

# Record of Proceedings, Including Reasons for Decision - Errata

In the Matter of

Applicant Ontario Power Generation Inc.

Subject Application to Construct Two Refurbishment  
Waste Storage Buildings and a Low-Level  
Waste Storage Building at the Western Waste  
Management Facility at the Bruce Nuclear Site

Date May 8, 2006

## ERRATA

**Ontario Power Generation Inc.  
Application to Construct Two Refurbishment Waste Storage Buildings and a  
Low-Level Waste Storage Building at the Western Waste Management Facility  
at the Bruce Nuclear Site, Kincardine Ontario**

Ontario Power Generation Inc. (OPG) applied to the Canadian Nuclear Safety Commission (CNSC<sup>1</sup>) for a licence amendment to permit the construction of two Refurbishment Waste Storage Buildings (RWSB) and the construction of an additional Low Level Storage Building (LLSB #10) at the Western Waste Management Facility (WWMF) at the Bruce Nuclear Site in the Municipality of Kincardine, Ontario. The Commission approved the application and issued a Record of Proceedings, including Reasons for Decision on April 11, 2006.

The following corrections are made to the English and French version of the *Record of Proceedings, including Reasons for Decision* issued by the Canadian Nuclear Safety Commission on April 11, 2006.

Paragraph 29, page 5, 2<sup>nd</sup> sentence:

“OPG noted that there was no flammable material inside the buildings or containers and thus the containers were not designed or tested for fire sustainability.” is replaced with:

“OPG noted that there was no flammable material inside the RWSB buildings or containers and that the containers were not designed or tested for fire sustainability.”

---

Marc Leblanc  
Secretary of the Commission

---

<sup>1</sup> In this *Record of Proceedings*, the *Canadian Nuclear Safety Commission* is referred to as the “CNSC” when referring to the organization and its staff in general, and as the “Commission” when referring to the tribunal component.
