FOREWORD

The annual graduate follow-up survey collects information from graduates of regular and non-regular training programs approximately one year following graduation. The information gathered provides valuable feedback on the success of graduates in the labour market and is an important tool for decision-makers. This tool, along with other sources, is incorporated into the Department's planning process.

This report presents the findings of the Survey of 2001 New Brunswick Community College Graduates. The survey was conducted during a three-week period, June 17-July 5, 2002, with 2,080 graduates. This represents a response rate of 81%. Survey results indicate that graduates of the Class of 2001 were again very successful in locating employment, with an employment rate of 88%. This rate is only one percentage point lower than the highest rate ever achieved by NBCC.

The Department would like to thank the New Brunswick Community College graduates who participated in this survey; their input has been invaluable.

Graduate follow-up survey results will be located on our website at the following location:
<http://www.gnb.ca/0126/0001e.htm>.

As always, your comments and suggestions are welcome. Please forward all communication on this year's survey to:

Executive Summary

The follow-up survey of the Class of 2001 from the New Brunswick Community College generated information from 2,080 graduates, representing 81% of the 2,580 graduates to be contacted for this survey.

The points which follow present key information obtained through the 2002 survey.

- The employment rate for graduates one year following their graduation was 88%, one percentage point lower than that reported in 2001.
- The employment rate for female graduates was 91%, the same as reported in 2001.
- The employment rate for male graduates was 85%, a decrease of three percentage points from the 88% reported in 2001.
- The unemployment rate for graduates increased from 10.8% in 2001 to 12.2% in 2002.
- Overall, the percentage of related employment since graduation as a percentage of total employment decreased significantly from 87% in 2001 to 77% in 2002.
- The level of related employment *in the reference week* decreased from the 83% reported in 2001 to 81% in 2002.
- The percentage of employed graduates working in New Brunswick (90%) decreased from the 92% reported in 2001.
- The percentage of graduates in self-employment was 2% in 2002, one percentage point higher than that reported in 2001.
- The majority of employed graduates (91%) continued to be in work situations in which they were working for one employer in the reference week.
- The economic differences between the wages of men and women continues to be evident in 2002: female graduates in full-time positions earned approximately 84% of the full-time wages of male graduates in full-time positions, an increase of two percentage points over that reported in 2001. Female graduates working full-time in positions related to their training also earned 84% of the average wages of male graduates in similar positions. In 2001, female graduates working in full-time positions related to the programs completed also earned 84% of the average wage of male graduates working full-time in positions related to the program completed.

I INTRODUCTION

Follow-up surveys with graduates of New Brunswick Community Colleges have been conducted since 1983. For the past fourteen years the survey has been conducted by telephone. The survey is conducted annually with graduates of regular and non-regular programs of the Colleges. In the 2002 survey, interviews were completed with 2,080 graduates from a total listing of 2,580 graduates of the 2001 school year for whom contact information was available.

The data supplied by these surveys provides valuable feedback on the success of New Brunswick Community College graduates in the labour market which, in turn, serves as an important indicator of how well the training provided by the NBCC system corresponds to the demands of the labour market.

This report provides detailed information gathered from the Survey of 2001 New Brunswick Community College Graduates through five sections which are summarized in the material which follows.

- **Section II** presents information related to the way in which the 2002 survey was conducted and provides a profile of the graduates contacted with a comparison with the overall population of graduates.
- **Section III** presents the information highlights from the 2002 survey.
- **Section IV** presents fact sheets which report the survey information on a program-by-program basis.
- **Section V** presents labour market information on a program-by-program basis.
- **Section VI** presents the evaluations provided by graduates.

A list of terminology used in this report is provided in Appendix A.

II Methodology

II METHODOLOGY

The Survey of 2001 Graduates of the New Brunswick Community College (NBCC) was guided by researchers from the Labour Market Analysis Branch of the Department of Training and Employment Development (the Department). Any comments or questions about the information contained in this document should be forwarded to the Department.

In June 2002, the Department generated a data base with background and current contact information for 2,650 graduates from the Class of 2001 for the NBCC. The background data and required contact information was retrieved from the Department's Student Information System (SIS).

