# Notice of Hearing

---

September 13, 2006

Ref. 2006-H-114

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing to consider an application by Ontario Power Generation Inc. (OPG) to authorize an amendment to the operating licence for the Darlington nuclear generating station (NGS), located in Darlington, Ontario.

The proposed amendment pertains to the implementation of the requalification testing of certified shift personnel.

The Commission has determined that a public hearing in this case is not necessary to consider OPG's application for amendments to the Darlington NGS operating licence. The hearing will be conducted by way of written submissions.

Following the deliberations and decision of the Commission on this matter, a *Record of Proceedings, including Reasons for Decision* will be published and made available to the public.

Submissions from CNSC staff and OPG have been filed with the Secretariat. The hearing documents (submissions) are not available on-line and must be requested through the Secretariat at the address below:
