Transparency Overview

Register (S 42):

“Body of information to which the rules of disclosure apply” .
Section 42 specifies content .
Mandatory information placed in the Register as decisions made .

REGISTER OF PEST CONTROL PRODUCTS - Mandatory content -

PMRA
Access

CBI & Privacy
removed

Upon request to inspect
Reading Room

CBI & Privacy
removed

“as soon as reasonably practicable ”
Electronic Public Registry (S 42(7))

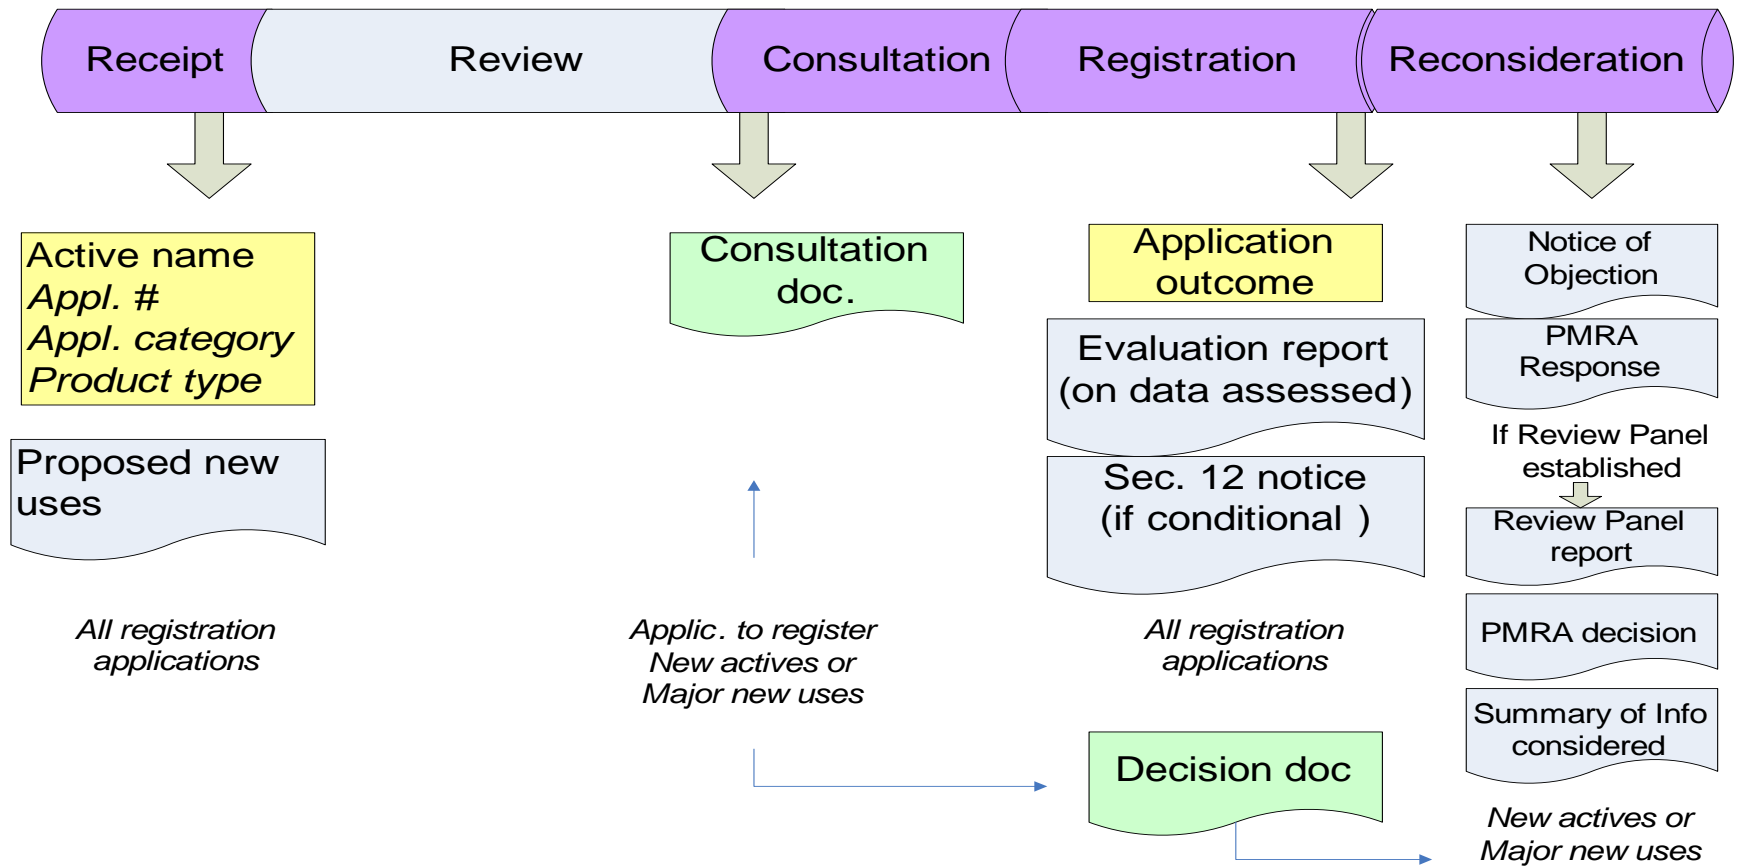

Public
Access

E-Public Registry

What information & When?

