré
dibujo dorsal negro más
o menos elaborado

tapered tail
queue effilée
cola afilada

anal notch
encoche anale
muesca anal

ORNITHOPTERA

yellowish-green veins
nervures verte jaunâtre
nervios verdes amarillentos

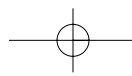

iridescent golden green
vert doré iridescent
verde dorada iridiscente

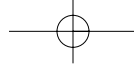

underside
dessous
lado inferior

HW: approximately triangular; wing margin
slightly reduced; black Sd spots absent

HW : à peu près triangulaire; la marge de l'aile de
taille légèrement réduite; pas de taches Sd noires
HW: aproximadamente triangular; margen de la ala
un poco reducido; sin manchas Sd negras

Similar species / Espèces semblables / Especies semejantes : *Ornithoptera meridionalis* **13**

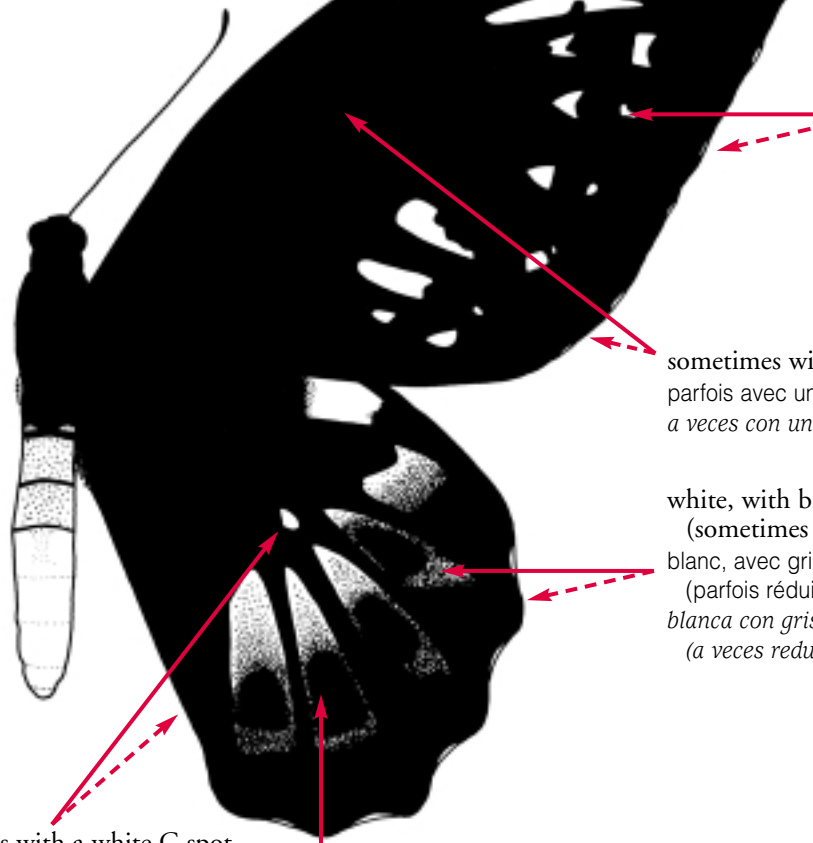

Ornithoptera priamus - female/femelle/hembra

ORNITHOPTERA

 L Spp. O-25 → O-41 **4**

WS 11.0 - 20.0 cm
FWL 6.0 - 11.8 cm

dark brown
brun foncé
café oscura

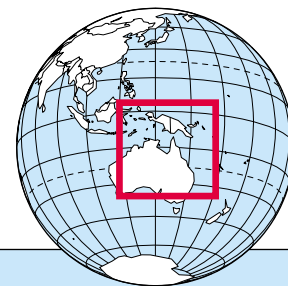

white to greyish-brown
(sometimes entirely brown)
blanc à brun grisâtre
(parfois entièrement brun)
blanca a café grisácea
(a veces completamente café)

sometimes with a white C spot
parfois avec une tache C blanche
a veces con una mancha C blanca

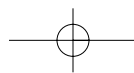

white, with brownish-grey or yellow
(sometimes reduced)
blanc, avec gris brunâtre ou jaune
(parfois réduites)
blanca con gris acastañada o amarilla
(a veces reducidas)

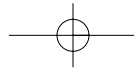

sometimes with a white C spot
parfois avec une tache C blanche
a veces con una mancha C blanca

black spots: 0-1 Sc, 4-5 Sd, 0-1 A
taches noires : 0-1 Sc, 4-5 Sd, 0-1 A
manchas negras: 0-1 Sc, 4-5 Sd, 0-1 A
