

A World of Solutions Daily

Part I Exhibition is open today from 10:00 a.m. to 8:00 p.m.

Tuesday, November 29

□ Today in the Conference Centre

- Sustainable transportation is key to reducing greenhouse gas emissions in populated areas. Listen to key speakers at the **Sustainable Transport Forum** with panelists from the Canadian Urban Transit Association, the *Agence métropolitaine de transport* and others involved in the public transportation sector. Final agenda at www.montreal2005.gc.ca
- Pembina Institute has released a recent report on oil sands development and will discuss its findings and policy suggestions for post-2012 at **Climate Consequences of Canada's Oil Sands Development**.
- **At what cost? The Launch of the youth presence in Montreal:** Youth from around the world are challenging governments to start asking what climate change will cost future generations.
- **Being Caribou** is a fascinating and moving journey captured on film by environmentalist Leanne Allison and wildlife biologist Karsten Heuer as they follow a herd of 120,000 caribou on foot across 1,500 kilometres of rugged Arctic tundra. Dramatic footage shows the herd's delicate habitat and potential devastation from oil and gas development in calving grounds in Alaska's Arctic National Wildlife Refuge.
- By promoting soil conservation in agriculture there can be reductions in the greenhouse gas emissions produced through farming. Visit **Mitigating GHGs in Agriculture** to learn more.

9:30 a.m. to 12:00 p.m.
Salle des Saules

9:30 a.m. to 11:30 a.m.
Salle des Pins

1:00 p.m. to 3:00 p.m.
Salle Mousseau

6:30 p.m. to 8:00 p.m.
Salle Mousseau

8:00 a.m. to 10:00 a.m.
Salle des Ormes

□ Theme of the Day: Transportation

- Transportation is responsible for a significant portion of the greenhouse gas emissions leading to climate change – but we cannot live without it. Visit the **Canada Pavilion** where Natural Resources Canada and Transport Canada present *Sustainable Transportation, a Route Worth Traveling*. At the **Stage** the rock band **The Respectables**, spokespersons for the international **Car Free Day**, will be giving an acoustic performance at 12:00 p.m. Sherbrooke University looks at free access to transportation at 4:30 p.m. **Climate Village In Action** has a bicycle workshop, a video about the youth winners of climate change projects and more. **Special activities** include a solar house tour on board a biodiesel bus, sponsored by Concordia University, Environment Canada and Canada Mortgage and Housing Corporation (departure is 2:00 p.m.).

□ What's Happening near by?

- Clean energy is essential to addressing climate change. For those in the technical field and those assessing the viability of potential renewable energy and energy efficiency projects, Natural Resources Canada and RETScreen® International present **Assessing Clean Energy Project Opportunities**, a training session with case studies, seminars and course materials. At the **Marriott Spring Hill Suites Select**, 9:30 a.m. to 4:30 p.m.

□ Culture Today

- Understand more about the phenomena of climate change by visiting **Under the Weather**, an interactive museum exhibition at the *Espace des pas perdus* (between Place-des-Arts and Place-d'Armes metro stations). Presented until December 8.
