

Announcement

ISPRS Council is accepting

Proposals for free one-year subscriptions to ISPRS Journal of Photogrammetry & Remote Sensing

ISPRS Council has decided to offer up to fifteen (15) complimentary subscriptions to the ISPRS Journal of Photogrammetry and Remote Sensing for the calendar year 2006. This offer is extended to all academic, research and other public institutions in developing countries, which are unable to fund the USD45 subscription. Interested institutions should submit a 1-2 page proposal by the closing date of **31st December, 2005** to the ISPRS Secretary General. All Members of ISPRS (Ordinary, Associate, Regional and Sustaining) are kindly requested to pass this information to relevant institutions within their geographic region, or with which they are associated, and encourage them to submit an application.

Proposals should address the following:

1. Justify your financial need for a complimentary subscription. If your organization is a current subscriber, it will not disqualify you from a complimentary subscription, but you should explain why a complimentary subscription in 2006 is desired or needed.
2. Estimate the total number of Journal readers (including students, faculty, staff, and possibly professionals), and how access to the Journal will improve their knowledge of day-to-day activities.
3. How the Journal will be accessible to the above persons, and especially professionals outside your organisation.
4. What activities will be enhanced through a complimentary subscription: e.g. (a) research projects that will benefit from up-to-date technical and scientific information; (b) courses being offered that will be enhanced by access to recent scientific and technical literature; (c) enhancements to holdings in your organization's library for future reference; etc.
5. Should your request be awarded, what prospects do you have for paying an annual subscription for the Journal after 2006?

Proposals in English including address, phone, fax and email should be sent, preferably by email, to:

Orhan Altan, Secretary General ISPRS

Department of Geodesy and Photogrammetry
