

Significant Weather Preparedness Workshop

Course Sponsor:

Manitoba Emergency Measures Organization (MEMO)

Target Audience:

Open to all

Course Description:

Duration – half day

The topic of Climate Change is on the minds of many emergency planners. How will Global Warming impact on specific regions of the country? This workshop will share the latest predictions associated with Global Climate Change. It will also describe some of the potential impacts including changes of weather patterns, socioeconomic and natural habitat changes.

Course Objectives:

Summer Weather Hazards & Climate Change

- Introduction to the summer weather hazards on the Canadian Prairies. It will show you the
- Types of summer weather that you should be concerned about throughout this active and potentially dangerous season.
- Examples of the worst summer storms to hit southern Manitoba.
- This session will also provide you with information to stay safe during the storm and in its aftermath.

Winter Weather Hazards & Climate Change

- Introduction to the winter weather hazards that affect Manitoba.
- Types of winter weather that you should be concerned about throughout this potentially dangerous season.
- Examples of the worst winter storms to hit the Prairie Provinces.
- This session will also provide you with information to stay safe during the storm and in its aftermath.

Prerequisite:

None
