

# ACKNOWLEDGEMENTS

---

The production of this manual was a collaborative effort to produce a manual that met the Basic Knowledge Requirements of the Aerial Module, from the Standard for Pesticide Education, Training and Certification in Canada. The “National Standard” was published by Health Canada and endorsed by all provincial regulatory agencies and the Canadian Aerial Applicators Association.

Participation and assistance from the following groups is gratefully acknowledged:

- ! The Working Group on Pesticide Education, Training and Certification;\*
- ! Industry representatives; and
- ! Provincial agencies.

\* The Working Group is a permanent group of the Federal/Provincial/Territorial Committee on Pest Management and Pesticides. The Working Group is comprised of one federal Pest Management Regulatory Agency representative, provincial regulatory agency members and college members. Without their dedication and commitment, this manual would not have been possible.

Industry involvement was especially valuable as it ensured that the training requirements were practical from an operational point of view. Of special note was the industry involvement from the following individuals:

- ! Jon Bagley and Stephen Ritchey from the Canadian Aerial Applicator Association;
- ! Ted Delanghe of Communicom Ltd. of Regina, Saskatchewan;
- ! Lowell Ritchey, Fairfield Services Ltd. of Abbotsford, British Columbia; and
- ! Forest Protection Ltd., Fredericton, New Brunswick.

Provincial agencies that provided funding and/or significant development of the manual also ensured the production of the manual. These included:

- ! British Columbia Ministry of Environment, Lands and Parks;
- ! Ontario Environment; and
- ! New/Nouveau Brunswick Department of Environment.

Desktop publishing services, editing and translation were provided by the Pest Management Regulatory Agency.

It is only through the persistence and dedication of all parties mentioned above that this manual was produced.
