

# A World of Solutions Daily

Part I Exhibition is open today from 10:00 a.m. to 8:00 p.m.

Friday, December 2

## □ Today in the Conference Centre

- Climate change technology innovations include big advancements in the capture and storage of carbon dioxide. A day-long look from Canada's experts at Canadian and international opportunities, risk assessment, public attitudes on carbon storage, clean coal and the international view. An agenda for the **Carbon Capture and Storage Forum** is available at: [www.montreal2005.gc.ca](http://www.montreal2005.gc.ca)
- Adapting to climate change requires action for the present and planning for the future. The safety of the food supply, adequate water, rising sea levels and the impact of a changing climate on homes, buildings, roads...the story is different from one country to the next and from one climate zone to the next. **Living with Climate Change: Sharing Adaptation Experiences** is a full day conference with four panel sessions, and discussions that provide examples of sector-specific adaptation and sharing of lessons-learned. Panels are on food security, water resources, coastal zones and communities/infrastructure. An agenda is available at: [www.c-ciarn.ca/index\\_e.asp](http://www.c-ciarn.ca/index_e.asp)

**9:30 a.m. to 7:30 p.m.**  
Salle Mousseau and Le Salon

**10:00 a.m. to 6:00 p.m.**  
Salles des Saules, Salle des Pins  
and Salles des Ormes

## □ Theme of the Day: Sustainable Cities

- Tools for sustainable cities, such as the green roofs that cool down urban heat islands, are featured at the **Canada Pavilion and Stage**. Composting and waste management are part of the activities at **Climate Village in Action**, along with a look at urban life research and more. Biodiesel buses will depart from Guy-Favreau Complex at 10:00 a.m., 11:00 a.m., 1:00 p.m. and 2:00 p.m. for visits to the TOHU building.

## □ What's Happening near by?

- Finding the renewable energy solutions to reduce greenhouse gases and the role of the Clean Development Mechanism are on the agenda during the second day of the **Renewable Solutions – An International Conference on Renewable Energy, Climate Change and CDM** at the **Holiday Inn Select**. Directives from these discussions will be delivered to COP11/MOP1 delegates at two official side events tomorrow.

## □ Culture Today

- Use your own energy! Recharge a hydrogen fuel cell and use it to move a scale model, take a virtual trip to the frozen slopes of Mount Logan in Yukon or the boreal forest to study forest fires and get involved in other "hands-on" activities to understand climate change while exploring the effects of an ever-evolving environment. It's all at the **Climate Change Interactive Museum**. The 1,000 square foot traveling exhibit opens today at **Salon des Métiers d'art – Place Bonaventure, 800 De La Gauchetière Street West**. Hours are 11:00 a.m. to 9:00 p.m. and Sundays from 11:00 a.m. to 6:00 p.m. The exhibit closes December 21. Developed by the Canadian Association of Science Centres in cooperation with Science North, Science World and Natural Resources Canada.
