

YEG ESSENTIALS, 2006

- **Critical review** by an appropriate person
- Submit entire paper in **digital format** and as **hard copy** to editors.
- Text file for paper to include list of figure captions at the end. Separate file for each figure/table/photo. Supply a list of headings for the sections in your paper to guide the designer. This should show the hierarchy of headings, by indentation.

Text

- All measurements should be provided in metric units, although standard units may also be included.

Figures

- Remember, the YEG is black (grey) and white. If you send us a colour figure, it will be converted to greyscale. Consequences: new fills required, loss of contrast in photos, etc.
- **Do not embed figures** in the text file
- Figures no larger than 8.5 X 11 page.
- **Adobe Illustrator** is preferred. If your figures are in another format, let us know as soon as possible so we can see if it can be used.
- Graphs need separate file with raw numbers upon which they are based.

Photos

- Photos scanned (200-300 dpi) in colour as RGB. Slides scanned at 1600 dpi.
- **Do not add linework** or lettering to photos. Indicate these on the hard copy and we will add them to the digital image.
- **Scales** for all photos/photomicrographs. Can be in figure caption, e.g., "Clast is 4 mm across."

Maps

- Reasonable level of complexity - features must be readable
- Maps and cross-sections must have **scale, north arrow, latitude/longitude** or **UTM coordinates** (with NAD designation).

References

- Only cite work that is, or will eventually be available to the public. Make sure all information that is not common knowledge is referenced.
- **Abstract 150 words** or less. Important for the layout - both English and French abstracts must fit on one page. Please provide French translation if you can
- Abstract Deadline: November 20, 2006.
- Manuscript Deadline: December 4, 2006.
- **Following submittal of manuscript, authors must make themselves available to thoroughly review editorial comments**, suggestions and questions over the next week. Authors must make appropriate changes before resubmitting to the editors.
