1.0 Introduction

This Regulatory Decision Document completes the PMRA's regulatory decision-making process concerning the use of EF-1343 Suspension Concentrate Herbicide containing the active ingredient florasulam for the control of broadleaf weeds in spring wheat, including durum, spring barley and oats (tank-mix only).

2.0 Background

The PMRA carried out an assessment of available information in accordance with the Pest Control Products Regulations. The assessment found that there was sufficient information to allow a determination of the safety, merit and value of florasulam and the formulated end-use product EF-1343 Suspension Concentrate Herbicide manufactured by Dow AgroSciences Canada Inc. The PMRA concluded that the use of EF-1343 Suspension Concentrate Herbicide in accordance with the label accompanying the product has merit and value consistent with the Pest Control Products Regulations and does not entail an unacceptable risk of harm.

These products were proposed for registration in Proposed Regulatory Decision Document PRDD2004-04. No comments were received by the Agency concerning this document.

3.0 Regulatory Decision

Based on the considerations outlined above, the active ingredient florasulam and associated end-use product EF-1343 Suspension Concentrate Herbicide for the control of broadleaf weeds in spring wheat, including durum, spring barley and oats (tank-mix only) are eligible for full registration under the Pest Control Products Regulations.
