Viscera not visible e.g. viscera inside the abdominal cavity																								
Viscera missing Carcass without it's viscera																								
Total defects																								
Line Speed																								
Corrective Action Code																								

Corrective action: c.p. = change presenter; a.p. = add presenter; r. = reduce line speed; e.a. = equipment adjustment; o. = other (specify). It is the responsibility of management to initiate effective corrective action at the appropriate time immediately following each presentation test where the result indicates that the number of presentation errors is equal to or greater than the rejection number

Note: At any time, a veterinarian or an inspector under the veterinarian's supervision may enforce the Act and the Meat Inspection Regulations, which take precedence over actions recommended in this document.
