# About NEIA

---

NEIA is a member-based organization that provides representation and support to its members on key issues including: environmental legislation, enforcement, permitting, waste management, wastewater, air emissions, remediation, business development, and trade & export market development.

---

## Environmental Industry Awards

The Environmental Industry Awards are structured to honour the achievements and contributions of companies and individuals in building the environmental industry in Newfoundland and Labrador.

### Capacity Building Award

Building and growing a company that provides environmental services and/or products presents unique challenges. This award is presented to a corporation with a proven record of building the environment sector in Newfoundland and Labrador and in improving its competitive position in local and/or international markets through a commitment to excellence and strategic growth investment.

### Environmental Performance in Newfoundland and Labrador

Environmental leadership often brings an improved bottom line and embracement by clients and the local community. This award is presented to a company that has gone beyond environmental compliance and has demonstrated a commitment to improved environmental performance.

### Individual Contribution to the Environmental Industry in Newfoundland and Labrador

To achieve success, every organization or movement needs champions to lead, provide wisdom and help turn ideals and innovation into reality. In the Newfoundland and Labrador environmental industry, these types of individual efforts have been critical to the forward development and growth of both our industry association and the environment sector in Newfoundland and Labrador. This award is presented to an individual who is, or has been, a key force in developing the environmental industry in Newfoundland and Labrador.
