# 1999 Annual Report

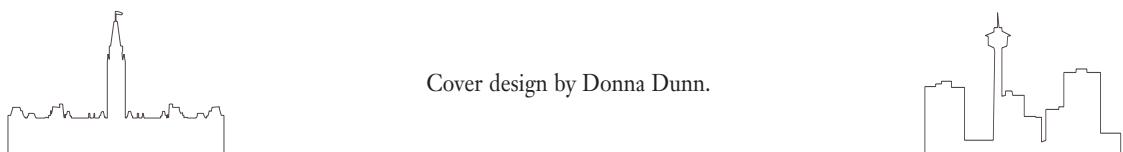

## Appendices

The cover of the 1999 Annual Report celebrates the 40th anniversary of the establishment of the National Energy Board. From its formation in 1959, through four decades of change in Canadian energy and a move from Ottawa to Calgary, the Board has made decisions that provide real benefits to Canadians.

Throughout its history, the National Energy Board has played many roles. Initially, it acted as a promoter of Canadian energy in new markets. Later, it played a key role as part of the prescriptive federal involvement in the energy sector. Most recently, the Board has worked in partnership with the energy industry and consumers to move away from adjudication towards more negotiation.

The Board has been involved in a number of major turning points in the development of the Canadian energy industry. Examples include the first pipeline toll hearing in 1971, approval of the northern pipeline in 1977, issuing guidelines for negotiated toll settlement in 1988, and the opening of a new supply basin on the east coast in 1997. These milestones serve as reminders of how the National Energy Board has risen to the challenges presented it in the past and as models for meeting challenges in the new millennium.
