

Youth Exploring Trades

Y.E.T. 2006

Brief Overview:

Ready to try something different. Like using tools and creating masterpieces with your own two hands. Well then, Youth Exploring Trades (YET) is for you. The Department of Education, Advanced Education in partnership with Skills Canada Yukon offer trades camps to youth ages 11 to 15 to explore the industry and gain hands on experience using tools of the trade. Guest speakers and instructors assist camps offering expert advice and instructional tips to youth on how to improve, build and design their soap box racer. Each camp ends with a race day and BBQ, where each team can race their master craft seeing if it performs as design had suggested. The camps are challenging, fun and are combined with extra curricular recreational activities to offer breaks from the stress of building the ultimate racing machine. Get involved this summer and test your building creativity.