Prior to the start of the survey (in June 2002), the data base was reduced by twenty-four (24) graduates for whom no current telephone numbers were available. During the data collection period, some respondents indicated that they had not completed their program of study in 2001. Following removal of these names from the data base, and removal of the potential contacts for introductory programs which were not included in previous surveys, there were 2,580 potential contacts for the Class of 2001. The 2,080 interviews completed represent 81% of the total number of graduates who were eligible to participate in this survey.

As in previous surveys, graduates were asked about their activities during a specific week of the year (the reference week). Reference week information is an indicator of graduates' current activities. ***The reference week for the 2002 survey was June 2 – June 8, 2002.***

In addition to the reference week information and the information collected on activities since completing their training, graduates were also asked to evaluate their NBCC training program and various facilities and services available at their college.

The overall approach to the Graduate Follow-Up Survey was changed in 1996. Previously, surveys were conducted in March, capturing information from graduates of the previous academic year. The change in the time of the reference week should be kept in mind when comparing the results from the surveys in 1996 - 2002 to those conducted in previous years. For example, the question asking respondents if they were studying during the reference week gave very different results in 1996 - 2002 compared to previous years. These differences are understandable considering that most people enrolled in post-secondary institutions would be attending classes in March but not in June.

The telephone interviews with graduates were conducted by Baseline Market Research in Fredericton, NB immediately following the reference week.

The 2002 survey response rate of 81%, is slightly higher than the 80% for the 2001 survey. Over the past three years, it has required additional time for data collection to achieve the minimum response rate of 80%. While a lack of current telephone numbers has been a consistent problem, the difficulty appears more related to people's ability to identify callers prior to answering the telephone.

II METHODOLOGY

The table which follows presents a summary of response rates for the surveys over the 1998 – 2002 period.

Response Rates

		Graduates	Respondents	Response Rate
2002	Regular/Non-Regular	2,580	2,080	81%
2002	Regular	2,179	1,773	81%
2001	Regular/Non-Regular	2,716	2,179	80%
2001	Regular	2,325	1,881	81%
2000	Regular/Non-Regular	2,456	1,964	80%
2000	Regular	2,203	1,774	81%
1999	Regular/Non-Regular	2,352	1,881	80%
1999	Regular	2,155	1,738	81%
1998	Regular/Non-Regular	2,493	1,982	80%
1998	Regular	2,195	1,767	81%

Measuring labour market participation is a primary objective of the graduate follow-up surveys. Because of the importance of this information, an attempt was made to determine the extent to which a change in the time of the reference week (initiated in 1996) affected the results of reported labour force activity. The potential effects were initially monitored in the 1996 survey and the monitoring has continued through the current survey. The information from the current survey is presented in the table which follows. The data presented indicate that while the participation rate is higher in June, the employment rate for March was significantly higher than that reported for June.

II METHODOLOGY

Labour Market Indicators	2002 Survey of NBCC Graduates			
	June 2002	Percentage	March 2002	Percentage
Labour Force	2,011	--	1,896	--
Labour Force Participation Rate	97%	--	91%	--
Employed	1,765	88%	1,662	93%
Unemployed	246	12%	234	7%

The chart which follows presents an overview of the gender distribution for graduates contacted.

The table which follows presents a comparative summary of graduates contacted in follow-up surveys over the past 5 years. Prior to 2000, there had been significant increases in the percentage of graduates 25 years of age or older and significant increases in the percentage of female graduates; however, in 2002, the percentage of female graduates is two percentage points lower than reported in 2001 while the percentage of graduates 25 years of age or older increased by 2 percentage points.

