Canada et à la Sécurité de la vieillesse**

TABLE DES MATIÈRES

INTRODUCTION

RÉGIME DE PENSIONS DU CANADA

Année civile

1. Moyenne mensuelle de prestations
2. Moyenne mensuelle de nouvelles prestations
3. Paiements nets
4. Paiements moyens mensuels
5. Revenus

Année financière

6. Moyenne mensuelle de prestations
7. Moyenne mensuelle de nouvelles prestations
8. Paiements nets
9. Paiements moyens mensuels
10. Revenus

11. Moyenne mensuelle de bénéficiaires selon le sexe et l'âge

Année civile

12. Cotisants et cotisations selon le sexe
13. Moyenne des gains et des cotisations
14. Taux mensuels maximums des nouvelles prestations
15. Partie du taux uniforme des nouvelles prestations
16. Maximum des gains et des cotisations

RÉGIME DES RENTES DU QUÉBEC

Année civile

17. Moyenne mensuelle de prestations
18. Moyenne mensuelle de nouvelles prestations
19. Paiements nets
20. Paiements moyens mensuels

Année financière

21. Moyenne mensuelle de prestations
22. Moyenne mensuelle de nouvelles prestations
23. Paiements nets
24. Paiements moyens mensuels

Année civile

25. Cotisants et cotisations

PROGRAMMES DE LA SÉCURITÉ DE LA VIEILLESSE

26. Taux mensuels maximums

Année civile

27. Taux annuels maximums
28. SRG - Seuils de revenu de prestation réduite et nulle, selon l'état civil de paiement
29. Moyenne mensuelle de prestations
30. Paiements nets
31. Paiements moyens
32. SV - Moyenne mensuelle de bénéficiaires selon le taux
33. SRG - Moyenne mensuelle de bénéficiaires selon l'état civil de paiement
34. ALC - Moyenne mensuelle de bénéficiaires selon l'état civil de paiement

Année financière

35. Moyenne mensuelle de prestations
36. Paiements nets
37. Paiements moyens
38. SV - Moyenne mensuelle de bénéficiaires selon le taux
39. SRG - Moyenne mensuelle de bénéficiaires selon l'état civil de paiement
40. ALC - Moyenne mensuelle de bénéficiaires selon l'état civil de paiement

41. Moyenne mensuelle de bénéficiaires selon le sexe et l'âge

DONNÉES SUPPLÉMENTAIRES

42. Rémunération hebdomadaire moyenne
43. Indice des prix à la consommation, 1971 année de base
44. Indice des prix à la consommation, 1981 année de base
45. Indice des prix à la consommation, 1986 année de base
46. Indice des prix à la consommation, 1992 année de base
47. Seuil après impôt de faible revenu selon la population du secteur de résidence

CALCULATIONS

- A. SV: Calculs de nouvelles prestations
- B. RPC: Calcul des prestations
- C. RPC: Taux de cotisation
- D. RPC: Calcul de la nouvelle prestation maximale
- E. SRG & ALC: Calcul du seuil de réduction et du seuil limite de revenu
 - E.1 SRG Célibataire
 - E.2 SRG - Époux/conjoint pensionné
 - E.3 SRG - Époux/conjoint non-pensionné
 - E.4 SRG - Époux/conjoint reçoit l'Allocation
 - E.5 ALC - Régulière
 - E.6 ALCS - Survivant

INTRODUCTION

This document is a working tool to serve as a handy reference manual for CPP and OAS Programs and other related information.

The CPP & OAS Stats Book was prepared by Forecasting, Information & Analysis of Social Development Canada .

The symbol (...) indicates that this figure is ' not applicable '.

A revised version of The CPP & OAS Stats Book will be available every summer. This publication is available at:

www.sdc.gc.ca/en/isp/statistics/statmain.shtml

2004	3,033,409	290,557	941,043	4,439,392	566,161	112,475

(1) Total excludes death benefits and includes children benefits.

(2) Combined pensions are already distributed and not counted twice in the total. Number of combined pensions paid by the supplementary cheques system are not included.

(3) Death Benefit amount is the total paid in the calendar year.

