

URMULE Update

User Requested Minor Use Label Expansion (URMULE) Registrations August 1, 1998 - September 30, 1998

The URMULE Update provides timely information on the latest proposals for minor use label expansion of pesticides that have been evaluated and accepted for registration.

A Certificate of Registration, based on a supplemental label, has been issued for the following products, thereby legalizing the use. Registrants are required to add the new use to the full product label at the next printing. Provincial authorities may incorporate such acceptable uses in publishing recommendations on the use of agricultural chemicals with the knowledge that they meet the requirements of the *Pest Control Products Act*.