II METHODOLOGY

Demographics

Gender	Male	Female
2202 Regular/Non-Regular	55%	45%
2002 Regular	53%	47%
2001 Regular/Non-Regular	53%	47%
2001 Regular	54%	46%
2000 Regular/Non-Regular	55%	45%
2000 Regular	55%	45%
1999 Regular/Non-Regular	52%	48%
1999 Regular	52%	48%
1998 Regular/Non-Regular	50%	50%
1998 Regular	51%	49%

Age	24 and under	25 and over
2002 Regular/Non-Regular	63%	37%
2002 Regular	68%	32%
2001 Regular/Non-Regular	65%	35%

2000 Regular/Non-Regular	60%	40%
2000 Regular	63%	37%
1999 Regular/Non-Regular	59%	41%
1999 Regular	61%	39%
1998 Regular/Non-Regular	55%	45%
1998 Regular	59%	41%

III Survey Highlights

III SURVEY HIGHLIGHTS

The information in this section presents a summary of research findings for the Class of 2001 along with a comparison of key variables in relation to research findings from previous years.

LABOUR FORCE INFORMATION

The labour force participation rate for all graduates increased by one percentage point compared to that reported in 2001 as did the labour force participation rate for male graduates while the participation rate for female graduates remained constant.

Labour Force Participation Rate

	Total	Male	Female
2002 Regular/Non-Regular	97%	97%	96%
2002 Regular	96%	97%	96%
2001 Regular/Non-Regular	96%	96%	96%
2001 Regular	96%	96%	96%
2000 Regular/Non-Regular	95%	95%	96%
2000 Regular	96%	96%	96%
1999 Regular/Non-Regular	95%	95%	96%
1999 Regular	95%	95%	96%
1998 Regular/Non-Regular	96%	96%	96%
1998 Regular	96%	96%	96%

The table which follows presents information to compare the findings from the Survey of 2002 NBCC Graduates to labour market information for the population of New Brunswick.

III SURVEY HIGHLIGHTS

Labour Market Indicators	Labour Force Survey	2002 Survey of NBCC Graduates		
		Overall	Regular Programs	Non-Regular Programs
Labour Force	381,300	2,011	1,712	299
Employed	344,700	1,765	1,513	252
Unemployed	36,600	246	199	47
Participation Rate	63%	97%	97%	97%
Unemployment Rate*	9.6%	12.2%	11.6%	15.7%

*Statistics Canada Labour Force Survey June 2002, seasonally adjusted. It is noted that the unadjusted unemployment rate for youth, 15-24 was 12.9% in June 2002.

The 88% employment rate reported for the 2002 survey is one percentage point lower than reported in 2001. The unemployment rate calculated for the 2002 Survey indicates that the graduates had a higher (2.6 percentage points) unemployment rate than that calculated for the province; however, the unemployment rate for graduates was marginally lower (0.7 percentage points) than the youth unemployment rate of 12.9% (unadjusted) for June 2002.

The table which follows summarizes employment rates over 1998 - 2002 by gender. The information indicates that female graduates continue to evidence a higher employment rate, overall, than male graduates.

III SURVEY HIGHLIGHTS

Employment Rate

	Total	Male	Female
2002 Regular/Non-Regular	88%	88%	91%
2002 Regular	88%	86%	91%
2001 Regular/Non-Regular	89%	88%	91%
2001 Regular	89%	88%	91%
2000 Regular/Non-Regular	89%	87%	90%
2000 Regular	89%	87%	91%
1999 Regular/Non-Regular	88%	84%	91%
1999 Regular	88%	84%	91%
1998 Regular/Non-Regular	88%	86%	89%
1998 Regular	88%	87%	88%

As evidenced in the table which follows, most graduates continue to be employed in New Brunswick although the percentage of employed graduates residing in New Brunswick decreased by 2 percentage points between 2001 and 2002.

Graduates Employed in New Brunswick

2002 Regular/Non-Regular	90%
2002 Regular	89%
2001 Regular/Non Regular	92%
2001 Regular	92%
2000 Regular/Non Regular	93%
2000 Regular	93%
1999 Regular/Non Regular	93%
1999 Regular	93%
1998 Regular/Non-Regular	92%
1998 Regular	92%

III SURVEY HIGHLIGHTS

ADDITIONAL EDUCATION/TRAINING FOR GRADUATES

In surveys prior to 2001, graduates were asked if they were attending an education or training program at the time of survey contact. In 2001 and in 2002, respondents were asked if they were “enrolled” in a program and then asked if they were currently attending the program or waiting to start the program in the near future. Among the 11% who reported enrolment in 2002, 60% were currently enrolled in a program and 40% were awaiting the start of the program

As evidenced in the table which follows, when the 2002 Survey is compared to the 2001 Survey, the level of involvement in education or training in the reference week increased by one percentage point overall and by two percentage points for graduates of regular programs.

