

Module 6.1.4.7
**SPECIFIC ACTION PLAN
HAZARDOUS MATERIALS**

HEALTH AND SAFETY ACTION PLAN FOR REPAIR AND CONSTRUCTION PROJECTS AT
THE JOHN H. CHAPMAN SPACE CENTRE

1. Use of pesticides

- No pesticides may be used without the approval of the Agency manager. These products may only be used as a last resort. The contractor's manager and the Agency's manager must draw up a plan at least three working days prior to starting the work.
- A material safety data sheet for each product used must be sent to the Agency manager prior to starting the work.

2. Public safety

- The contractor must post signs on doors giving access to the areas being treated with pesticides.
- The control room must be notified before the technician starts the work.
- Only the contractor's representative will be allowed access to the area being treated with a pesticide. **The technician must ensure no one else is present in the area before applying the pesticide.**

3. Worker training and information

All workers assigned to this work at the Agency must be told about the relevant safety rules.