(4) The number of benefits paid by the supplementary cheques system and under international agreements on social security were not available prior to Jan. 1986.

(1) Le total exclut les prestations de décès mais inclut les prestations versées aux enfants.

(2) Les pensions combinées sont déjà distribuées et ne sont pas calculées deux fois au total. Les pensions combinées qui sont payées par le système de chèques supplémentaires ne sont pas incluses.

(3) Les prestations de décès réfèrent à celles versées tout au cours de l'année civile.

(4) Le nombre de prestations payées par le système de chèques supplémentaires et sous l'entente internationale sur la sécurité sociale n'ont pas été disponibles avant janvier 1986.

*As of 1999, the average net payment for the death benefit was calculated as net payments divided by the number of benefits in pay.

(1) The number of benefits paid by the supplementary cheques system and under international agreements on social security were not available prior to January 1986.

(2) Increase in average monthly payment due to an increase in the flat rate portion of over \$148.00.

*Depuis 1999, le versement moyen net pour la prestation de décès est calculé comme étant des paiements nets divisés par le nombre de prestations versées.

(1) Le nombre de prestations payées par le système de chèques supplémentaires et sous les accords internationaux de sécurité sociale n'ont pas été disponibles avant janvier 1986.

(2) La moyenne mensuelle du paiement a substantiellement augmentée à cause de la portion du taux uniforme de plus de \$148.00 par personne invalide.

(1) Total excludes death benefits and includes children benefits.

(2) Combined pensions are already distributed and not counted twice in the total.
 Number of combined pensions paid by the supplementary cheques system are not included.

(3) Death Benefit amount is the total paid for the fiscal year.

(4) The number of benefits paid by the supplementary cheques system and under international agreements on social security were not available prior to Jan. 1986.

(1) Le total exclut les prestations de décès mais inclut les prestations versées aux enfants.

(2) Les pensions combinées sont déjà distribuées et ne sont pas calculées deux fois au total. Les pensions combinées qui sont payées par le système de chèques supplémentaires ne sont pas incluses.

(3) Les prestations de décès réfèrent à celles versées tout au cours de l'année financière.

(4) Le nombre de prestations payées par le système de chèques supplémentaires et sous l'entente internationale sur la sécurité sociale n'ont pas été disponibles avant janvier 1986.

2004-2005	17,754	2,497	4,891	26,588	4,110	9,389

(1) Does not include benefits paid by the supplementary cheques systems and under international agreements on social security.

(2) Total excludes death benefits and includes children benefits.

(3) Combined pensions are already distributed and not counted twice in the total. Number of combined pensions paid by the supplementary cheques system are not included.

(1) N'inclut pas les prestations payées par le système de chèques supplémentaires et sous l'entente internationale sur la sécurité sociale.

(2) Le total exclut les prestations de décès mais inclut les prestations versées aux enfants.

(3) Les pensions combinées sont déjà distribuées et ne sont pas calculées deux fois au total. Les pensions combinées qui sont payées par le système de chèques supplémentaires ne sont pas incluses.

*As of 1999, the average net payment for the death benefit was calculated as net payments divided by the number of benefits in pay.

(1) The number of benefits paid by the supplementary cheques system and under international agreements on social security were not available prior to January 1986.

*Depuis 1999, le versement moyen net pour la prestation de décès est calculé comme étant des paiements nets divisés par le nombre de prestations versées.

(1) Le nombre de prestations payées par le système de chèques supplémentaires et sous les accords internationaux de sécurité sociale n'ont pas été disponibles avant janvier 1986.

* The Allowance for the survivor was averaged over a period of 4 months for the 1985 calendar year, since this benefit started only in September of that year.

* La moyenne de l'Allocation au survivant a été calculée sur une période de 4 mois pour l'année civile de 1985 car cette prestation n'a débuté qu'en septembre de cette année.

