7. Provide a list of all locations (with complete addresses) where the licensed activity has been conducted for more than 90 consecutive days during the reporting period. If the licensed activity has been conducted in more than one location, use the same format and list all locations that remain in use or storage.
  - Address \_\_\_\_\_
  - City: \_\_\_\_\_ Province: \_\_\_\_\_
  - Postal Code: \_\_\_\_\_
  
- 7.1 Indicate those locations that have become inactive and have been decommissioned.

**8. Inventory**

Provide detailed information for all:

- radiation devices containing sealed sources; and
- sealed sources that are not contained in radiation devices.

Device			Sealed Source or Sealed Source Assembly						Authorized Location <sup>b</sup>
Manufacturer	Model	Serial Number	Manufacturer	Model	Serial Number	Nuclear Substance	Nominal Activity <sup>a</sup> Bq	Reference Date <sup>a</sup> (YYYY/MM/DD)	

<sup>a</sup> The activity of the nuclear substance in the sealed source or sealed source assembly on the reference date (date when the activity was measured or source calibrated).

<sup>b</sup> The address of the location authorized by the CNSC where the sealed source (whether in or outside of the device) resides at the time of the report. In the case of field operations with sealed sources, enter the storage location.

**9. Radiation Protection Program**

Provide information on any changes made to the radiation protection program, including changes to policies or procedures, on a separate sheet and submit it with this report.

**10. Incidents and Unusual Occurrences**

List all incidents and unusual occurrences not previously reported to the CNSC during the reporting period

Date of event	Type of event	Nuclear substance (if applicable)	Radiation device or prescribed equipment (if applicable)

**11. Worker Qualifications**

Provide the number of workers at each location that are trained in various levels of radiation safety. Provide the information in detail, as shown below:

Location of work	Number of workers with basic awareness training (e.g. working in the vicinity, but do not handle radioactive materials)	Number of qualified workers (e.g. trained and authorized to use nuclear substances, or to handle, operate or maintain radiation devices)	Number of workers with advanced level training(e.g. trained and qualified as Radiation Safety Officers or alternates)

**12.** Provide a summary of the annual effective whole body radiation doses received by Nuclear Energy Workers (NEWs) and non-NEWs during the year ending December 31<sup>st</sup>. Provide the information in detail, as shown below:

	Number of workers in each effective dose (mSv) category					Dosimetry service provider <sup>1</sup>	Maximum individual dose (mSv)
	<0.50	0.50 to 1.00	1.01 to 5.00	5.01 to 20.00	>20.00		
Number of NEWs							
Number of non-NEWs							

<sup>1</sup>Enter the name of the dosimetry service provider. If a dosimetry service provider is not used, provide brief details on how dose estimates were derived.

**13.** If you are a portable gauge licensee and do not provide dosimeters to workers from a licensed dosimetry service, provide information for the reporting period according to the following table.

Number of workers operating portable nuclear density gauges	Number of workers performing less than 800 density tests	Number of workers performing between 800 and 4000 density tests	Number of workers performing more than 4000 density tests	Maximum number of density tests by a single worker

**14. Declaration by Radiation Safety Officer/Licence Contact Person**
