

12.9 Defects Log, Turkey
(ISO Sampling Plan 2859-1)

ESTABLISHMENT:	DATE:						SHIFT:						LINE NO:					
PATHOLOGY DEFECTS	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18
TIME																		
INSPECTOR																		
SAMPLE SIZE																		
INSPECTION TYPE																		
Ascites																		
Emaciation																		
Cellulitis (NTOL)																		
Dark-Coloured Carcasses																		
Hepatitis/Hepatosi																		
Neoplasms																		
Peritonitis/Salpingitis																		
Other* (specify)																		
First Sample Total																		
Second Sample Total																		
Cumulative Total																		
Corrective Action																		

NTOL: Not Trimmable On-Line; * Avian Keratoacanthoma, Arthritis, Bruising (NTOL), Deep Pectoral Myopathy, Dermatitis (NTOL), Enteritis, Leukosis Sarcoma Group, Marek's Disease, Neoplasms, Pericarditis, Peritonitis, Pendulous Crop, Valgus Varus Deformity, Septicemia Synovitis

PROCESSING DEFECTS	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18
Faecal Contamination																		
Extraneous Material																		
Bile Contamination																		
Extensive Bruising																		
Extensive Overscald/Mutilation																		
Inadequate Bleeding																		
First Sample Total																		
Second Sample Total																		
Cumulative Total																		
Corrective Action																		

Corrective Actions: c.d. = change detector; r. = retest; a. = added defect detector; v. = verbal warning; s. = line speed reduction

Note: Shaded area is for double sampling plans only (Reduced and Tightened)
