Personal Pandemic Planning Guide

Drilling down at home

City of Leduc Pandemic Planning

Drilling down at home

The City of Leduc's Pandemic Planning Team has been actively working for over a year developing plans and strategies to ensure that the City of Leduc's critical and essential services can continue during a pandemic influenza or any other infectious disease outbreak. An important component of the plan is ensuring that Leduc residents are prepared and have the ability to care for themselves and for their families.

This Personal Pandemic Planning Guide is meant to assist you in developing your own plans for at home. Once you have developed your own personal strategy, we recommend that you post your plan on your fridge and revisit it frequently.

You will quickly notice that many of these questions relate to children and childcare arrangements. During an infectious disease outbreak, there is the potential for schools and daycares to be closed down. It is important, therefore, to plan for alternative childcare arrangements if you rely on schools and daycares. Those who care for the elderly or other individuals with special needs could also have challenges that require pre-planning.

We hope you find this guide helpful and invite you to contact us if you have any questions or concerns regarding this planning guide or any other questions regarding pandemic planning.

THE GOVERNMENT SAYS IT'S INEVITABLE
THAT MIGRATING BIRDS WILL BRING THE DEADLY
STRAIN OF BIRD FLU TO THE WITED STATES THIS
YEAR, BUT CAUTIONS AGAINST PANIC.

ADVICE, BOB.

Don't be scared—be prepared!

This booklet contains information to help with your Personal Pandemic Planning:

- $\sqrt{}$ Questionnaire to assist with your personal plans
- √ Personal & Family Emergency Health Information Sheet
- √ Emergency Contact List
- $\sqrt{}$ Planning tips and checklists

Personal Planning Questionnaire

Do you have children?	0-4	Ages
Do you have children with special needs?	5-12 13-18	
Is there another parent or guardian?		
Does that person live in Leduc?		
Does that person live with you?		
Does the other parent or guardian work? Stay at home?		-
Can the other parent/guardian/caregiver work from home?		
What are your current childcare arrangements?		
 Daycare Day home Other parent/guardian In house nanny or babysitter Family member 		
Do you have other family or friends in the area that would be willing and able (List names, phone numbers)		
If schools/daycares/day homes were closed, what are your alternatives for chi	ldcare?	
Option 1:		
Option 2:		
Option 3:		·

Personal Pandemic Planning Guide

Do you provide care, in house or otherwise, for another family member or adult who may be ill or have other special needs?
Is there another caregiver to assist you?
Does that person live in Leduc?
Does that person live with you?
Does the other caregiver work? Stay at home?
Can the other caregiver work from home?
What other services do you use to assist with this care?
Which of these services are you most dependent on?
What arrangements will you have to make if these services are not available during a pandemic?
If you absolutely could not make any alternative arrangements for care of persons at home, please consider the following questions:
Can you do your job from home?
What portions of your job could be done from home?
What do you need in order to do your job from home?
Have you met with your employer to discuss working from home during a pandemic influenza situation if the need arose?

Other considerations:

Do you have any pets? (type, number)
Do you live on an acreage or farm with animals? (type, number)
Do any of these animals have any special care requirements?
Do you have someone to look after your animals if you become ill or have to be away from home for extended periods of time? (Name, phone number)

Make sure you contact all the people you have listed in your plan as alternative caregivers, whether for people or animals, so they can include you in their own pandemic plans.

Personal and Family Emergency Health Information

Your Personal Pandemic Plan

Working through a plan like this can often prompt you to think of other things that may not be contained within this Planning Guide. That's great! Here's your opportunity to write out the things that you need to consider and take care of in case of a pandemic influenza situation.