A. SÉCURITÉ DE LA VIEILLESSE — CALCUL DES NOUVELLES PRESTATIONS

$$\begin{aligned} \text{Taux avril } \underline{t} = \text{Taux janvier } \underline{t} & \quad \times \quad \frac{\text{IPC mensuel moyen de novembre } \underline{t-1} \text{ à janvier } \underline{t}}{\text{IPC mensuel moyen de août } \underline{t-1} \text{ à octobre } \underline{t-1}} \\ \text{Taux juillet } \underline{t} = \text{taux avril } \underline{t} & \quad \times \quad \frac{\text{IPC mensuel moyen de février } \underline{t} \text{ à avril } \underline{t}}{\text{IPC mensuel moyen de novembre } \underline{t-1} \text{ à janvier } \underline{t}} \\ \text{Taux octobre } \underline{t} = \text{taux juillet } \underline{t} & \quad \times \quad \frac{\text{IPC mensuel moyen de mai } \underline{t} \text{ à juillet } \underline{t}}{\text{IPC mensuel moyen de février } \underline{t} \text{ à avril } \underline{t}} \\ \text{Taux janvier } \underline{t+1} = \text{Taux octobre } \underline{t} & \quad \times \quad \frac{\text{IPC mensuel moyen de août } \underline{t} \text{ à octobre } \underline{t}}{\text{IPC mensuel moyen de mai } \underline{t} \text{ à juillet } \underline{t}} \end{aligned}$$

t = année en cours

Note : L'IPC mensuel moyen est arrondi au dixième près (Règl. Art. 9).

Les ratios IPC sont arrondis au millième près (Règl. Art. 8)

Les taux sont arrondis au cent près (Règl. Art. 8).

**E. SUPPLÉMENT DE REVENU GARANTI (SRG) ET L'ALLOCATION (ALC)
CALCUL DU SEUIL DE RÉDUCTION ET DU SEUIL LIMITE DE REVENU**

Seuil de réduction : Seuil de revenu à partir duquel on commence à verser le SRG ou l'ALC à un taux différent.
En général, ce seuil correspond au seuil d'exemption.

Seuil limite Seuil de revenu à partir duquel le SRG ou l'ALC cesse d'être versé et qui correspond à zéro.

Les pensions sont arrondies au cent près [Règl. Art. 7].

E.1 SRG — CÉLIBATAIRE

Versé à un prestataire de la SV qui est seul [Loi. Art. 10].

Sous le seuil de réduction (revenu annuel de 24 \$), on applique le taux maximal du SRG pour une personne seule. On applique un taux partiel au SRG à partir du seuil de 24 \$ de revenu annuel jusqu'au seuil limite, où le SRG devient zéro

Pour calculer le seuil limite (où le SRG devient zéro), on arrondit au dollar près le SRG mensuel maximal au taux pour une personne seule, et on multiplie ce chiffre par 2, et ensuite par 12 (pour obtenir un chiffre annuel). La multiplication par 2 correspond à un taux de réduction de 50 p. 100 du SRG.

Par exemple : pour juillet 2005.

Seuil de réduction : 24 \$

On calcule le seuil limite de la manière suivante : $SRG \text{ pour une personne seule} = 566,87 \$ = 567 \$ \text{ (arrondi)}$
 $Seuil \text{ limite} = 567 \$ \times 2 \times 12 = 13\ 608 \$$

Source : Loi sur la sécurité de la vieillesse, article 10, et Règlement.

**E. SUPPLÉMENT DE REVENU GARANTI (SRG) ET L'ALLOCATION (ALC)
CALCUL DU SEUIL DE RÉDUCTION ET DU SEUIL LIMITE DE REVENU**

E.2 SRG — ÉPOUX/CONJOINT PENSIONNÉ

Versé à un couple marié lorsque les deux ont droit à une pension de la SV [Loi. Art. 10].

Sous le seuil de réduction (revenu annuel combiné de 48 \$), on applique le taux maximal du SRG pour un couple. On applique un taux partiel au SRG à partir d'un revenu annuel combiné de 48 \$ jusqu'au seuil limite, où le SRG devient zéro.

Pour calculer le seuil limite (où le SRG devient zéro), on arrondit la valeur du SRG mensuel maximal au taux prévu pour un couple, on multiplie cette valeur par 4 et on la multiplie de nouveau par 12 (pour obtenir un chiffre annuel). La multiplication par 4 correspond à un taux de réduction de 25 p. 100 par prestataire du SRG.

