Radiation Safety Data Sheet

This data sheet presents information on radioisotopes only.

For information on chemical compounds incorporating this radionuclide, see the relevant Material Safety Data Sheet.

Part 1 - RADIOACTIVE MATERIAL IDENTIFICATION

Chemical Symbol:	Ga	Common Names:	Gallium
Atomic Weight:	67	Atomic Number:	31

Part 2 - RADIATION CHARACTERISTICS

Physical Half-Life: 78.26 hours

CNSC Exemption Quantity (in Bq): 1×10^6 (1 MBq)

A CNSC license is not required if the amount of radioactive nuclides possessed is less than one Exemption Quantity.

Principal Emissions	Average Energy (MeV)**	Maximum Energy (MeV)***	Dose Rate at 1m Distance (mSv/h/GBq)	Recommended Shielding
Neutrons	-	-	-	-
Gamma & X-rays	0.09331	-	0.03	6 mm Pb
Beta*	-	-	-	-
Alpha	-	-	-	-

* Where beta radiation is present, bremsstrahlung radiation will be produced. Shielding may therefore be required.

** Average energy of most abundant emission.

*** Maximum of most abundant emission.

Progeny	n/a
---------	-----

Part 3 - DETECTION AND MEASUREMENT

Method of Detection: Geiger-Mueller detector, NaI(Tl) detector, Liquid scintillation

Dosimetry:

External: TLD (whole body & skin) T Extremity T Neutron

Internal: Whole body Thorax Urine analysis T Other (specify)

Part 4 - PREVENTATIVE MEASURES

Rare occurrences of allergic reactions, skin rash, and nausea have been reported in association with Ga-67 use. Gallium 67 citrate solution may emit radioactive fumes containing Ga-67 when heated to decomposition.

Recommended protective clothing: Disposable plastic, latex, or rubber gloves. Wear a lab coat, which must be monitored before leaving the laboratory. Also wear safety glasses.

Handling time should be kept to a minimum and syringe shields and tongs should be used. Consult CNSC license for requirements concerning engineering controls, protective equipment, and special storage requirements.

Part 5 - ANNUAL LIMIT ON INTAKE

Compound Type	Ingestion	Inhalation	
		Unspecified compounds	Oxides, hydroxides, nitrates, halides, carbides
Annual Limit on Intake (Bq)	1E+08	2E+08	7E+07

EMERGENCY PROCEDURES

The following is a guide for first responders. The following actions, including remediation, should be carried out by qualified individuals. In cases where life threatening injury has resulted, **first** treat the injury, **second** deal with personal decontamination.

Personal Decontamination Techniques

- C Wash well with soap and water and monitor skin
- C Do Not abrade skin, only blot dry
- C Decontamination of clothing and surfaces are covered under operating and emergency procedures

Spill and Leak Control

- C Alert everyone in the area
- C Confine the problem or emergency (includes the use of absorbent material)
- C Clear area
- C Summon Aid

Emergency Protective Equipment, Minimum Requirements

- C Gloves
- C Footwear Covers
- C Safety Glasses
- C Outer layer or easily removed protective clothing
- C Suitable respirator selected