Graduates Taking Further Study

2002 Regular/Non-Regular	11%
2002 Regular	12%
2001 Regular/Non Regular	10%
2001 Regular	10%
2000 Regular/Non Regular	9%
2000 Regular	8%
1999 Regular/Non-Regular	7%
1999 Regular	7%
1998 Regular/Non-Regular	6%
1998 Regular	6%

The table which follows demonstrates that the percentage employed since graduation has increased by two percentage points over the 1998 – 2002 period.

III SURVEY HIGHLIGHTS

Total With Employment Since Completing Training

2002 Regular/Non-Regular	98%
2002 Regular	98%
2001 Regular/Non-Regular	98%
2001 Regular	98%
2000 Regular/Non-Regular	97%
2000 Regular	98%
1999 Regular/Non-Regular	97%
1999 Regular	97%
1998 Regular/Non-Regular	96%
1998 Regular	96%

OVERALL EMPLOYMENT FOR GRADUATES

The table which follows demonstrates the percentage of graduates with at least one month of employment in a position related to their training. Overall, graduates averaged 77% of their months employed since graduation in positions related to their training. In 2001, an average of 80% of total months employed were related to training.

Total With Related Employment Since Completing Training

2002 Regular/Non-Regular	87%
2002 Regular	87%
2001 Regular/Non-Regular	87%
2001 Regular	86%
2000 Regular/Non-Regular	84%
2000 Regular	84%
1999 Regular/Non-Regular	87%
1999 Regular	87%
1998 Regular/Non-Regular	84%
1998 Regular	84%

GEOGRAPHIC LOCATION OF GRADUATES

In June 2002, 90% of 2001 graduates were residing in New Brunswick. In 2001, 92% of graduates from the Class of 2000 were residing in New Brunswick.

Approximately 16% of 2001 graduates had lived outside New Brunswick since graduation. Among those who had lived outside the province (n=323), the majority (68%) had left the province for employment. In 2002, 58% of those who left the province for employment had obtained employment prior to relocation. In 2001, 53% of graduates who left the province for employment had obtained employment prior to relocation.

Percentage of Graduates...

	Currently living in same community as before NBCC...	Lived outside NB at some point since completing training...	Of those who left - the percentage who left for employment reasons...	Of those who left for employment reasons - the percentage with a job to go to...
2002	72%	16%	68%	58%

1998 Regular	71%	26%	3%

III SURVEY HIGHLIGHTS

The percentage of graduates employed in positions directly related to their training in the reference week decreased by three (3) percentage points over that reported in 2001. Overall, related (directly and indirectly) employment has increased from 78% in 1998 to 82% in 2002.

III SURVEY HIGHLIGHTS

The percentage of graduates employed in full-time positions has decreased by one percentage point over that reported in 2001. Over the 1998 – 2002 period, there has been an increase of three (3) percentage points in full-time employment for graduates.

Full and Part-Time Employment in Reference Week

Graduates working full-time averaged 41.4 hours in the reference week for an average wage of \$511. Graduates working part-time averaged 19.9 hours for an average wage of \$243.

The table which follows provides more detailed information on wages reported by gender and by employment status.

Weekly Wages for Full and Part-Time Employment in Reference Week by Gender

	Full-time			Part-time		
	Overall	Females	Males	Overall	Females	Males
Permanent	\$503	\$446	\$542	\$229	\$231	\$223
Temporary/Casual	\$529	\$488	\$573	\$255	\$267	\$192
Self-Employment	\$571	\$469	\$681	--	--	--

Graduates were asked for their perceptions about the wages they earned in the reference week. Overall,

- 6% of employed graduates reported that their wages were “much better” than those of others in similar jobs;
- 23% reported that their wages were better;
- 54% reported that their wages were the same as those for others in similar positions; and
- 17% reported that their wages were worse (15%) or much worse (2%) than those in similar positions.