Par exemple : pour juillet 2005.

Le seuil de réduction : 48 \$

Le seuil limite est calculé de la manière suivante : Taux du SRG pour un couple = 369,24 \$ = 370 \$ (arrondi)
Seuil limite = 370 \$ x 4 x 12 = 17 760 \$

Source : Loi sur la sécurité de la vieillesse, art. 10 et Règlement.

**E. SUPPLÉMENT DE REVENU GARANTI (SRG) ET L'ALLOCATION (ALC)
CALCUL DU SEUIL DE RÉDUCTION ET DU SEUIL LIMITE DE REVENU**

E.3 SRG — ÉPOUX/CONJOINT NON-PENSIONNÉ

Versé à un prestataire de la SV lorsque le conjoint n'est pas prestataire de la SV [Loi. Art. 10]

On applique au SRG le taux maximal pour une personne seule, jusqu'au seuil de réduction, qui correspond à l'équivalent d'une pension annuelle de la SV plus 48 \$. On applique un taux partiel au SRG à partir du seuil de réduction jusqu'au seuil limite, où le SRG devient zéro.

Pour calculer le seuil de réduction (à partir duquel on commence à réduire le SRG), on arrondit au dollar supérieur le montant mensuel maximal de la SV pour le trimestre en cours. Cela correspondrait à un taux de réduction fictif de 100 % de la SV. Le montant obtenu correspond à la limite inférieure de la dernière tranche de revenu où l'on applique toujours le taux maximal au SRG. La somme de 48 \$ doit être ajoutée au seuil de réduction final.

Pour calculer le seuil limite (auquel le SRG devient zéro), on arrondit au dollar supérieur la valeur mensuelle maximale du SRG pour une personne seule, on la multiplie par 4, et ensuite par 12 (pour obtenir un chiffre annuel). La multiplication par 4 correspond à un taux de réduction de 25 p. 100 du SRG. Ensuite, on ajoute ce montant à l'équivalent d'une pension annuelle de la SV (arrondie au prochain montant divisible par 4), au taux actuel.

Par exemple : pour juillet 2005.

Le taux de réduction est calculé de la manière suivante :
 $SV/4 = 476,97/4 = 119,24 \$ = 120,00 \$$ (arrondi)
 Seuil de réduction = $(120,00 \times 4 \times 12) + 48,00 \$ = 5\ 808 \$$

Le seuil limite est calculé de la manière suivante :
 Taux du SRG pour une personne seule = $566,87 \$ = 567,00 \$$ (arrondi)
 Seuil limite = $(567,00 \$ \times 4 \times 12) + (120,00 \$ \times 4 \times 12) = 32\ 976 \$$

**E. SUPPLÉMENT DE REVENU GARANTI (SRG) ET L'ALLOCATION (ALC)
CALCUL DU SEUIL DE RÉDUCTION ET DU SEUIL LIMITE DE REVENU**

E.4 SRG — ÉPOUX/CONJOINT REÇOIT L'ALLOCATION

Versé à un prestataire de la SV lorsque le conjoint touche une ALC [Loi. Art. 10 et 17.4].

On applique le taux maximal du SRG pour un couple jusqu'au point de réduction, qui correspond aux 4/3 de l'équivalent d'une pension annuelle de la SV au taux actuel arrondi au prochain multiple de 3 \$, plus 48 \$. On applique un taux partiel au SRG à partir du seuil de réduction jusqu'au seuil limite, auquel le SRG devient zéro.

Pour calculer le seuil de réduction (à partir duquel on commence à réduire le SRG), on arrondit la valeur mensuelle maximale du SV pour le trimestre en cours à la prochaine valeur divisible par 3. On multiplie ensuite cette valeur par 4 et par 12 (pour obtenir un chiffre annuel). La division par 3 et la multiplication par 4 correspondent à un taux de réduction fictif de 75 p. 100 de la SV. Le montant obtenu correspond à la limite inférieure de la dernière tranche de revenu où l'on applique toujours le taux maximal au SRG. La somme de 48 \$ doit être ajoutée au seuil de réduction final.

