1.0 Introduction

This Regulatory Decision Document outlines the Pest Management Regulatory Agency's (PMRA) regulatory decision-making process concerning the use of the active ingredient kresoxim-methyl and the associated end-use product, Sovran[®] Fungicide, containing kresoxim-methyl, for the control of apple scab and powdery mildew on apples.

2.0 Background

The PMRA carried out an assessment of available information in accordance with Section 9 of the Pest Control Products (PCP) Regulations. The assessment found that there was sufficient information, pursuant to Section 18(*b*), to allow a determination of the safety, merit and value of kresoxim-methyl and the associated end-use product, Sovran[®] Fungicide, for the control of apple scab and powdery mildew on apples grown in Canada. The PMRA concluded that the use of Sovran[®] Fungicide in accordance with the label accompanying the product has merit and value consistent with Section 18(*c*) of the PCP Regulations and does not entail an unacceptable risk of harm under Section 18(*d*).

These products were proposed for registration in Proposed Regulatory Decision Document [PRDD2003-05](#). No comments were received by the PMRA concerning [PRDD2003-05](#).

3.0 Regulatory decision

Based on the considerations outlined above, the active ingredient kresoxim-methyl and the associated end-use product, Sovran[®] Fungicide, are eligible for full registration, pursuant to Section 13 of the PCP Regulations for the control of apple scab and powdery mildew on apples.