The table which follows links the perceptions about wages with the average gross wages earned in the reference week. The data suggest a clear link between the wages earned in the reference week and perceptions about those wages.

III SURVEY HIGHLIGHTS

Satisfaction With Wages

Perception Of Wages	Average FT Wage	Average PT Wage
Overall Average	\$511	\$243

INDUSTRIAL CLASSIFICATION OF EMPLOYMENT

Starting with the 1999 Survey, industries in which graduates were employed in the Reference Week were coded according to the North American Industrial Classification System (NAICS). Should researchers want to compare employment in industrial sectors for 1999-2002 with other graduate survey data, a conversion program would be required. Conversion programs are available through Statistics Canada. Note that the NAICS numbers used represent major groupings within NAICS.

III SURVEY HIGHLIGHTS

Top Ten Industries – Overall

NAICS	Industrial Sectors	Total	Full-time	FT \$	Part-time	PT \$

GENDER DIFFERENCES IN WAGES

Each graduate survey has identified gaps between the overall wages of male and female graduates. In 2002, female graduates in full-time employment positions averaged \$461 per week, while male graduates averaged 20% more at \$551 per week for full-time positions.

Since it has been demonstrated that males and females tend to be employed in different occupations, gaps may have been expected; however, as the table which follows demonstrates, similar wage gaps do not always exist when male and female graduates are employed in the same NOC (National Occupational Classification) classifications.

III SURVEY HIGHLIGHTS

Average Full-Time Wages for Male and Female Graduates in Similar Positions

Occupation (NOC)	Full-Time Weekly Salary		
	Males	Females	Female Wage Gap/Gain
ALL EMPLOYED GRADUATES	\$541	\$456	-16%
Accounting Clerks (1431)	\$433	\$424	-2%
Customer Service Representatives (1453)	\$432	\$423	-2%

Electronic Service Technologists (2242)	\$511	\$511	--
RNAs (3233)	\$593	\$549	-8%
Graphic Designers (5241)	\$500	\$463	-7%
Cooks (6242)	\$497	\$358	-28%
Wholesale Sales Representatives (6411)	\$492	\$577	+15%
Retail Sales (6421)	\$412	\$311	-25%

UNEMPLOYMENT

Overall, 12.2% of graduates contacted were unemployed in the reference week. The table which follows demonstrates that the level of unemployment varied considerably when reviewed in relation to the college attended. Information on rates within programs is presented in Section V.

Unemployment Rate by College

Bathurst	18%	Miramichi	15%
Campbellton	7%	Moncton	10%
Craft and Design	22%	Saint John	10%
Dieppe	14%	St. Andrews	18%
Edmundston	12%	Woodstock	7%

III SURVEY HIGHLIGHTS

All graduates not working in the reference week were asked for the main reason for their lack of employment.

Reasons for Not Working

Lack of Jobs	39%
Lack of Jobs Related to NBCC Training	12%
Position Recently Ended /Temporary Lay-off	12%
In an Education/Training Program	11%
Awaiting Job Start	7%
Not interested at this time	6%
Temporary Family Responsibilities	2%
Positions Available Require More Training	1%
Temporary Illness	1%
Various Other Reasons	9%
	100%

Return to School for Additional Training/Education

The 232 respondents enrolled in or attending school in the reference week provided the following reasons for their return to an education or training program:

- to upgrade existing skills (49%);
- to get a better job (19%);
- to get a university degree (12%);
- inability to find employment (6%);
- to learn a new trade (5%); or
- other reasons or multiple reasons (9%).

Employment Since Graduation

Ninety-eight percent (98%) of graduates from the Class of 2001 had been employed since graduation. Those employed averaged 1.8 different jobs. These results were the same as reported for the Class of 2000 in 2001.

