

CDSX Exchange - Product Transfer between CSB,CPB, or CIB

All tender events in which there are securities in and securities out will require both a CDSX deposit (for issued product) and a withdrawal (for cancelled product). The majority of the activity will occur on the day after the details have been entered in the event. The transfer agent will update the record of holding in bulk. Product transfer transactions can only occur in the 3 months after the issue date.