Pour calculer le seuil limite (auquel le SRG devient zéro), on arrondit au dollar près la valeur mensuelle maximale du SRG au taux pour une personne seule, et on multiplie cette valeur par 4 et par 12 (pour obtenir un chiffre annuel). La multiplication par 4 correspond à un taux de réduction de 25 p. 100 du SRG. Ensuite, on ajoute ce montant à l'équivalent d'une pension annuelle de la SV (arronde au prochain montant divisible par 4), au taux actuel.

Par exemple : pour juillet 2005.

Le taux de réduction est calculé de la manière suivante :
 $SV/3 = 476,97/3 = 158,99 \$ = 159,00 \$$ (arrondi)
 Seuil de réduction = $(159,00 \$ \times 4 \times 12) + 48 \$ = 7\ 680 \$$

Le seuil limite est calculé de la manière suivante :
 Taux SRG pour une personne seule = $566,87 \$ = 567,00 \$$ (arrondi)
 Seuil limite = $(567,00 \$ \times 4 \times 12) + (120,00 \$ \times 4 \times 12) = 32\ 976 \$$

Source : Loi sur la sécurité de la vieillesse, art. 10 et Règlement.

**E. SUPPLÉMENT DE REVENU GARANTI (SRG) ET ALLOCATION (ALC)
CALCUL DU SEUIL DE RÉDUCTION ET DU SEUIL LIMITE DE REVENU**

E.5 L'ALLOCATION — RÉGULIÈRE

L'ALC compte deux volets : le volet correspondant à la SV, auquel on applique un taux complet ou partiel selon la résidence de la personne, et le volet équivalent au SRG, auquel on applique le taux pour un couple. Pour ces calculs, on suppose qu'un taux complet est appliqué au volet équivalent à la SV.

Sous le seuil de réduction (revenu annuel combiné de 48 \$), on applique le taux maximal à l'ALC. À partir de 48 \$ de revenu annuel combiné jusqu'au premier seuil limite, le volet de l'ALC qui correspond à la SV est versé à un taux réduit lorsque le volet correspondant au SRG continue d'être versé au taux maximal pour un couple. Entre le premier seuil limite et le deuxième seuil de réduction, le volet de l'ALC qui correspond à la SV est égal à zéro, et le volet qui correspond au SRG est toujours versé au taux complet. Du premier seuil limite jusqu'au deuxième seuil de réduction, le volet de l'ALC qui correspond à la SV est égal à zéro, et le volet correspondant au SRG est payé au taux partiel. Au deuxième seuil limite, l'ALC est égale à zéro.

Pour calculer le premier seuil limite, on arrondit au multiple de 3 supérieur la valeur mensuelle maximale de la SV. Ensuite on multiplie cette valeur par 4 et par 12 (pour obtenir un chiffre annuel). La division par 3 et la multiplication par 4 correspondent à un taux de réduction de 75 p. 100 du volet correspondant à la SV. Le montant obtenu est la limite inférieure de la dernière tranche de revenu pour laquelle le volet correspondant à la SV est égal à zéro, mais on applique encore le taux maximal au volet correspondant au SRG. Il s'agit du premier seuil limite. Il faut ajouter 48 \$ à cette somme afin de déterminer le deuxième seuil de réduction (à partir duquel le volet correspondant au SRG commence à être réduit).

Pour calculer le deuxième seuil limite (à partir duquel le volet correspondant au SRG est égal à zéro), on arrondit au dollar supérieur la valeur mensuelle maximale du SRG au taux pour un couple, et on multiplie ce montant par 4 et par 12 (pour obtenir un chiffre annuel). La multiplication par 4 correspond à un taux de réduction de 25 p. 100 du volet correspondant au SRG. Ensuite, on ajoute cette somme à l'équivalent des 4/3 du montant de la SV (arrondi au dollar supérieur), tel que calculé pour le premier seuil limite.

