

User Requested Minor Use Label Expansion Program Registrations from September 1, 1999 to February 29, 2000

The User Requested Minor Use Label Expansion (URMULE) Update provides timely information on the latest proposals for minor use label expansion of pesticides that have been evaluated and accepted for registration.

For the following pesticides, a Certificate of Registration has been issued based on a Supplemental Label, making the use legal. Registrants are required to add the new use to the full product label at the next printing. Provincial authorities, in publishing recommendations on the use of agricultural chemicals, may incorporate such acceptable uses in the knowledge that they meet the requirements of the *Pest Control Products Act*. Users must consult the product label as the ultimate authority on whether or not the product can be used to control a specific pest on a specific site, as a product's uses are subject to change.

NOTE: The URMULE Updates are available on the Pest Management Regulatory Agency's Internet site, address provided below. If Internet access is not available, arrangements can be made to receive this publication via facsimile or electronic mail. Please contact the Publications Coordinator at the location provided below.

Vegetables

Bentazon (Basagran – BASF)
Registration number 12221
for weed control in snow peas.

Clethodim (Select – Tomen)
Registration number 22625
for weed control in dry beans (pinto, black and great northern).

Ethalfluralin (Egde DC – DowAgro Sciences)
Registration number 21497
for the control of labelled weeds in transplanted peppers.

Imazethapyr (Pursuit - Cyanamid)
Registration number 21537
for weed control on snow peas.

Imidacloprid (Admire - Bayer)
Registration number 24090
for expansion of the use pattern for lettuce aphid control to Ontario and Quebec.

Mancozeb (Dithane DG - Rohm&Haas)
Registration number 20553
for the control of onion smut on dry bulb onions.

Propamocarb Hydrochloride (Previcur N - AgrEvo)
Registration number 26288
for Pythium control on greenhouse cucumbers.

Sethoxydim (Poast Ultra - BASF)
Registration number 24835
to reduce the PHI from 60 to 15 days on snap beans.

Fruit

Propiconazole (Topas 250E - Engage)
Registration number 24030
for the control of Saskatoon juniper rust on Saskatoonberry.

Pyridaben (Pyramite – BASF)
Registration number 25135
for post harvest control of two spotted spider mite on raspberry.

Sethoxydim (Poast Ultra - BASF)
Registration number 24835
to reduce the PHI from 100 to 60 days on cranberry.

Forestry

Tebufenozide (Mimic 240LV – Rohm & Haas)
Registration number 24502
for the control of white marked tussock moth in forests and woodlots.

Ornamentals

Carbaryl (Sevin XLR Plus – Rhone-Poulenc)
Registration number 19531
for the control of leatherjackets on golf course turf.

Diflubenzuron (Dimilin – Uniroyal)
Registration number 13816
for the control of fungus gnats and shore flies on greenhouse ornamentals.

Fosetyl-al (Aliette WDG – Rhone-Poulenc)
Registration number 24458
for control of *Pythium* spp. and *Phytophthora* spp. on greenhouse ornamentals and bedding plants.

Fosetyl-al (Aliette WDG – Rhone-Poulenc)
Registration number 24458
for *Pythium* spp. control on turfgrass.

Myclobutanil (Nova 40W – Rohm & Haas)
Registration number 22399
for the control of rust on chrysanthemums and powdery mildew on cut flowers of aster, gerbera and roses.

Myclobutanil (Nova 40W – Rohm & Haas)
Registration number 22399
for disease control on nursery grown ornamentals.

Myclobutanil (Nova 40W – Rohm & Haas)
Registration number 22399
for the control of powdery mildew on potted roses, gerbera and aster.

Uniconazole-P (Sumagic – Valent)
Registration number 25781
to reduce the rate on poinsettia and Easter lily.

Uniconazole-P (Sumagic - Valent)

Registration number 25781

on specified bedding plants for the control of excessive stem elongation.

Forage

Prosulfuron (Peak 75WG – Novartis)

Registration number 25310

for post emergent weed control in forage sorghum and forage millet.

Field Crops

Mancozeb (Dithane DG – Rohm & Haas)

Registration number 20553

for the control of leaf spot and stem spot diseases on alfalfa grown for seed.

Ethametsulfuron-methyl (Muster – DuPont)

Registration number 21555

to add barley and oats as rotational crops after canola in the Maritimes.

Other Crops

Flumetsulam+Clopyralid+2,4-D (Striker – DowAgro Sciences)

Registration number 24452

for the suppression of field horsetail in field corn in eastern Canada.

Glyphosate (Roundup Transorb – Monsanto)

Registration number 25344

for annual and perennial weed control in ginseng.

Rimsulfuron/Nicosulfuron (Ultim - DuPont)

Registration number 24682

as a tank mix with Striker, for the suppression of field horsetail on registered crops.
