23. **Shawinigan, Quebec**  
**Application No. 2005-0443-2**

Application by **La radio campus communautaire francophone de Shawinigan inc.** for a licence to operate a French-language FM Type B community radio programming undertaking in Shawinigan.

The new station would operate on frequency 91.1 MHz (channel 216A1) with an effective radiated power of 250 watts (non-directional antenna/antenna height of 9.2 metres).

In Decision CRTC 2001-598 dated 20 September 2001, *New developmental campus radio station*, the Commission approved the application for a broadcasting licence for a new developmental campus radio programming undertaking at Shawinigan. The licence issued to La radio campus communautaire francophone de Shawinigan inc. expires 20 September 2005.

In Public Notice CRTC 2000-12, dated 28 January 2000, *Campus radio policy*, the Commission notes that developmental campus radio stations will generally be licensed for three years. At the end of this term, licensees will be expected to have filed an application with the Commission for a regular campus radio licence or to cease operations.

La radio campus communautaire francophone de Shawinigan inc. notes that it is applying for a licence to operate a Type B community radio station in view of the community's involvement in the project and that CFUT-FM does not fit the profile of a campus radio station.

The Commission notes that the contours of the station will be increased significantly as a result of the proposed increase in power from 5 to 250 watts. The Commission also notes that this change will result in a change of the CFUT-FM status from a low power unprotected service to a regular Class A1 FM station.
