

## **DISCLAIMER**

Nothing in the Yukon Government Best Management Practices (BMPs) information site or web portal and associated documents, brochures, maps, references, etc, shall be construed as waiving compliance with regulatory requirements imposed by law. It remains the responsibility of commercial or industrial operators to satisfy themselves that the measures adopted in the specific instance are appropriate to the situation and satisfy all legal requirements within the jurisdiction. Legal requirements may be imposed by Territorial, First Nation or Federal regulatory bodies.

Specific BMPs for specific problems cannot be given since solutions will, of necessity, be site and issue specific. Narrative BMPs are given indicating the type of measure which may be useful. Technical engineering prescriptions on how to build specific works or devices are beyond the scope of this project and the assistance of consulting engineering firms is recommended if you do not know how to construct, maintain or operate the relevant BMP or device. Mention of trade names, commercial products or machinery does not constitute endorsement, or recommendation for use.

This guide is intended to provide users with up-to-date information about best management practices for oil and gas exploration on the Yukon Landscape but this project should not be considered as complete. There are both known and unknown sources of data which have not yet been incorporated and topics which have not yet been treated or addressed. These topics and data will be incorporated and new versions of the web portal uploaded as time and resources permit. By their very nature many specific BMPs soon become obsolete as 'Better' BMPs become available but the concept and the required objectives behind the examples given usually remains valid.
