AVANT-PROPOS

Introduction

Le présent rapport renferme les données statistiques et financières recueillies par la direction générale de l'analyse de la radiodiffusion, à partir des rapports annuels des entreprises de distribution de radiodiffusion (EDR). Les sections I, II et III fournissent des données sur les services de base, les services non de base et tous les services des systèmes de distribution de radiodiffusion de classe 1. Tous les services comprennent les services de base, non de base et les autres services. Les autres services incluent les services hors programmation et les services exemptés. La section IV fournit les contributions financières à la création et à la production d'émissions canadiennes par les EDR de l'industrie. La section V fournit des données statistiques et financières pour les entreprises de distribution par satellite de radiodiffusion directe (SRD) et les systèmes de distribution multipoint (SDM).

Confidentialité

Ces relevés de l'industrie de distribution de radiodiffusion peuvent être distribués au grand public. Dû à la confidentialité des données, les données provinciales ne sont pas disponibles.

Notes

- La publication de la distribution de radiodiffusion fournit des données financières et opérationnelles pour les systèmes de classe 1 seulement. Les données pour les classes 2 et 3 ne sont pas incluses dû au nombre élevé d'exemptions de licence accordées par le Conseil conformément aux Décisions CRTC 2002-45, 2002-88, et 2004-382
- Les frais d'intérêt sont généralement alloués par le siège social, ce qui explique les variations élevées entre les années.
- Les "ajustements" incluent les éléments non-opérationnels tels que les frais de restructuration, l'amortissement, de l'achalandage et les gains et pertes sur dispositions
- Les données présentées dans ce rapport peuvent être révisées si le Conseil reçoit de l'information additionnelle et/ou révisée. La direction générale de l'analyse de la radiodiffusion désire être avisée de tout problème découvert avec ces statistiques.

FOREWORD

Introduction

This report presents a summary of statistical and financial data produced by Broadcast Analysis Branch based on the Broadcast Distribution Undertaking (BDU) annual returns. Sections I, II and III provide data related to each of basic programming services, non basic programming services and all services combined, for class 1 distribution undertakings. All Services summaries consist of basic, non basic and other services results. Other services includes the results of non-programming and exempt services. Section IV provides contributions to the creation and production of Canadian programming by the BDU industry. Section V presents statistical and financial data for Direct-to-Home (DTH) and Multipoint Distribution System (MDS) undertakings.

Confidentiality

These summary reports of the broadcast distribution industry may be distributed to the public. Due to confidentiality of data, individual provincial data are not available.

Notes

- The broadcast distribution publication provides financial and operational data for class 1 undertakings only. Class 2 and 3 data are not included due to the large number of licence exemptions granted by the Commission pursuant to CRTC Decisions 2002-45, 2002-88 and 2004-382
- Interest expense is generally allocated from head-office which explains the wide variances from year-to-year.
- "Adjustments" are the result of such non-operational items as restructuring costs, amortization of goodwill and gains/losses on disposal
- Data contained in this report are subject to change as the Commission receives additional or revised information. The Broadcast Analysis Branch would appreciate being informed of any problems encountered with these statistics.