APPLICATIONS TO REGISTER OR AMEND A REGISTRATION

E-Public Registry

What information & When?

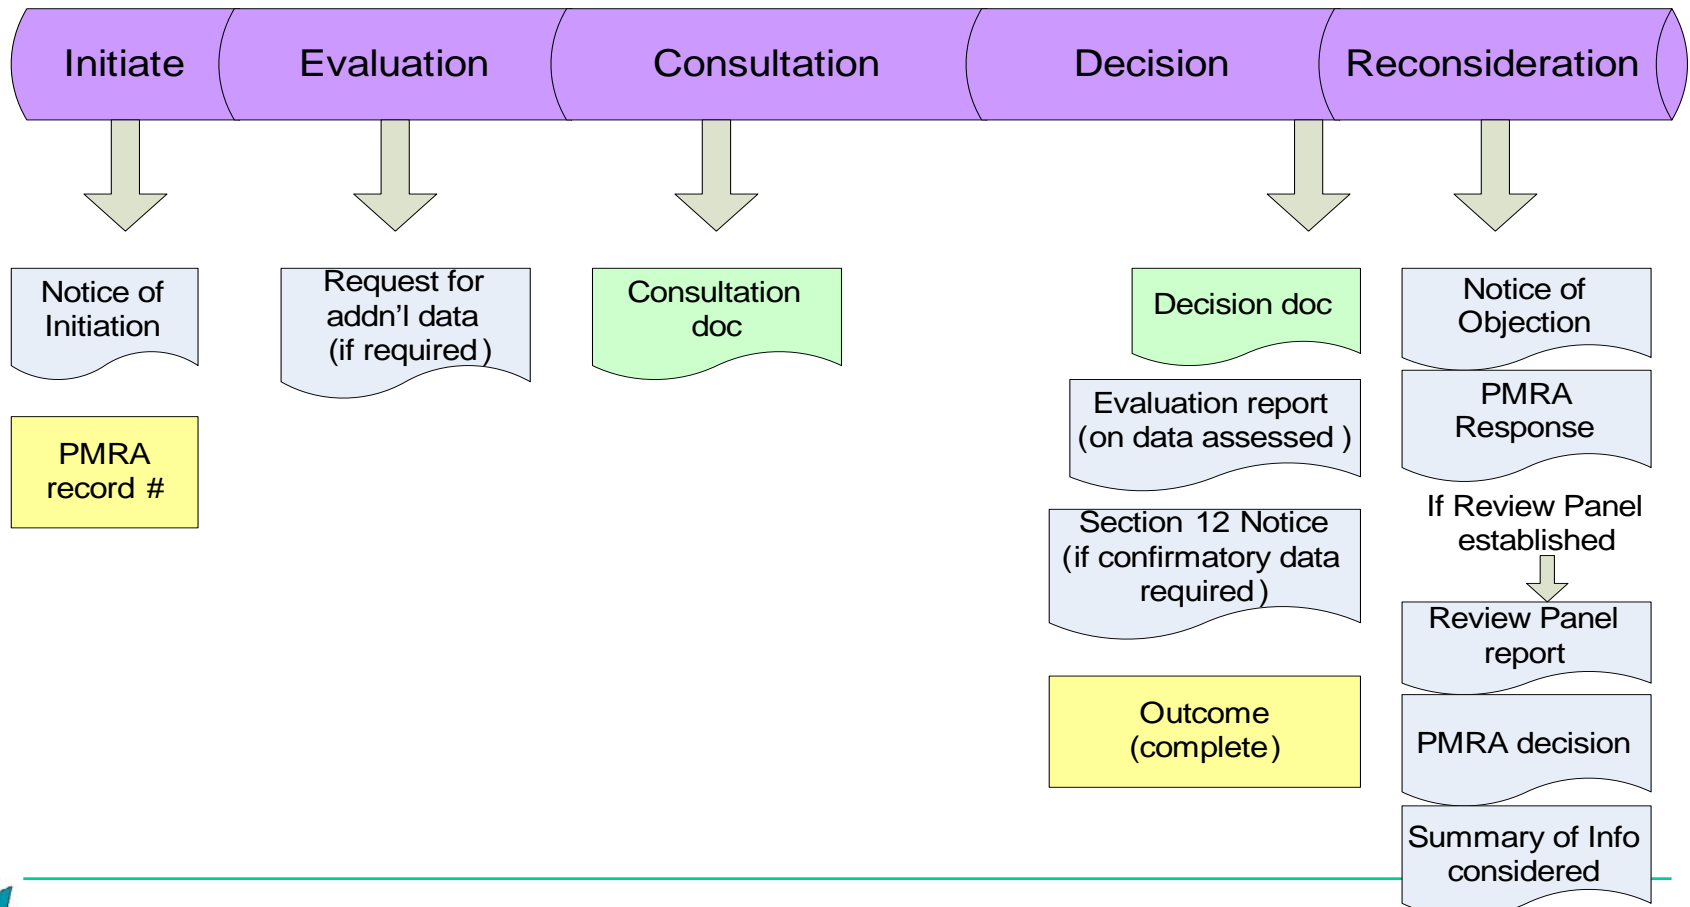

► Exception:

- ◆ Where Conditional registration granted :
 - *Consultation, access to test data and reconsideration opportunity are delayed until confirmatory data submitted & reviewed, or until registration renewed (whichever comes first) - PCP Regs 14(1)*
 - *i.e., no consultation or decision documents for conditional registration decisions on new actives or major new uses if a conditional registration*
 - *But evaluation report will be available*

E-Public Registry

What information & When?

Re-evaluation and Special Review

E-Public Registry

What information & When?

- ▶ Pest control products
 - ◆ at registration:
 - *registration #*
 - *Validity period*
 - *Conditions of registration (eg., label)*
 - ◆ Registration status:
 - *Registered, cancelled etc*

Inspection of Test Data

- ▶ **Data that is relevant to the decision**
 - ◆ *Accessible for inspection at time of decision*
 - ◆ *CBI, as defined in the Act, must first be removed*
 - ◆ *View access via a Reading Room in Ottawa*
 - ◆ *Data continues to be protected by ATI Act, inspection does NOT put the data in the public domain; no copy can be made (S 43(8))*
- ▶ **Requires an application with an affidavit**
 - ◆ *stating the purpose & that there is no intent to use the data or make it available to others for registering/amending a pesticide anywhere (S 43(1))*

Other Considerations

- ▶ **Transitional provisions (S 81); Act applies to:**
 - ◆ Applications received before “in force” date if decision not yet reached
 - ◆ Products registered on “in force” date
 - *Except that test data supporting decisions made before the “in force” date not accessible until the product is consulted on under the new Act via a major new use application or re-evaluation*

Other considerations

- ▶ Required to respect:
 - ◆ Official Languages Act
 - *Increased translation workload (PMRA docs)*
 - ◆ Privacy Act
 - *Privacy Impact Assessment done*
 - *PMRA must remove privacy info from test data, evaluation reports (includes author names for unpublished studies)*