III SURVEY HIGHLIGHTS

Motivations for Community College Enrollment

Beginning with the 1999 survey, all graduates were asked why they had decided to pursue their training at the NBCC rather than through a university or private training program. Overall,

- 24% chose the NBCC because it was the only place which offered the type of training desired;
- 23% indicated that the NBCC offered a less expensive alternative than either a university or a private program;
- 19% chose the NBCC because of the shorter time requirements for completion of a program of study;
- 8% based their decision on the location of a particular College;
- 7% based their selection on the reputation of the College;
- 4% based their selection on the job prospects which would exist upon completion of an NBCC program;
- 4% indicated that they had lacked the marks or other requirements for entry to a university program;
- less than 1% indicated that the course was sponsored by an employer; and
- 11% cited other or a combination of reasons.

When asked why they had selected a particular College for their program of study, the following reasons were cited:

- the convenience of the location (50%);
- the particular program was available only at the location selected (25%);
- the reputation associated with the College (9%);
- the language of instruction at the College (6%);
- recommendations of friends/relatives (4%);
- lower tuition costs (2%); and
- various other reasons (4%).

Ninety-five percent (95%) of graduates were accepted to the NBCC in the year in which they made their initial application.

Overall, 78% of graduates would select the same field of study, were they making the decision about enrollment today.

III SURVEY HIGHLIGHTS

Prior Learning Assessment and Recognition and Credit Transfer Services

Graduates were asked questions to determine their awareness, use and evaluation of PLAR and Credit Transfer Services. The material which follows provides a summary of the information collected.

Overall:

- 54% of graduates reported that they were aware of these services; and
- 46% were not aware of these services.

When contacted in 2001, 52% of graduates reported awareness of PLAR.

Among those who were aware of these services (n=1,104):

- 76% heard about PLAR through staff at the NBCC;
- 20% heard about these services through friends; and
- 4% heard about these services through other means.

Among those who were aware of these services (n=1,104):

- 24% had applied for Credit Transfer; and
- 11% had applied for a Prior Learning Assessment.

Among the 327, (16% of the graduates contacted) who had applied for one of these services, 262 received an exemption from courses based on prior experience or prior academic work at another institution. The exemptions granted resulted in a reduction of tuition for 26 graduates, a reduced course load for 242 and 23 graduates reported other effects.

The graduates who received exemptions (n=262) provided the following evaluations of the services they received:

- 42% were very satisfied with the services provided;
- 52% were satisfied;
- 4% were dissatisfied; and
- 2% were very dissatisfied.

Peer Tutoring

Fifty-six percent (56%) of graduates were aware of peer tutoring at the NBCC and 5% of graduates (n=100) contacted used the peer tutoring system at the college. When asked for their evaluation of the effectiveness of the assistance provided through peer tutoring:

- 44% provided a rating of excellent;
- 46% of those who used this service provided a good rating; and
- 10% indicated that peer tutoring was fair (7%) or poor (3%).

Post Program Artistic Involvement of NBCCD Graduates

Graduates of the College of Craft and Design (n=26) were asked about their post-training involvement with the arts community in New Brunswick. The material which follows provides a summary of the information collected.

- Since graduation, 8% of the graduates contacted have applied to the NB Arts Board or the Canada Council for funding to promote or prepare their craft. Both of those who applied received an award.
- Since graduation, 39% of those contacted reported that they have contributed to the arts through exhibits, donations or in other ways.
- During the reference week, 58% of those who had completed a program through the College of Craft and Design were practising their craft or preparing for an exhibit for which they were not paid.

The sections which follow present information about graduates on a program-by-program basis.

IV Survey Results by College and Program

IV SURVEY RESULTS BY COLLEGE AND PROGRAM

The following section contains a fact sheet for the Class of 2001, a fact sheet for each college and fact sheets for all programs for which more than 3 graduates were interviewed. Information is presented first in summary form if the program is offered in more than one location, followed by information on the program for each college.

The programs which follow, for which graduates were contacted, have been excluded from the presentation because of the small number of graduates reached (3 or less). Although excluded from this section, labour market information for these programs may be found in Section V.

