

2004 Workshops

5*22

5*22 is a health and safety framework which provides useful information and tools to help workplaces develop action plans, and implement safe work practices. The information offered during the workshop will give you an understanding of “what is health and safety” as well as a practical framework to utilize in your workplace.

JHSC Core Training Program

This new 3-day program has been designed to provide your company’s JHSC members with the essential training that is necessary to function effectively as JHSC members. This workshop covers the following topics:

- 1 day on 5*22 – What is health and safety, as well as an overview of current NB health and safety legislation (the *OHS Act, Regulation 191* and WHMIS),
- 1 day on ‘How to establish and maintain an effective Joint Health and Safety Committee in your workplace’, and
- 1 day on hazard identification and workplace inspections, accident investigation / causation and prevention resources.

Identification of Workplace Hazards & Risks

Many workplace accidents can be prevented through an aggressive workplace inspection program. Learn how to implement such a program and, in the process, identify and eliminate some of those hazards and risks that are just accidents waiting to happen.

Injury Analysis & Accident Investigation

If an accident happens in your workplace, are you prepared to do a systematic analysis to determine its cause and hopefully prevent another one from happening? Learn how to properly analyze an accident, to understand the real cause(s) and how to make the necessary changes to prevent a recurrence.

Developing Your Health & Safety Plan

Good health and safety programs don't just happen – they must be developed. Learn what fundamentals should be included in your company’s health and safety plan, then discuss with other health and safety professionals how to create your plan, implement your plan and most importantly, how to follow-up to make sure that your plan is successful. An effective plan will help ensure that your company’s health and safety program grows along with your company.
