1. **Across Canada** **Application No. 2005-0823-6**

Application by **NMTV inc.**, to amend the licence of the national ethnic Category 2 specialty programming undertaking known as NuevoMundo Television (NMTV).

The licensee proposes an amendment to its existing condition of licence to allow the insertion of up to six (6) minutes per hour of local or regional advertising.

The licensee is currently authorized as defined in *Introductory statement – Licensing of new digital pay or specialty services* Public Notice CRTC 2000-171, 14 December 2000, to distribute up to twelve (12) minutes of advertising material during each clock hour, but such material is limited to national advertising. The proposed change would not alter the total amount of advertising permitted each hour.

The licensee proposes to delete condition of licence 4d) which reads as follows:

The licensee shall not broadcast any paid advertising material other than national paid advertising.

and to amend condition of licence 4a) which reads as follows:

Canada

Except as otherwise provided in subparagraphs b) and c), the licensee shall not broadcast more than twelve (12) minutes of advertising material during each clock hour.

with the following condition:

Except as otherwise provided in subparagraphs b) and c), the licensee shall not distribute more than twelve (12) minutes of advertising material during each clock hour, of which no more than six (6) minutes may consist of local or regional advertising.

2. **Moncton, New Brunswick**
Application No. 2005-0236-1

Application by the **Canadian Broadcasting Corporation (CBC)** relating to the licence of radio programming undertaking CBAF-FM Moncton.

The licensee proposes to change the authorized contours by increasing the average effective radiated power from 22,000 watts to an effective radiated power of 50,000 watts and by increasing the antenna height (non-directional antenna/antenna height 211 metres).

3. **Québec, Saint-Joachim, Sainte-Pétronille, Quebec**
Application No. 2005-0767-6

Application by **Vidéotron ltée**, on behalf of itself and its subsidiary Videotron (Regional) Ltd., collectively called Vidéotron, to amend the licences of the cable distribution undertakings serving the above-mentioned locations.

Vidéotron requests an exemption, by condition of licence, from the requirement under section 25(a) of the *Broadcasting Distribution Regulations* in order to continue distribution of its community channel on channel 9 which has become a restricted channel.

In *New low-power community television station in Québec* – Broadcasting Decision CRTC 2003-413 dated 22 August 2003, the Commission authorized a new low-power community television station in Québec (Télé-Mag inc.) on channel 9. Further to that authorization, channel 9 on the above cable undertakings became a restricted channel.

Vidéotron is of the view that it is preferable to use the only VHF frequency still available on the basic band for the new television station and to leave the community channel on channel 9 because that is the known channel for community programming almost everywhere in the province of Quebec.

4. **Winnipeg, Manitoba**
Application No. 2005-0564-6

Application by the **Canadian Broadcasting Corporation** (CBC) to amend the licence of radio programming undertaking CKSB St-Boniface.

The licensee proposes to add an FM transmitter at Winnipeg to broadcast the programming of CKSB in order to improve service to the population of Winnipeg located in the urban centre.

The CBC cites urban growth, the construction of high-rise concrete and steel buildings, increased electrical noise from overhead wires, large and small appliances and portable radio transmitters impeding the ability of its current AM transmitters delivery of reliable and high quality signals. These factors necessitate the use of a drop-in FM transmitter.

The transmitter would operate on frequency 90.5 MHz (channel 213A) with an effective radiated power of 2,800 watts (non-directional antenna/antenna height of 142.3 metres).

5. **Winnipeg, Manitoba**
Application No. 2005-0566-2

Application by the **Canadian Broadcasting Corporation (CBC)** to amend the licence of radio programming undertaking CBW Winnipeg.

The licensee proposes to add an FM transmitter at Winnipeg to broadcast the programming of CBW in order to improve service to the population of Winnipeg and its surrounding areas (La Salle, Île des Chênes, Selkirk, East Selkirk, Rosser, Stonewall and others).

The CBC cites urban growth, the construction of high-rise concrete and steel buildings, increased electrical noise from overhead wires, large and small appliances and portable radio transmitters impeding the ability of its current AM transmitters delivery of reliable and high quality signals. These factors necessitate the use of a drop-in FM transmitter.

The transmitter would operate on frequency 89.3 MHz (channel 207A) with an effective radiated power of 2,800 watts (non-directional antenna/antenna height of 142.3 metres).

6. **Calgary, Alberta**
Application No. 2005-0569-6

Application by the **Canadian Broadcasting Corporation (CBC)** to amend the licence of radio programming undertaking CBR Calgary.

The licensee proposes to add an FM transmitter at Calgary to broadcast the programming of CBR in order to improve service to the population of Calgary located in the urban centre.

The CBC cites urban growth, the construction of high-rise concrete and steel buildings, increased electrical noise from overhead wires, large and small appliances and portable radio transmitters impeding the ability of its current AM transmitters to delivery of reliable and high quality signals. These factors necessitate the use of a drop-in FM transmitter.

The transmitter would operate on frequency 99.1 MHz (channel 256B) with an effective radiated power of 1,100 watts (non-directional antenna/antenna height of 302.6 metres).