Par exemple : pour juillet 2005

Le premier seuil de réduction : 48 \$

Le premier seuil limite est calculé de la manière suivante : $SV/3 = 476,97/3 \$ = 158,99 \$ = 159,00 \$$ (arrondi)
Seuil limite = $(159,00 \$ \times 4 \times 12) = 7\ 632 \$$

Le deuxième seuil de réduction : $7\ 632,00 \$ + 48 \$ = 7\ 680 \$$

Le deuxième seuil limite est calculé de la manière suivante : Taux SRG pour un couple = $369,24 \$ = 370,00 \$$ (arrondi)
Seuil limite = $(370,00 \$ \times 4 \times 12) + (159,00 \$ \times 4 \times 12) = 25\ 392 \$$

Source : Loi sur la sécurité de la vieillesse, art. 17.4 et Règlement.

**E. SUPPLÉMENT DE REVENU GARANTI (SRG) ET ALLOCATION AU CONJOINT (ALC)
CALCUL DU SEUIL DE RÉDUCTION ET DU SEUIL LIMITE DE REVENU**

E.6 L'ALLOCATION — SURVIVANT

L'ALC compte deux volets : le volet correspondant à la SV, auquel on applique un taux complet ou partiel selon la résidence de la personne, et le volet équivalent au SRG, auquel on applique le taux pour un couple. Pour ces calculs, on suppose qu'un taux complet est appliqué au volet équivalent à la SV.

Sous le seuil de réduction (revenu annuel combiné de 48 \$), on applique le taux maximal à l'ALC. À partir de 48 \$ de revenu annuel combiné jusqu'au premier seuil limite, le volet de l'ALC qui correspond à la SV est versé à un taux réduit lorsque le volet correspondant au SRG continue d'être versé au taux maximal pour un couple. Entre le premier seuil limite et le deuxième seuil de réduction, le volet de l'ALC qui correspond à la SV est égal à zéro, et le volet qui correspond au SRG est toujours versé au taux complet. Du premier seuil limite jusqu'au deuxième seuil de réduction, le volet de l'ALC qui correspond à la SV est égal à zéro, et le volet correspondant au SRG est payé au taux maximal. Au deuxième seuil limite, l'ALC est égale à zéro.

Pour calculer le premier seuil limite, on arrondit au multiple de 3 supérieur la valeur mensuelle maximale de la SV. Ensuite on multiplie cette valeur par 4 et par 12 (pour obtenir un chiffre annuel). La division par 3 et la multiplication par 4 correspondent à un taux de réduction de 75 p. 100 du volet correspondant à la SV. Le montant obtenu est la limite inférieure de la dernière tranche de revenu pour laquelle le volet correspondant à la SV est égal à zéro, mais on applique encore le taux maximal au volet correspondant au SRG.

Il faut ajouter 24 \$ à cette somme afin de déterminer le deuxième seuil de réduction (à partir duquel le volet correspondant au SRG commence à être réduit).

Pour calculer le deuxième seuil limite (à partir duquel le volet correspondant au SRG est égal à zéro), on arrondit au dollar supérieur le volet de l'ALC prolongée (qui correspond au taux maximal de l'ALC (veufs/veuves) moins le taux maximal de la SV), et on multiplie ce montant par 2 et par 12 (pour obtenir un chiffre annuel). La multiplication par 2 correspond à un taux de réduction de 50 p.100 du volet correspondant au SRG. Ensuite, on ajoute cette somme à l'équivalent des 4/3 du montant de la SV (arrondi au dollar supérieur), tel que calculé pour le premier seuil limite.

Par exemple : pour juillet 2005.

Le premier seuil de réduction : 48 \$

Le premier seuil limite est calculé de la manière suivante : $SV/3 = 476,97 \$/3 = 158,99 \$ = 159,00 \$$ (arrondi)
Seuil limite = $(159,00 \$ \times 4 \times 12) = 7\ 632 \$$

Le deuxième seuil de réduction : $7\ 632,00 \$ + 24,00 \$ = 7\ 656 \$$.

Le deuxième seuil limite est calculé de la manière suivante : Volet de l'ALC prolongée = $457,27 \$ = 458,00 \$$ (arrondi)
Seuil limite = $(458,00 \$ \times 2 \times 12) + (159,00 \$ \times 4 \times 12) = 18\ 624 \$$

Source : Loi sur la sécurité de la vieillesse, art. 17.4 et Règlement.
