12.11 On-line Reprocessing; Defects Log for Chicken, Turkey and Fowl (ISO Sampling Plan 2859-1)

ESTABLISHMENT:	DATE:						SHIFT:						LINE NO:					
PATHOLOGY DEFECTS	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18
TIME																		
INSPECTOR																		
SAMPLE SIZE																		
INSPECTION TYPE																		
Adenocarcinoma																		
Airsacculitis																		
Ascites																		
Emaciation																		
Dark-Coloured Carcasses																		
Hepatitis/icterus																		
Inadequate Bleeding																		
Peritonitis/Salpingitis																		
Other* (specify)																		
First Sample Total																		
Second Sample Total																		
Cumulative Total																		
Corrective Action																		

* Others (examples : Emaciation, Peri-cloacal cellulitis)

PRECHILL FPS LOCATION	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18
Bile Contamination																		
Bruises																		
Extraneous Material																		
Faecal Contamination	ZERO TOLERANCE																	
Overscald/Mutilation																		
Trimnable lesions/conditions																		
First Sample Total																		
Second Sample Total																		
Cumulative Total																		
Corrective Action																		

Corrective Actions: c.d. = change detector; r. = retest; a. = added defect detector; v. = verbal warning; s. = line speed reduction
Trimnable lesions/conditions has the same meaning as contained in sub section 6.2.7., Annex D, FPS program

Note: Shaded area is for double sampling plans only (Reduced and Tightened)