Personal Pandemic Planning Guide

Pla	an for a Pandemic:		
	Store extra food and water. During a pandemic, you may not be abl be out of supplies.	e to get into a store, or they might	
	Ask your doctor for an extra supply of your regular medications and follow proper storage instructions.		
	Have on hand an extra supply of non-prescription medications for common ailments.		
	Make plans for caring for ill family members at home. Check in on neighbours, such as seniors, who may need assistance.		
	Volunteer with local groups to prepare and assist with emergency re	sponse.	
	Get involved with your community to prepare for influenza pandem		
	Ipplies to have on hand: Ready-to-eat canned meats, fruits, vegetables, and soups Protein or fruit bars		
	Dry cereal or granola	H	
	Peanut butter or nuts	How much water?3 litres per person/day	
	Dried fruit	• 1 pint per cat/day	
	Crackers	• 1 gallon per dog/day (size	
	Canned juices	dependent) for a two week period.	
	Bottled water	101 a two week period.	
	Canned or jarred baby food and formulas		
	Pet food		
	Manual can opener		
	Prescribed medical supplies (glucose and blood-pressure monitoring	equipment)	
	Soap and water or alcohol-based hand wash (hand sanitizer)		
	Medicines for fever (acetaminophen or ibuprofen)		
	Thermometer		
	Anti-diarrheal medication		
	Vitamins		
	Fluids with electrolytes		
	Cleansing agent/soap		
	Flashlight, batteries, portable radio		
	Garbage bags		
	Tissues, toilet paper, disposable diapers, feminine		
	hygiene products		

Key facts About Avian Flu

What is Avian Influenza (Bird Flu)?

It is an influenza type A virus normally found in wild birds, and does not normally make them sick. When the virus infects domestic poultry, the disease and death rates are very high. There are several different types of viruses in birds, but the current major concern is the H5N1 strain.

Do bird viruses infect humans?

Not normally, but there have been confirmed cases by the World Health Organization (WHO) resulting in deaths

What are the symptoms of bird flu in humans?

They generally start as typical flu-like symptoms, with fever, cough, sore throat and muscle aches. They can progress to severe respiratory infections and life threatening complications. The specific symptoms depend on the specific virus that caused the infection.

How does bird flu spread?

Infected birds shed the virus in their saliva, nasal secretions and feces. Susceptible birds get the virus after coming in contact with contaminated secretions. It is believed that infections in humans have resulted from contact with infected poultry or contaminated surfaces.

What is the risk to humans from bird flu?

The risk is generally low to most humans because the viruses occur mainly in birds and do not usually infect humans. The current outbreak of avian influenza in poultry in Asia is an example of an outbreak that has caused human illness and deaths. In these situations, humans should avoid contact with infected birds or contaminated surfaces and be careful when handling and cooking poultry.

Is there a vaccine to protect humans from the H5N1 virus?

There is currently no vaccine to protect humans against the H5N1 virus. Vaccine development continues, and several pharmaceutical companies are working vigorously to create one.

General signs and symptoms of typical influenza and Avian Influenza cases to date

Typical Influenza:

- Fever, cough, sore throats
- Muscle aches
- General malaise
- Upper respiratory infection

Avian Influenza includes typical influenza signs and symptoms, plus:

- Eye infections
- Pneumonia
- Severe respiratory complications
- Life threatening complications

Limit the spread of germs and prevent infections:

☐ Teach yo	our children to wash hands frequently with soap and water. Make sure yo	ou do the same.
☐ Teach yo	our children to cover coughs and sneezes with tissues or their forearm. Le	ead by example.
	e yourself from others who are sick. Keep yourself and your children hom hen sick.	ne from school or

Easy Tips to Reduce the Risk

COVER THAT COUGH!

- Use a tissue to cover your mouth and nose when you cough or sneeze and throw the tissue into the garbage immediately.
- Don't use your hands to catch your cough or sneeze! Use your arm or elbow to cover your face.

ABCs of HANDWASHING

- Recite the alphabet twice when washing your hands and always use soap and warm water.
- Keep a hand sanitizer with you as back up or for extra protection.

WHEN TO WASH

- After you cough or sneeze.
- Each time you use the bathroom.
- When caring for a sick person.
- After handling garbage or animal waste.
- Before and after handling food.

KEEP IT CLEAN!

- Keep your home and work areas clean by using household detergents.
- Sterilize surfaces with bleach (3/4 cup bleach to 1 gallon water) or with rubbing alcohol (undiluted).

YOU'RE IN MY SPACE!

- Try to avoid crowds, especially in peak flu season.
- Restrict your travel.
- Do you commute to school or work on public transportation? Be sure to follow proper hygiene as noted above.

Visit the Pandemic Planning Page on the City of Leduc website for more information on personal care, cleaning, and social distancing to help reduce the risk of contracting or spreading the flu! www.leduc.ca/pandemic

The only thing tougher than planning for a disaster is explaining why you didn't.
