

Notice of Hearing

September 13, 2006

Ref. 2006-H-113

The Canadian Nuclear Safety Commission (CNSC) will hold a hearing to consider an application by Ontario Power Generation Inc. (OPG) to authorize amendments to the operating licences for the Pickering A and Pickering B nuclear generating stations (NGS), located in Pickering, Ontario.

The proposed amendments pertain to the implementation of the requalification testings of certified shift personnel. OPG has also applied to change the licence reference to the latest revision of the Pickering A Safety Report.

The Commission has determined that a public hearing is not necessary in this case to consider OPG's application for amendments to the operating licences for Pickering A and Pickering B. The hearing will be conducted by way of written submissions.

Following the deliberations and decision of the Commission on this matter, a *Record of Proceedings, including Reasons for Decision* will be published on the CNSC Web site and made available to the public.

Submissions from CNSC staff and OPG have been filed with the Secretariat. The hearing documents (submissions) are not available on-line and must be requested through the Secretariat at the address below:
