

Appendix 1 - Valid OBS Circulars

The purpose of this Appendix is to hold copies of valid OBS circulars. OBS circulars have been issued primarily:

- a) to provide instructions concerning new or revised observing procedures and or new equipment, and
- b) to provide temporary or interim instructions

OBS circulars are normally cancelled by including their subject material in a subsequent amendment to MANOBS. This page will be updated every time a new OBS circular is issued. OBS circulars other than these listed below should not be held in this manual

List of Valid OBS Circulars

Procedures for Observing, Reporting and Recording Freezing Fog and Fog	OBS 2-99
Atmospheric Pressure Observing Practices and Procedures for using a Digital Barometer	OBS 1-00
Procedures for the Use, Maintenance and Procurement of the Weaver Snow Board	OBS 1-2001
Correction to the French MANOBS 10.4.2.4	OBS 4-2003
Additional Special Observation Criteria at Designated Aerodromes	OBS 1-2004
Procedures for Observing, Reporting and Recording Special Temperature Observations (SPECIs) due to Significant Temperature Changes	OBS 1-2005

The present list of valid OBS circulars comprises circulars which have been issued more for specific users than for general purposes. Thus, if you do not have one or more of the circulars listed above and are not sure if you need it or not, check with your Regional office for advice before requesting a copy.
