Application by **Maritime Broadcasting System Limited** relating to the licence of radio programming undertaking CFCY-FM Charlottetown, Prince Edward Island.

The licensee proposes to change the authorized contours by increasing the average effective radiated power from 73,300 watts to an effective radiated power of 100,000 watts, by increasing the antenna height and by relocating the transmitter (non-directional antenna/antenna height to 253 metres).

This undertaking was initially approved in Broadcasting Decision CRTC 2006-89, 24 March 2006, *CFCY Charlottetown – Conversion to FM band*. To date, this undertaking has not commenced operation.

The applicant advised that the proposed changes would be the result of the antenna being co-located on the Canadian Broadcasting Corporation's site which is 17 kilometres west of their initially proposed location. This change will remove the applicant's need to erect its own transmission tower.