VI Graduate Assessments

VI GRADUATE ASSESSMENTS

In the tables which follow, the percentages for each assessment (excellent, good, fair and poor) are based on responses from those who actually used the services. The final column in these tables (not assessed/not used) is presented for informational purposes. Overall, the use of services through the registrars' office, the library and issues related to student life activities were least likely to be evaluated by graduates.

Appendix A

Terminology

NBCC

The New Brunswick Community College is a network of eleven colleges situated throughout the province of New Brunswick.

Average Weekly Earnings

Refers to the average of the gross earnings that graduates reported for the reference week. The average weekly earnings are reported for each program and for each college where the program is offered. The figures presented are based on earnings reported by graduates who indicated that their employment was either directly or indirectly related to their training.

Employed

The number of respondents who had a job during the reference week.

Employment

Defined in terms of full-time/part-time and permanent/temporary as follows:

Full-time	Employment of 30 hours or more per week.
Part-time	Employment of less than 30 hours per week.
Permanent	Employment which has no prearranged termination date.
Temporary	Employment which ends at a prearranged date.

Employment Rate

The number of employed graduates as a percentage of those in the labour force.

Employment Related to Training

Employed graduates were asked about the extent to which their employment during the reference week was related to their training program. Options presented to the respondent included directly related, indirectly related and not at all related.

Related Employment

Includes employment that graduates reported as either directly related or indirectly related to their training program. *Directly related* means that graduates were in jobs for which their training programs had been designed. *Indirectly related* means that graduates were in jobs that required at least some of the skills that were acquired during their training program.

Not at all related

Means that graduates were in jobs that did not require any of the skills that were acquired during their training program.

Graduate Population

Graduates of regular training programs of twelve weeks or more in duration and graduates of non regular training programs of twenty weeks or more in duration that terminated between January 1, and December 31, 2001.

Labour Force

In the context of this survey, Labour Force is composed of respondents who were either employed or employed but looking for work during the reference week.

Not in the Labour Force

Respondents who were not working and not looking for work, during the reference week.

Labour Force Participation Rate

The percentage of respondents who were actively participating in the labour force during the reference week (based on the total number of respondents).

Labour Force Survey

A monthly survey by Statistics Canada which collects labour force information from a representative sample of the working age population.

NAICS (North American Industrial Classification System)

NAICS was used to categorize the industrial sectors/industries in which graduates were employed in the reference week. Fact sheets list the top three industries for employment. If the percentage of respondents is equal across occupations, the three most closely related to the training completed are listed.

NOC (National Occupational Classification)

The National Occupational Classification was used to categorize the kind of work done by graduates. The top three responses are given. If the percentage of respondents in each occupation is equal the three that appear most relevant to the program content are listed.

ProgramsRegular

Programs that operated throughout the year on a year-to-year basis. Regular training programs are funded through the departmental budgetary process. Regular training programs are listed in the annual New Brunswick Community College Calendar. (R=Regular)

Non-Regular

Programs that are offered through the New Brunswick Community College that are not part of the regular program listing in the NBCC Calendar. These programs may or may not have the same content as regular training programs of the same name. (NR=Non-Regular)

Co-Op

Cooperative Education Programs integrate periods of classroom study with periods of training in related work. Each work situation is developed and approved by the College as a suitable learning situation. Co-Op trainees are placed in productive work, receive wages and have their progress monitored by the employers and representatives of the College. (Co-Op)

Articulated

A program offered in two stages. One stage is completed at a community college, and leads to a diploma and a second is completed at a university and lead to a degree.

Reference Week

The week of June 2 - 8, 2002 served as the reference week for this survey. During the survey all graduates were asked about their activities during this week.

Response Rate

The number of respondents as a percentage of the number of graduates.

Self Employed

Someone who is working but has no employer other than her/himself.

Total Employment Since Graduation

The total number of graduates who reported that they had been employed, at some time, since completing their training at the NBCC.

Relation of Employment Since Graduation to Training

The percentage of graduates who reported that they held at least one employment positions since graduation which was either directly or indirectly related to their training program at the NBCC.
