## FOREWORD/AVANT-PROPOS

<p>This edition of the <i>Air Traffic Designators</i> is effective Nov. 2<sup>nd</sup>, 2000 and replaces the Feb. 29<sup>th</sup> 2000 edition. It incorporates changes introduced by ICAO Document 8643/28, ICAO Document 8585/112, and corrects known errors. This edition has been expanded to include the aircraft types responsible for 99.9% of the flight movements recorded by NAV CANADA's flight data automated systems. The format has also been changed to more closely resemble the ICAO presentation. Please ensure that all Air Traffic Services personnel are advised of these changes to <i>Air Traffic Designators</i>.</p>	<p>La présente édition des <i>Indicatifs de la circulation aérienne</i> entre en vigueur le 2 novembre 2000 et remplace celle du 29 février 2000. Elle comprend les changements introduits par les documents 8643/28 et 8585/112 de l'OACI et corrige les erreurs connues. Cette édition a été augmentée pour inclure les types d'aéronefs responsables de 99,9 % des mouvements de vol enregistrés par les systèmes automatisés de données de vol de NAV CANADA. Le format a aussi été changé pour ressembler davantage à la présentation de l'OACI. Veuillez vous assurer que le personnel des Services de la circulation aérienne est au courant de ces changements aux <i>Indicatifs de la circulation aérienne</i>.</p>		
<p>The field "Description" is four alpha-numeric as follows:</p>			
<p>1<sup>st</sup> position/1<sup>er</sup> position WTC</p> <p>L - Light/légers M - Medium/moyens H - Heavy/lourds</p>	<p>2<sup>nd</sup> position/2<sup>e</sup> position number of engines/nombre de moteurs</p>	<p>3<sup>rd</sup> position/3<sup>e</sup> position Type of engine/type de moteur</p> <p>P - Piston/à piston T - Turboprop/turbopropulseur J - Jet/réaction</p>	<p>4<sup>th</sup> position/4<sup>e</sup> position Landing gear/train d'atterrissage</p> <p>F - Fixed/train fixe R - Retractable/train escamotable A - Amphibious hull/coque amphibie</p>
<p>Wake turbulence category (WTC) is provided on the basis of the maximum certificated take-off weight as follows:</p>		<p>La catégorie de turbulence de sillage (WTC) est fondée sur la masse maximale au décollage certifiée, comme suit:</p>	
<p style="text-align: right;">Light/légers Medium/moyens Heavy/lourds</p>		<p>5670 kg (12 500 lbs/livres) or less/ou moins 5671 kg to/à 136 077 kg (12 501 to/à 299 999 lbs/livres) 136 078 kg (300 000 lbs/livres) or more/ou plus</p>	
<p>The maximum take-off weights listed are for a representative model year. Individual aircraft are subject to upgrades and modifications, which may affect the MCTOW. The declared MCTOW of the operator takes precedence over any entry in this handbook, in an air traffic control situation. All take-off weights are rounded upwards to the nearest 1000 kg.</p>		<p>Les masses maximales au décollage (MCTOW) indiquées s'appliquent à l'année-modèle représentative. Les aéronefs individuels sont sujets à des améliorations et des modifications qui peuvent changer la masse maximale au décollage. La MCTOW déclarée a préséance sur une entrée quelconque dans le présent livret en situation de contrôle de la circulation aérienne. Toutes les masses au décollage sont arrondies aux 1000 kg les plus proches.</p>	
<p>The information on type of landing gear, take-off weights, number and type of engines is taken from sources believed to be reliable, but cannot be guaranteed.</p>		<p>L'information sur le type de train d'atterrissage, les masses au décollage le nombre et le type des moteurs provient de sources considérées fiables mais elle ne peut être garantie.</p>
