Check your permit and provincial regulations for additional restrictions.

Non-toxic shot must be used to hunt migratory birds in **all** areas of Canada. Within National Wildlife Areas, the possession of lead shot is prohibited for all hunting, including the hunting of migratory birds and upland game birds. Hunters should consult provincial or territorial regulations for additional restrictions.

Canadians may be exposed to the West Nile virus when bird-watching, hunting, or handling migratory birds and other wild game. Environment Canada recommends that you consult the following Web site, maintained by Health Canada, for information about minimizing the risk of exposure: www.hc-sc.gc.ca/english/westnile/animals.html.

Snow Goose call recordings may be used for the purpose of hunting Snow Geese, and, if decoys are also used, they must be white. While so doing, any migratory bird for which there is an open season may also be taken.

NOTE

Hunters interested in participating in a possible conservation harvest of Snow Geese next spring should keep their 2005–2006 federal permits.