 - ◆ Copyright Act
 - *Where published info used in an evaluation, the publication not put in-registry, only reference to it*

Challenges

CBI & Privacy information protection

- ◆ CBI must be designated by registrant, separated from test data & verified by PMRA before Reading Room access (S 43(4),(5),(6),(7)):
 - *Publication of guidance to industry*
 - *Significant new workload for PMRA & industry*
 - *Need to “catch up” for early decisions*
- ◆ Privacy information protection
 - *Significant new workload*
 - *Plan to automate as much as possible*

Challenges

Efficient electronic delivery has involved:

- ◆ *Major redesign of e-infrastructure, incl. design/ integration of new tools based on complex business rules*
- ◆ *Conversion of archived test data to electronic (microfilm & paper post 1984)*
- ◆ *Ongoing conversion of incoming paper to electronic*
- ◆ *Doc management system/database already contains 400,000+ docs (up to. 50 million pages) & growing daily*
- ◆ *Re-engineering of processes to accommodate e-document management throughout application lifecycle*

E- Public Registry on Day 1

► What will you see?

◆ Single Public registry on PMRA Site with:

- *Listing of “open” registration applications with active etc. but to begin with not new uses*
- *Listing of all actives for which re-evaluation started but not yet completed*
- *Evaluation reports/other docs added “**as soon as reasonably practicable**” after decisions made on applications and re-evaluations*
- *Listing of all registered products (Labels already viewable via ELSE)*

E- Public Registry

- ▶ Not a Google-type search tool
 - ◆ But information can be displayed in different ways based on filtering mechanisms via pre-established “buttons”/criteria:
 - E.g., re-evaluations, applications, actives etc.
 - ◆ Will consider all feedback

Question to PMAC

- ▶ What advice does PMAC have on managing expectations for a more transparent system given the transitional provisions of the Act and the challenges that will be faced in the transition to a new paradigm?
