AVANT-PROPOS

Introduction

Le présent rapport renferme les données statistiques et financières recueillies par la direction générale de l'analyse de la radiodiffusion, à partir des rapports annuels des entreprises de distribution de radiodiffusion (EDR). Les sections II et III fournissent des données sur les services du volet de base et tous les services des systèmes de télédistribution classes 1 et 2. Tous les services comprennent les services du volet de base et les services autres que ceux du volet de base. Les services autres que ceux du volet de base incluent les services optionnels suivants les émissions spécialisées, les services de télévision payante, les services hors programmation, les services exemptés et les autres services. La section IV fournit les contributions financières à la création et à la production d'émissions canadiennes par les EDR de l'industrie. La section V fournit des données statistiques et financières pour les systèmes de radiodiffusion directe par satellite (SRD) et les systèmes de distribution multipoint (SDM). Lorsque des variations dans les méthodes de comptabilité et de rapport sont constatées, certaines corrections sont apportées aux rapports après consultation avec les titulaires. La direction générale de l'analyse de la radiodiffusion désire être avisée de tout problème que l'utilisation de ces statistiques pourrait poser.

Confidentialité

Ces relevés de l'industrie de distribution de radiodiffusion peuvent être distribués au grand public. Due à la confidentialité des données, les données provinciales pour Terre-Neuve, l'Île-du-Prince-Édouard, la Nouvelle-Écosse et le Nouveau-Brunswick ne sont pas disponibles.

Notes

Une nouveauté pour 2001, la publication de la distribution de radiodiffusion fournit des données financières et opérationnelles pour les systèmes de **classe 1 et de classe 2 seulement**. Les données pour les classes 3 ne sont pas incluses dû au nombre élevé d'exemptions de licence accordées par le Conseil conformément aux Décisions CRTC 2002-45 et 2002-88.

La publication des sommaires financiers des entreprises de distribution de radiodiffusion pour 1998 comprend l'amortissement comptable annuel présenté dans les états financiers de la titulaire. Il s'agit là d'un écart par rapport à nos publications antérieures, de 1997 et des années antérieures, qui utilisaient un amortissement normalisé reposant sur les taux d'amortissement prescrits par le Conseil pour chaque catégorie d'immobilisations applicable aux titulaires d'entreprises de distribution de radiodiffusion de classe 1 et 2. Il v a lieu de noter que le Conseil continue d'utiliser l'amortissement normalisé

Les ajustements pour 1998 ont augmenté de plus de 50 % pour les services du volet de base et tous les services, à cause des augmentations des autres revenus au Québec et au Manitoba.

Les données présentées dans ce rapport peuvent être révisées si le Conseil reçoit de l'information additionnelle et/ou révisée.

FOREWORD

Introduction

This report presents a summary of statistical and financial data produced by Broadcast Analysis Branch based on the Broadcast Distribution Undertaking (BDU) annual returns. Section II and III provide data related to basic-tier and all services, for class 1 and 2 distribution undertakings. "All Services" summaries consist of basic-tier and discretionary-tier services results. The latter includes all optional tiers for specialty television service, pay television services, non-programming, exempt, and other services. Section IV provides contributions to the creation and production of Canadian programming by the BDU industry. Section V presents statistical and financial data for Direct-to-Home (DTH) and Multipoint Distribution System (MDS) undertakings. Where variations from accepted accounting and reporting practices are identified, adjustments are made to the information returns in consultation with the licensees. The Broadcast Analysis Branch would appreciate being informed of any problems encountered with these statistics.

Confidentiality

These summary reports of the broadcast distribution industry may be distributed to the public. Due to confidentiality of data, individual provincial data for Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are not available.

Notes

New for 2001, the broadcast distribution publication provides financial and operational data for **class 1 and class 2 undertakings only**. Class 3 data is not included due to the large number of licence exemptions granted by the Commission pursuant to CRTC Decisions 2002-45 and 2002-88.

The 1998 broadcast distribution publication of financial summaries includes annual book depreciation reported in the licensee's financial statements. This is a departure from our previous publications issued on or before 1997 which used standardized depreciation based on depreciation rates prescribed by the Commission for each class of fixed assets applicable for licensees of class 1 and 2 cable systems. Please note that the Commission continues to use standardized depreciation in dealing with all rate increase applications.

The adjustments for 1998 increased by more than 50% for both basic and all services due to increases in other income in Québec and Manitoba.

Data contained in this report are subject to change as the Commission receives additional or revised information.
