

## **User Requested Minor Use Label Expansion Program Registrations for May 1, 2002 - August 31, 2002**

The User Requested Minor Use Label Expansion (URMULE) Update provides timely information on the latest proposals for minor use label expansion of pesticides that have been evaluated and accepted for registration.

For the following pesticides, a Certificate of Registration has been issued based on a Supplemental Label, making the use legal. Registrants are required to add the new use to the full product label at the next printing. Provincial authorities, in publishing recommendations on the use of agricultural chemicals, may incorporate such acceptable uses in the knowledge that they meet the requirements of the *Pest Control Products Act*. Users must consult the product label as the ultimate authority on whether or not the product can be used to control a specific pest on a specific site, as a product's uses are subject to change.

**NOTE:** The URMULE Updates are available on the Pest Management Regulatory Agency's Internet site, address provided below. If Internet access is not available, arrangements can be made to receive this publication via facsimile or electronic mail. Please contact the Publications Coordinator at the location provided below.

MRL<sup>1</sup>

## Vegetables

**Thifensulfuron methyl** (Pinnacle Toss-N-Go, DuPont), registration number 22002, for the control of listed weeds on field tomatoes. proposed 0.07 ppm

**Bacillus thuringiensis kurstaki** (Bioprotec CAF, AEF Global), registration number 26854, for the control of European corn borer on sweet peppers. n/a

## Fruit

**Kresoxim-methyl** (Sovran, BASF), registration number 26257, for the control of powdery mildew, downy mildew and black rot on grapes. 1 ppm

**Imidacloprid** (Admire 240F, Bayer), registration number 24094, for the control of aphid and other vectors of blueberry scorch virus on highbush blueberry. proposed 1 ppm

**Clopyralid** (Lontrel 360, DowAgroscience), registration number 23545, for the control of listed weeds in shelterbelt species: villosa lilac, acute willow, Colorado spruce, white spruce, buffaloberry and chokecherry. n/a

**Imidacloprid** (Admire 240F, Bayer), registration number 24094, for the control of western cherry fruit fly and black cherry fruit fly on sweet and sour cherry in British Columbia and Ontario. proposed 3 ppm<sup>2</sup>

**Propiconazole** (Topas 250E, Engage Agro), registration number 24030, for the control of cherry leaf spot on sweet and sour cherries. 1 ppm

## Field Crops

**Carbathiin + thiabendazole** (Crown, Crompton), registration number 23430, for the control of *Aschochyta* on chickpea in Ontario.

carbathiin 0.1 ppm  
thiabendazole 0.1 ppm

## Forestry

**Bacillus thuringiensis** (Foray 76B, Valent Biosciences), registration number 24976, for the control of forest tent caterpillar in forests and woodlots.

n/a

## Others

**Imidacloprid** (Merit 0.5G, Bayer), registration number 25933, for the control of Japanese beetle in Halifax, Nova Scotia.

n/a

**Fluoxypyr and clopyralid + MCPA** (Prestige A and Prestige B, Dow Agrosience), registration numbers 25465 (Prestige A, fluoxypyr) and 25464 (Prestige B, clopyralid + MCPA), for labelled weed control on established tall fescue grown for seed.

n/a

**Permethrin** (Prelude 240, Syngenta), registration number 26509, for the control of ambrosia and other woodboring insects in sawn lumber for export to Australia.

n/a

---

## Footnotes

<sup>1</sup> Maximum Residue Limits (MRLs) have been added to this document for the user's information and convenience. Under the *Food and Drugs Act*, it is prohibited to sell food containing residues of pest control products at a level greater than 0.1 ppm unless a higher MRL has been established in Table II, Division 15, of the Food and Drug Regulations or an Interim Marketing Authorization (IMA) has been issued. In case of discrepancy between this document and the Food and Drug Regulations, information in the latter will prevail. For more information on MRLs and IMAs, please refer to the PMRA URMULE Regulatory Directive (DIR2001-01, Sections 4.2 and 5 (step 5)) or on the Internet at <http://www.hc-sc.gc.ca/pmra-arla/english/legis/maxres-e.html>.

<sup>2</sup> An IMA was issued on August 24, 2002, to permit the sale of sweet and sour cherries containing residues of imidacloprid up to 3 ppm while the regulatory process to amend the Food and Drug Regulations is completed.
