- (1) In each column, the 1st number is the number of years with no contributions and the 2nd is the percentage of full pension.  
 Dans chaque colonne, le premier chiffre représente le nombre d'années sans cotisation tandis que le deuxième chiffre représente le pourcentage de la pension complète.

- (2) Years consecutive or not. / Années consécutives ou non.

**EXPLANATORY NOTES**

**TABLE**

**DESCRIPTION**

1	DESCRIPTION
	(1) Maximum amount paid to a person who retires at age 65.
	(2) Maximum amount for December.
	(3) \$ 750.69 if contributor was 65 of age or over as of December 1997.
	(4) \$ 764.58 if contributor was 65 of age or over as of December 1997.
	(5) \$ 777.08 if contributor was 65 of age or over as of December 1997.
	(6) \$ 786.81 if contributor was 65 of age or over as of December 1997.
	(7) \$ 798.61 if contributor was 65 of age or over as of December 1997.
	(8) \$ 814.58 if contributor was 65 of age or over as of December 1997.
	(9) \$ 829.86 if contributor was 65 of age or over as of December 1997.
	(10) \$ 843.75 if contributor was 65 of age or over as of December 1997.
	(11) \$ 859.02 if contributor was 65 of age or over as of December 1997.
	(12) Col. (A) Pension begins in year of death. Col. (B) Contributor dies in December - pension begins in January.
	(13) \$ 412.91 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(14) \$ 419.30 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(15) \$ 426.11 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(16) \$ 433.12 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(17) \$ 441.69 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(18) \$ 449.96 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(19) \$ 460.31 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(20) \$ 468.05 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(21) \$ 477.26 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(22) \$ 450.41 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(23) \$ 458.75 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(24) \$ 466.25 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(25) \$ 472.09 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(26) \$ 479.17 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(27) \$ 488.75 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(28) \$ 497.92 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(29) \$ 506.25 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(30) \$ 515.41 if contributor was 65 of age or over or receiving retirement as of December 1997.
	(31) Col. (A) For first four children up to 1977; from 1978 each child receives equal amount. Col. (B) For additional child.
	(32) Children of disabled contributor benefits started in 1970.
	(33) For the years 1978 to 1981, the amount of the benefit payable if the benefit had been received the previous year was \$48.20, \$52.54, \$57.27 and \$62.94, respectively. During these years, there was a slight difference between the amount of the benefit that was effective that year and the amount of the benefit that had been received the previous year. This difference ceased in 1982 due to the new method of calculating the benefit.
2	(A) Amount at the beginning of pension. (B) Amount in 2006.
	(1) Maximum amount paid to a person who retires at age 65.
	(2) Maximum amount for December.
	(3) Contributor dies in December - pension begins in January.
5	C.P.I. Conversion formula: (1961 to 1971 = 1.334), (1971 to 1981 = 2.369), (1981 to 1986 = 1.324), (1986 to 1992 = 1.281).
6	(1) Effective September 1975. (2) To be used until August 1975.
7	(1) In adjusting or escalating a benefit with a flat rate, the 1973 flat rate of \$28.15 is taken out before the adjustment and escalation calculation for 1974 are done. When the earning related portion is adjusted and escalated 1974, add the flat rate of \$33.76 before going on to the 1975 escalation. (2) Before applying the escalation factor of 1.041, a difference of \$142.32 was added to the 1986 flat rate of disability pensions and combined pensions in pay were recalculated according to the provisions of Bill C-116.
9	(1) In each column, the 1st number is the number of years with no contributions and the 2nd number is the percentage of full pension. (2) Years consecutive or not.

## HOW TO USE TABLE 9

The following two examples will illustrate how to use the data in the table 9 to calculate the percentage of the maximum Retirement pension a contributor could receive when he retires at age 65 depending on the number of years he has contributed to the Plan.

### Example 1 (figure blocked)

If a contributor was 33 years of age at the inception of the Plan in 1966, had made contributions to the Plan for 26 years, had 6 years without contributions, that contributor could drop-out 15% or 4 years and 10 months (4.10 / 12) of those 6 years without contributions and therefore would receive only 95.7%.

### Example 2 (figure blocked)

If a contributor was 45 years of age at the inception of the Plan in 1966, had made contributions to the Plan for 17 years, had 3 years without contribution, that contributor could drop-out 15% or those 3 years (3.0) without contributions and therefore would receive the full 100% of the retirement pension payable at age 65.

## COMMENT UTILISER LE TABLEAU 9

Les deux exemples suivants illustreront la façon d'utiliser les données du tableau 9 pour calculer le pourcentage de la pension de retraite maximum qu'un cotisant pourrait recevoir quand il prendra sa retraite à l'âge de 65 ans en tenant compte du nombre d'années pendant lesquelles il a contribué au Régime.

### Exemple 1 (chiffres encerclés)

Un cotisant avait 33 ans au début du Régime en 1966: il a versé des cotisations au Régime pendant 26 ans et il n'a pas versé de cotisations pendant 6 ans. Dans cette situation, le cotisant pourrait retrancher 15% ou 4 ans et 10 mois (4.10 / 12) des 6 années sans cotisations. De ce fait, il ne recevrait donc que 95.7% de la pension de retraite complète à l'âge de 65 ans.

### Exemple 2 (chiffres encadrés)

Un cotisant avait 45 ans au début du Régime en 1966: il a versé des cotisations pendant 17 ans et il n'a pas versé de contributions pour une période de 3 ans. Dans cette situation, le cotisant pourrait retrancher 15% ou les 3 années (3.0) sans cotisations. Il recevrait donc 100% de la pension de retraite complète payable à l'âge de 65 ans.
