

## User Requested Minor Use Label Expansion Program Registrations for April 13 - July 9, 1999

The User Requested Minor Use Label Expansion (URMULE) Update provides timely information on the latest proposals for minor use label expansion of pesticides that have been evaluated and accepted for registration.

For the following pesticides, a Certificate of Registration has been issued based on a Supplemental Label, making the use legal. Registrants are required to add the new use to the full product label at the next printing. Provincial authorities, in publishing recommendations on the use of agricultural chemicals, may incorporate such acceptable uses in the knowledge that they meet the requirements of the Pest Control Products Act.

You must consult the product label as the ultimate authority on whether or not the product can be used to control a specific pest on a specific site as the list is subject to change with time.

**NOTE:** Future issues of the URMULE Update will be available on the Pest Management Regulatory Agency's Internet site, address provided below. If Internet access is not available, arrangements can be made to receive this publication via facsimile or electronic mail. Please contact the Publications Coordinator at the location provided below.
