2. **Haldimand County, Ontario**
Application No. 2005-0546-4

Application by **Bel-Roc Communications Inc.** (Bel-Roc) for the use of frequency 92.9 MHz (channel 225B1) for the operation of the new FM station approved in Broadcasting Decision CRTC 2005-169, dated 20 April 2005 (Decision 2005-169).

The present application is filed in response to Decision 2005-169 in which the Commission stated that it would only issue a licence to Bel-Roc if it submitted an application proposing the use of another FM frequency that is acceptable to both the Commission and the Department of Industry.

Bel-Roc is also proposing to change the authorized contours by decreasing the effective radiated power from 13,300 watts to an average effective radiated power of 3,300 watts, by increasing the antenna height and by relocating the transmitter (maximum effective radiated power of 13,000 watts/antenna height of 109.4 meters).

The 92.9 MHz frequency is technically mutually exclusive with an application submitted by CHCD Inc. (2005-0603-2).

The licensee proposes to add an FM transmitter at Haldimand County to broadcast the programming of CHCD-FM, in order to serve the population of Haldimand County.

The transmitter would operate on frequency 93.1 MHz (channel 226A) with an average effective radiated power of 1,352 watts (maximum effective radiated power of 6,000 watts/antenna height of 83.7 metres).

The 93.1 MHz frequency is technically mutually exclusive with an application submitted by Bel-Roc Communications Inc. (2005-0546-4).

Application by **CJRT-FM Inc.** relating to the licence of radio programming undertaking CJRT-FM Toronto.

5. **Toronto, Ontario**
Application No. 2005-0350-0

Application by **Durham Radio Inc.** to amend the licence of radio programming undertaking CJKX-FM Ajax, Ontario.

The licensee proposes to add an FM transmitter at Toronto to broadcast the programming of CJKX-FM in order to adequately serve the population of downtown Toronto.

The transmitter would operate on frequency 95.9 MHz (channel 240A) with an average effective radiated power of 85 watts (maximum effective radiated power of 220 watts/antenna height of 312.4 metres).

This would be a synchronous repeater of CJKX-FM Ajax, using the same frequency as the mother station.

Approval would entail one common signal distributed by both transmitters.

The applicant advised that the synchronous repeater will correct the interference problems in downtown Toronto, an area which falls within the authorized 0.5mV/m contour of CJKX-FM Ajax.
