

*Classification Implementation  
Working Group (CI - WG)*

Mandate/ Terms of Reference (Revised)

- To develop a final “Proposal for a National Pesticide Classification System for Canada” which will be used for national consultation.
- To facilitate federal, provincial and territorial “agreement in principle” to proceed with consultation on a proposed national pesticide classification system.
- To provide recommendations for broad consultation on the proposed national system and to coordinate the consultation process including the review of submitted comments and revisions to the proposed system to address stakeholder concerns.
- To provide recommendations for the implementation of the proposed national system and to facilitate the smooth transition to the national system while phasing out of existing federal and provincial classification systems, identifying issues for resolution by the FPT Committee.
- To provide a forum for discussion of further provincial harmonization of pesticide regulations or additional provincial controls within the national pesticide classification framework.
